- **A. A Process Exception Event is fired**
- B. A Fulfillment Order or Order Summary object are modified and any modification meets the error criteria
- C. On a daily basis using Schedule Jobs in Setup

Answer: A

NEW QUESTION # 28

How can an administrator add visibility rules for the buttons in the Highlights Panel on the Order Summary record page?

- A. Create a custom Highlights Panel component
- B. Navigate to the Order Summary object in Setup and modify the Highlights Panel visibility rules
- **C. Modify the Lightning Record Page Highlights Panel using Dynamic Actions**
- D. Modify the visibility rules of the Highlights Panel Actions in the page layout

Answer: C

Explanation:

Dynamic Actions allow an administrator to add visibility rules for the buttons in the Highlights Panel on the Lightning Record Page. Dynamic Actions let you configure when and where actions appear on a record page based on criteria such as record field values, user permissions, or device type.

NEW QUESTION # 29

What three steps are required when deploying changes via change sets?

- **A. Deploy the change set in the target org**
- B. Approve the change set in the sandbox org
- **C. Create the change set in the sandbox org**
- **D. Upload the change set to the target org**
- E. Add the change set to the release schedule in the target org

Answer: A,C,D

Explanation:

Three steps that are required when deploying changes via change sets are:

Create the change set in the sandbox org. This is the first step where the administrator selects the metadata components that they want to deploy and adds them to a change set in the source org, which is usually a sandbox org.

Upload the change set to the target org. This is the second step where the administrator sends the change set from the source org to the destination org, which is usually a production org or another sandbox org. The administrator needs to have a deployment connection with the target org and permission to upload change sets.

Deploy the change set in the target org. This is the final step where the administrator validates and deploys the change set in the destination org. The administrator needs to have permission to deploy change sets and resolve any deployment errors or warnings.

NEW QUESTION # 31

Which of the following options represent two ways that an administrator can utilize APIs in Workbench to query OrderSummaries?

- A. Connect API and Platform API
- **B. Platform API and Composite API**
- C. Apex API and Connect API
- D. Composite API and Invocable API
- E. Invocable API and Apex API

Answer: B

Explanation:

The Platform API and the Composite API are two ways that an administrator can use APIs in Workbench to query Order Summaries. The Platform API allows querying, creating, updating, deleting, and searching records in Salesforce. The Composite API allows combining multiple requests into a single call, which can improve performance and reduce complexity.
