P.S. Free 2026 Microsoft AZ-104 dumps are available on Google Drive shared by DumpsFree: <https://drive.google.com/open?id=1pUpfvc0qr6ElhhC9xhYdTyXKIVZKK9Cl>

Information about Microsoft AZ-104 Exam: Visit DumpsFree and find out the best features of updated Microsoft AZ-104 exam dumps that is available in three user-friendly formats. We guarantee that you will be able to ace the AZ-104 examination on the first attempt by studying with our actual AZ-104 exam questions.

Microsoft AZ-104 Exam is a certification assessment that has been designed to test the knowledge and skills of individuals who wish to become Microsoft Azure Administrators. AZ-104 exam is the replacement for the previous Microsoft AZ-103 certification exam, and it is intended for those who are responsible for managing and monitoring Azure resources and services.

>> AZ-104 Latest Test Bootcamp <<

## Marvelous AZ-104 Latest Test Bootcamp & Leading Offer in Qualification Exams & Trusted AZ-104 Valid Test Pattern

It has similar specifications to the Microsoft AZ-104 desktop-based practice exam software, but it requires an internet connection. Our Microsoft AZ-104 practice exam highlights mistakes at the end of each attempt, allowing you to overcome them before it's too late. This kind of approach is great for complete and flawless Microsoft AZ-104 Test Preparation.

Microsoft AZ-104 Certification Exam is designed to test your knowledge and skills in managing Azure resources, implementing and managing storage and data, configuring and managing virtual networks, and monitoring and optimizing Azure solutions. AZ-104 exam is intended for individuals who have experience in implementing, managing, and monitoring Azure solutions, as well as those

who have a basic understanding of cloud computing concepts and technologies.

## What is the duration, language, and format of AZ-104:Microsoft Azure Administrator Exam

- Length of Examination: 50 mins
- Passing Score: 700 / 1000
- This is beta exam, would be available on or around March 31, 2020.
- Number of Questions: 40 to 60 questions(Since Microsoft does not publish this information, the number of exam questions may change without notice.)

## Microsoft Azure Administrator Sample Questions (Q101-Q106):

### NEW QUESTION # 101

You have an Azure subscription that contains two on-premises locations named site1 and site2.

You need to connect site1 and site2 by using an Azure Virtual WAN.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

**Answer:**

Explanation:

□

### NEW QUESTION # 102

Note: The question is included in a number of questions that depicts the identical set-up.

However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company's Azure subscription includes two Azure networks named VirtualNetworkA and VirtualNetworkB.

VirtualNetworkA includes a VPN gateway that is configured to make use of static routing. Also, a site-to-site VPN connection exists between your company's on-premises network and VirtualNetworkA.

You have configured a point-to-site VPN connection to VirtualNetworkA from a workstation running Windows 10. After configuring virtual network peering between VirtualNetworkA and VirtualNetworkB, you confirm that you are able to access VirtualNetworkB from the company's on-premises network. However, you find that you cannot establish a connection to VirtualNetworkB from the Windows 10 workstation.

You have to make sure that a connection to VirtualNetworkB can be established from the Windows 10 workstation.

Solution: You download and re-install the VPN client configuration package on the Windows 10 workstation.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

Explanation:

If you make a change to the topology of your network and have Windows VPN clients, the VPN client package for Windows clients must be downloaded and installed again in order for the changes to be applied to the client.

<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-about-point-to-site-routing>

### NEW QUESTION # 103

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that an Azure Active Directory (Azure AD) user named Admin1 is assigned the required role to enable Traffic Analytics for an Azure subscription.

Solution: You assign the Owner role at the subscription level to Admin1.

Does this meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

Explanation

The Owner role is a very high-level role that grants full access to manage all resources in the scope, including the ability to assign roles to other users. This role does not follow the principle of least privilege, which means that you should only grant the minimum level of access required to accomplish the goal.

