Complete Guide to Preparing for the SAP C_TS470_2412 Exam

SAP C_TS470_2412 Exam Guide

www.ERPPrep.com
Prepare for the SAP C_TS470_2412 certification exam with this comprehensive guide. Gain in-depth knowledge of key topics, exam format, and best practices to enhance your understanding. Access expert strategies, sample questions, and study resources to boost your confidence and ensure success in the SAP S/4HANA Cloud Private Edition, Service certification exam.

2025 Die neuesten ZertSoft C-TS470-2412 PDF-Versionen Prüfungsfragen und C-TS470-2412 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1Gk_heiNi7RFNDOBO7gXfQ-z0jgTM4gyy

ZertSoft spezialisiert sich auf die Schulungsunterlagen zur SAP C-TS470-2412 Zertifizierungsprüfung. Mit ZertSoft brauchen Sie sich keine Sorgen für die SAP C-TS470-2412 Zertifizierungsprüfung zu machen. Die Zertifizierungsantworten von ZertSoft sind qualitativ hochwertig. Sobald Sie ZertSoft wählen, können Sie in kurzer Zeit die Prüfung mit einer hohen Note die SAP C-TS470-2412 Zertifizierungsprüfung effizient bestehen und bessere Resultate bei weniger Einsatz erzielen.

SAP C-TS470-2412 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">• Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.
Thema 2	<ul style="list-style-type: none">• Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.

Thema 3	<ul style="list-style-type: none"> • Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.
Thema 4	<ul style="list-style-type: none"> • Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.

C-TS470-2412 Exam & C-TS470-2412 Schulungsangebot

Wenn Sie Ihre Position in der konkurrenzfähigen Gesellschaft durch die SAP C-TS470-2412 Zertifizierungsprüfung festigen und Ihre fachliche Fähigkeiten verbessern wollen, müssen Sie gute Fachkenntnisse besitzen und sich viel Mühe für die Prüfung geben. Aber es ist nicht so einfach, die SAP C-TS470-2412 Zertifizierungsprüfung zu bestehen. Vielleicht durch die SAP C-TS470-2412 Zertifizierungsprüfung können Sie Ihnen der IT-Branche vorstellen. Aber man braucht nicht unbedingt viel Zeit und Energie, die Fachkenntnisse kennenzulernen. Sie können die Schulungsunterlagen zur SAP C-TS470-2412 Zertifizierungsprüfung von ZertSoft wählen. Sie werden zielgerichtet nach den IT-Zertifizierungsprüfungen entwickelt. Mit ihr können Sie mühelos die schwierige SAP C-TS470-2412 Zertifizierungsprüfung bestehen.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service C-TS470-2412 Prüfungsfragen mit Lösungen (Q44-Q49):

44. Frage

Which object can you assign a personnel number to?

- A. Task list operation
- B. Organizational unit
- C. Work center
- D. Service team

Antwort: A

Begründung:

In SAP S/4HANA Cloud Private Edition, Service, a personnel number refers to an identifier for an individual employee or resource, typically managed in the Human Resources (HR) module or linked via organizational management. The question asks which object allows direct assignment of such a personnel number.

The correct answer is task list operation (Option C). In a maintenance or service task list, operations define specific activities to be performed, and you can assign a personnel number to an operation to specify the responsible employee or technician. This assignment is part of capacity planning and resource allocation, ensuring that the right individual is scheduled for the task.

* Organizational unit (A): This is a higher-level structure in organizational management (e.g., a department) and does not directly accept a personnel number assignment. Personnel are linked to it via positions or roles, not directly.

* Service team (B): While a service team consists of personnel, it is a group entity, and individual personnel numbers are not assigned to it as an object in this context.

* Work center (D): A work center represents a location or group of resources (e.g., machines or people) and can be linked to capacity, but it does not directly accept a personnel number assignment. Instead, it uses capacity categories or links to HR indirectly. "In task lists, operations can be assigned to specific personnel numbers to define the responsible employee for executing the task, facilitating detailed resource planning."

45. Frage

Which of the following can be assigned to a serial number profile?

- A. Equipment class
- B. Configuration profile
- C. Equipment category
- D. Stock determination strategy

Antwort: C

Begründung:

A serial number profile in SAP S/4HANA defines how serial numbers are managed for materials or equipment. The correct answer is equipment category (C). Let's explore this deeply.

Serial Number Profile Purpose:

It controls serialization (e.g., mandatory entry, stock check) and links to objects like equipment or materials.

Why Equipment Category?

The equipment category (e.g., "M" for machines) determines the type of equipment created when a serialized material is installed or tracked. In customizing (SPRO # Plant Maintenance # Master Data # Technical Objects # Serial Number), the serial number profile is assigned to an equipment category to define how serial numbers generate equipment records (e.g., automatically upon goods receipt).

Why Not the Others?

- * Equipment class (A): Classes group equipment by characteristics, not assigned to serial profiles.
- * Configuration profile (B): This is for configurable products, unrelated to serial numbers.
- * Stock determination strategy (D): This controls stock selection, not serialization.

