Most experts agree that the best time to ask for more dough is after you feel your AZ-120 performance has really stood out. Our AZ-120 guide materials provide such a learning system where you can improve your study efficiency to a great extent. During the process of using our AZ-120 Study Materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your AZ-120 practice time, which will make you feel the actual AZ-120 exam environment and build up confidence.

By passing the Microsoft AZ-120 exam, candidates can demonstrate their expertise in deploying and managing SAP workloads on Azure, which is a highly sought-after skill in the industry. Planning and Administering Microsoft Azure for SAP Workloads certification validates the ability to design, deploy, and manage enterprise-grade SAP solutions in the cloud, making candidates more competitive in the job market.

The Microsoft AZ-120 exam covers a range of topics, including planning and deploying SAP solutions on Azure, configuring Azure infrastructure for SAP workloads, managing and monitoring SAP workloads on Azure, and optimizing Azure resources for SAP workloads. Candidates are expected to have a thorough understanding of SAP architecture and Azure infrastructure, as well as experience in deploying and managing SAP systems.

The AZ-120 Exam measures the candidate's knowledge and skills in various areas such as Azure architecture, Azure services, deployment and migration of SAP workloads to Azure, SAP HANA on Azure, and monitoring and troubleshooting Azure solutions. AZ-120 exam consists of multiple-choice questions, scenario-based questions, and drag-and-drop questions.

Free PDF Quiz 2026 AZ-120: Pass-Sure Planning and Administering Microsoft Azure for SAP Workloads Real Dumps

Since the cost of signing up for the Planning and Administering Microsoft Azure for SAP Workloads AZ-120 exam dumps is considerable, your main focus should be clearing the Planning and Administering Microsoft Azure for SAP Workloads AZ-120 exam on your first try. Utilizing quality Microsoft AZ-120 Exam Questions is the key to achieving this. Buy the Planning and Administering Microsoft Azure for SAP Workloads AZ-120 Exam Dumps created to avoid the stress of searching for tried-and-true Microsoft AZ-120 certification exam preparation.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q57-Q62):

NEW QUESTION # 57

You have two Azure virtual machines that host a Microsoft SQL Server 2019 failover cluster instance (FCI) named FC11. FC11 hosts the database tier of an SAP NetWeaver system. The application tier connects to FC11 by using a virtual network name (VNN) of fc11.contoso.com. Name resolution is provided by an Azure Private DNS zone.

On FC11, you implement a distributed network name (DNN) of FC11DNN and verify that you can connect to fc11dnn.contoso.com.

You need to ensure that the application tier can use the DNN when connecting to FC11.

What should you do first?

- A. From SQL Server Configuration Manager on FC11, create an alias in the SQL Server Native Client Configuration.
- B. From SQL Server Configuration Manager on FC11, enable shared memory for the SQL Server Native Client Configuration.
- C. In the private DNS zone, create a CNAME record.
- D. In the private DNS zone, create an A record.

Answer: C

NEW QUESTION # 58

You have an SAP landscape on Azure that contains the virtual machines shown in the following table.

You need to recommend a recovery solution in the event of an Azure regional outage. The solution must meet the following requirements:

- * Minimize costs.
- * Minimize data loss.
- * Minimize administrative effort.

What should you recommend for each virtual machine? To answer, drag the appropriate services to the correct virtual machines.

Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 59

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.

How should you complete the relevant component of the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Graphical user interface, text, application, email Description automatically generated

Box 1: extensions

Azure Disk Encryption can be enabled via Azure PowerShell or Azure CLI. That is normally seen in remediation. In a real-world

scenario you would like to see a virtual machine during its creation include disk encryption process. This is technically possible thanks to Disk Encryption VM extension.

Box 2: AzureDiskEncryption

Example:

```
"type": "Microsoft.Compute/virtualMachines/extensions",
"name": "[concat(parameters('vmName'), '/diskEncryption')]",
"apiVersion": "2019-03-01",
"location": "[parameters('location')]",
"dependsOn": [
  "[resourceId('Microsoft.Compute/virtualMachines/', parameters('vmName'))]"
],
"properties": {
  "publisher": "Microsoft.Azure.Security",
  "type": "AzureDiskEncryption",
```

NEW QUESTION # 60

You plan to migrate an SAP database from Oracle to Microsoft SQL Server by using the SQL Server Migration Assistant (SSMA).

You are configuring a Proof of Concept (PoC) for the database migration. You plan to perform the migration multiple times as part of the PoC.

You need to ensure that you can perform the migrations as quickly as possible. The solution must ensure that all Oracle schemas are migrated.

Which migration method and migration mode should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

see the explanation for below image:

Explanation:

Answer selected as in image below.

NEW QUESTION # 61

You plan to implement a deployment of SAP NetWeaver on Azure. The deployment will be hosted on virtual machines that run a custom Windows Server 2022 Datacenter image.

You need to configure the virtual machines to support Secure Boot.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 62

.....

Exam AZ-120 tests your professional talent and expertise. This is the reason that passing this Microsoft Azure certification exam has been a tough challenge for professionals. But it is made easy now to ace it! The recently developed PremiumVCEDump's AZ-120 Exam Questions dumps aim at to deliver you the shortest possible route to obtaining AZ-120 without any chance of losing the exam.
