How much IIBA ECBA: Entry Certificate in Business Analysis Exam

The price of the IIBA ECBA Exam:

- For IIBA Member: \$110 USD
- For IIBA Non-Member: \$235 USD

IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q21-Q26):

NEW QUESTION # 21

In a use case, which is one of the two commonly used relationships?

- A. Identify
- B. Extend
- C. Distribute
- D. Inherit

Answer: B

NEW QUESTION # 22

Which of the following business analysis activities might be undertaken to verify requirements?

- A. Organizing requirements into structures
- B. Identifying a previously documented business need
- C. Comparing a model with another relevant model
- D. Evaluating alignment with solution scope

Answer: D

Explanation:

A requirement can be of benefit to a stakeholder and still not be a desirable part of a solution. A requirement that does not deliver benefit to a stakeholder is a strong candidate for elimination. When requirements do not align, either the future state must be re-evaluated and the solution scope changed, or the requirement removed from the solution scope.

NEW QUESTION # 23

For which part of an initiative is the business analyst (BA) responsible?

- A. Accepting risk mitigation plans
- B. Authorizing the project
- C. Approving solution execution plans
- D. Defining the solution approach

Answer: D

Explanation:

A Business Analyst (BA) is primarily responsible for bridging the gap between business needs and technological solutions. They play a pivotal role in defining the solution approach, which includes understanding and interpreting both the business and technical aspects of a project. This involves identifying, analyzing, and documenting business requirements, and ensuring that the proposed solutions meet these requirements. BAs are not typically responsible for authorizing projects, approving execution plans, or accepting risk mitigation plans, as these tasks are generally within the purview of project managers or other stakeholders.

NEW QUESTION # 24

What prescribes how information may be derived, inferred or calculated based on information available to the business?

- A. Definitional business rule
- B. Business case
- C. Behavioural business rule
- D. Business policy

Answer: A

Explanation:

A definitional business rule prescribes how information may be derived, inferred, or calculated based on existing business data. These rules establish precise meaning and categorization of data, ensuring that terms and concepts are consistently understood and used within the organization.

Examples include:

Calculation rules (e.g., $\text{interest} = \text{principal} \times \text{rate} \times \text{time}$)

Classification rules (e.g., customers with purchases over \$10,000/year are premium) In contrast, behavioral business rules govern constraints or conditions on how actions must be performed.

BABOK Reference:

Discussed under the Strategy Analysis and Requirements Analysis and Design Definition knowledge areas, definitional business rules are explained as fundamental to maintaining business consistency and logical integrity.

NEW QUESTION # 25

Which attribute describes when a business requirement's relative importance and value to a stakeholder is demonstrated?

- A. Complexity
- B. Urgency
- C. Stability
- D. Priority

Answer: D

NEW QUESTION # 26

.....