Example:

Serial profile "S001" is assigned to equipment category "M," ensuring that serialized pumps create equipment records of type "M."

"A serial number profile can be assigned to an equipment category to define the equipment type created for serialized objects."

46. Frage

What are the benefits of maintaining bills of material (BOMs) with BOM usage 4 (Plant Maintenance)? Note:

There are 2 correct answers to this question.

- A. Spare parts planning in task list
- B. Spare parts planning in service order template
- C. Structuring of technical assets
- D. Spare parts planning in service order

Antwort: A,D

Begründung:

BOM usage 4 (Plant Maintenance) in SAP S/4HANA Cloud Private Edition, Service is designed for maintenance processes, listing components (e.g., spare parts) for technical objects. The correct benefits are spare parts planning in task list (C) and spare parts planning in service order (D). Let's break this down thoroughly.

What is BOM Usage 4?

A BOM with usage 4 is linked to equipment or functional locations, defining parts needed for maintenance (e.g., bolts, filters). It's maintained in transactions like IB01/IB02.

* Spare parts planning in task list (C): When a task list (e.g., for pump maintenance) references a technical object with a BOM usage 4, the BOM's components are pulled into the task list operations as planned spare parts. This ensures materials are reserved or ordered in advance. For example, Operation 0010 might list "Gasket" from the BOM.

* Spare parts planning in service order (D): A service order linked to a technical object inherits the BOM usage 4 components, enabling spare parts planning directly in the order. This supports reservations or goods issues (e.g., via IW31/IW32).

Why Not the Others?

* Spare parts planning in service order template (A): Service order templates define structure, not BOM-linked planning; BOM usage 4 applies to execution objects (orders, task lists).

* Structuring of technical assets (B): BOMs describe components, not the hierarchical structure (handled by functional locations or equipment hierarchies).

Real-World Benefit:

A pump's BOM (usage 4) lists "Seal" and "Bearing." A task list or service order automatically plans these, reducing downtime by ensuring availability.

"BOMs with usage 4 enable spare parts planning in task lists and service orders, enhancing maintenance efficiency."

47. Frage

Which assignment is required in a cross-plant planning scenario?

- A. A planner group to several planning plants
- B. Several planning plants to a maintenance plant
- **C. Several maintenance plants to a planning plant**
- D. A planner group to several maintenance plants

Antwort: C

Begründung:

In across-plant planning scenario, maintenance activities span multiple plants. The correct answer is B. Let's unpack this.

Cross-Plant Planning Context:

One planning plant oversees maintenance for multiple maintenance plants (where technical objects reside).

Why Several Maintenance Plants to a Planning Plant?

The planning plant is the central hub for scheduling and resource allocation. Maintenance plants (e.g., Plant 0001, Plant 0002) are assigned to it (e.g., Plant 1000) in customizing (SPRO # Enterprise Structure # Assignment # Plant Maintenance). This ensures a single point of control for work orders and plans across plants.

Why Not the Others?

* A: Planner groups are assigned within a plant, not across plants directly.

* C: Multiple planning plants for one maintenance plant is illogical.

* D: Planner groups operate within a planning plant, not across multiple.

Example:

Planning Plant 1000 manages maintenance for Plants 0001 and 0002.

"In cross-plant planning, several maintenance plants are assigned to a planning plant to centralize maintenance scheduling."

48. Frage

In the service order, which reference objects can you assign on service item level? Note: There are 2 correct answers to this question.

- **A. Serial number**
- B. Counter
- **C. Installed base**
- D. Product

Antwort: A,C

Begründung:

In a service order, reference objects at the item level specify what's being serviced. The correct answers are installed base (B) and serial number (C).

* Installed base (B): An installed base (IBASE) groups technical objects (e.g., a customer's system), assignable to a service item for context.

* Serial number (C): Identifies a specific instance of a material/equipment, linked to the item for tracking.

Why Not the Others?

* Counter (A): Used for measurements, not a reference object.

* Product (D): A material, not a reference object like IBASE or serial.

"Reference objects at the service item level include installed base and serial number."

49. Frage

.....

Prüfungsfragen und Antworten zur C-TS470-2412 Zertifizierung verändern sich immer wegen der Entwicklung der IT-Technik. Deshalb sind Dumps von ZertSoft immer aktualisiert. Und wenn sie die Prüfungsunterlagen zur SAP C-TS470-2412 Zertifizierung von ZertSoft kaufen, bietet ZertSoft Ihnen einjährigen kostenlosen Aktualisierungsservice. Solange die exam Fragen aktualisiert sind, werden wir Ihnen die neuesten C-TS470-2412 Prüfungsmaterialien senden. Damit können Sie jederzeit die neueste Version haben. ZertSoft kann sowohl Ihnen helfen, die Prüfung zu bestehen, als auch die neuesten Kenntnisse zu beherrschen. Verpassen Sie bitte nicht preiswerte Unterlagen.
