Where should you select the packaging string?

- A. Master item contract
- B. Master item agreement
- C. Item catalog category
- D. Master item catalog
- **E. Master item definition**

The Display Master Item Packaging String in Shopping Flows feature allows you to display the master item's packaging string with UOM conversion information to users while they are shopping. The feature lets users know the exact quantity of items they are purchasing, especially when the UOM displayed on the search results page is different from the user's consumption UOM. To use this feature, you need to select the packaging string for the master item in the master item definition. A packaging string is a predefined UOM conversion that specifies how many units of one UOM are equivalent to another UOM. For example, a packaging string of 12 EA/CS means that 12 eaches are equal to one case. You can add a predefined packaging string when you create or edit a master item, or define a new packaging string to fit your requirements.