To enable Traffic Analytics for an Azure subscription, you need to have a role that grants you the following permissions at the subscription level:

Microsoft.Network/applicationGateways/read  
 Microsoft.Network/connections/read  
 Microsoft.Network/loadBalancers/read  
 Microsoft.Network/localNetworkGateways/read  
 Microsoft.Network/networkInterfaces/read  
 Microsoft.Network/networkSecurityGroups/read  
 Microsoft.Network/publicIPAddresses/read  
 Microsoft.Network/routeTables/read  
 Microsoft.Network/virtualNetworkGateways/read  
 Microsoft.Network/virtualNetworks/read  
 Microsoft.OperationalInsights/workspaces/\*

Some of the built-in roles that have these permissions are Owner, Contributor, or Network Contributor1.

However, these roles also grant other permissions that may not be necessary or desirable for enabling Traffic Analytics. Therefore, the best practice is to use the principle of least privilege and create a custom role that only has the required permissions for enabling Traffic Analytics2.

Therefore, to meet the goal of ensuring that an Azure AD user named Admin1 is assigned the required role to enable Traffic Analytics for an Azure subscription, you should create a custom role with the required permissions and assign it to Admin1 at the subscription level.

**NEW QUESTION # 104**

You need to prepare the environment to meet the authentication requirements.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Join the client computers in the Miami office to Azure AD.
- B. Install the Active Directory Federation Services (AD FS) role on a domain controller in the Miami office.
- **C. Add <https://autologon.microsoftazuread-sso.com> to the intranet zone of each client computer in the Miami office.**
- D. Allow inbound TCP port 8080 to the domain controllers in the Miami office.
- **E. Install Azure AD Connect on a server in the Miami office and enable Pass-through Authentication.**

**Answer: C,E**

Explanation:

B: You can gradually roll out Seamless SSO to your users. You start by adding the following Azure AD URL to all or selected users' Intranet zone settings by using Group Policy in Active Directory: <https://autologon.microsoftazuread-sso.com> E: Seamless SSO works with any method of cloud authentication - Password Hash Synchronization or Pass-through Authentication, and can be enabled via Azure AD Connect.

Topic 3, Contoso Ltd

Overview

Contoso, Ltd. is a manufacturing company that has offices worldwide. Contoso works with partner organizations to bring products to market.

Contoso products are manufactured by using blueprint files that the company authors and maintains.

Existing Environment

Currently, Contoso uses multiple types of servers for business operations, including the following:

\* File servers

\* Domain controllers

\* Microsoft SQL Server servers

Your network contains an Active Directory forest named contoso.com. All servers and client computers are joined to Active Directory.

You have a public-facing application named App1. App1 is comprised of the following three tiers:

\* A SQL database

\* A web front end

\* A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Requirements

Planned Changes

Contoso plans to implement the following changes to the infrastructure:

Move all the tiers of App1 to Azure.

Move the existing product blueprint files to Azure Blob storage.

Create a hybrid directory to support an upcoming Microsoft Office 365 migration project.

Technical Requirements

Contoso must meet the following technical requirements:

\* Move all the virtual machines for App1 to Azure.

\* Minimize the number of open ports between the App1 tiers.

\* Ensure that all the virtual machines for App1 are protected by backups.

\* Copy the blueprint files to Azure over the Internet.

\* Ensure that the blueprint files are stored in the archive storage tier.

\* Ensure that partner access to the blueprint files is secured and temporary.

\* Prevent user passwords or hashes of passwords from being stored in Azure.

\* Use unmanaged standard storage for the hard disks of the virtual machines.

\* Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

Minimize administrative effort whenever possible.

User Requirements

Contoso identifies the following requirements for users:

Ensure that only users who are part of a group named Pilot can join devices to Azure AD.

Designate a new user named Admin1 as the service administrator of the Azure subscription.

Ensure that a new user named User3 can create network objects for the Azure subscription.

## NEW QUESTION # 105

You have an Azure subscription named Subscription1 that contains the quotas shown in the following table.

□ You deploy virtual machines to Subscription1 as shown in the following table.

□

### Answer:

Explanation:

□
