GARP SCR (Sustainability and Climate Risk) Certification Exam is a globally recognized credential that assesses a candidate's knowledge and skills in the area of sustainability and climate risk management. SCR exam is designed for professionals who are responsible for integrating sustainability and climate risk considerations into their organization's decision-making processes. It covers a broad range of topics, including climate science, sustainability reporting, environmental and social risk management, and sustainable investing.

Prerequisites of GARP SCR Exam

On June 25, 2019, GARP SCR: Sustainability and Climate Risk was released at the ESG Investing Summit in New York City.

The exam is a new offering from GARP that provides an opportunity for candidates to demonstrate their knowledge and expertise in sustainability, climate risk and corporate governance topics.

- Firstly just like the Certificate in ESG Investing, there are no work experience or prior qualifications required to sit for the

SCR Exam

- Secondly candidates who successfully pass the SCR exam can claim a digital badge for LinkedIn and an electronic certificate from GARP.

Additionally, it evaluates the candidates' ability to analyze the impact of climate risk on businesses and the financial industry, and develop risk management strategies to mitigate these risks.

GARP Sustainability and Climate Risk Sample Questions (Q111-Q116):

NEW QUESTION # 111

A retail company operates internationally, and increasingly incurs scrutiny for environmental and social impacts. In response, the company adopts the SDGs. The company sustainability director begins this process by linking the SDGs to material concerns for the company.

Which strategy should the director suggest the company take to directly address one of the SDGs?

- **A. Promote equitable access to water for surrounding communities.**
- B. Disclose ESG factors to investors and stakeholders.
- C. Maximize profits from green forest bonds.
- D. Ensure the company follows through on stated CSR commitments.

Answer: A

NEW QUESTION # 112

An investment bank of a southern African country appoints a task force to assess current climate risk practices. The task force examines the potential of climate change to cause systemic risk at the macro level to inform climate investment strategies. The task force evaluates potential disruption scenarios to the financial system due to climate risk. Which risk type will most likely have the lowest potential to cause systemic risk to the financial system of the country?

- **A. Operational**
- B. Underwriting
- C. Market
- D. Liquidity

Answer: A

NEW QUESTION # 113

A city planning commissioner consults with climate scientists to assess the impact of sea level rise on strategic infrastructure projects. The scientists discuss several climate model projections and indicate sea level rise has a fundamental relationship to GHG emissions, regardless of a specific warming scenario.

How should the scientists describe this relationship?

- A. Sea level rises proportionally faster than GHG emissions.
- B. Sea level rise will cease once global emissions peak.
- **C. Sea level rise lags GHG emissions.**
- D. Sea level rises in response to ocean acidification.

Answer: C

NEW QUESTION # 114

The CRO at a commercial bank in China examines the negative impact of climate-related physical risk on clothing manufacturer cash flows that subsequently lead to higher credit risk.

The CRO observes which event leading to increased credit risk from climate physical risk?

- A. Decrease in production capacity due to higher labor absenteeism
- B. Higher costs of adaptation to stricter new low-carbon standards
- C. Disruptions in the raw material supply due to climate adaptation
- D. Rising costs of outdated manufacturing equipment write-offs

Answer: C

NEW QUESTION # 115

A large real estate investment firm increases resources to understand transition and physical risks as it expands into markets with climate regulations and increasing flooding events. Senior leadership requires the risk team train all business units in understanding how both climate risks can impact operations.

During this process, how should the risk team define commonalities between both risks?

- A. Each risk type can lead to stranded assets of investee companies.
- B. Renewable energy investment returns will likely increase as each risk type grows.
- C. The timing of impacts from each risk type will follow similar trajectories.
- D. The majority of impacts from each risk type will manifest after 2050.

Answer: A

NEW QUESTION # 116
