

# C\_S43學習指南 & C\_S43題庫更新

我們都很清楚 SAP C\_S43 認證考試在IT行業中的地位是舉足輕重的地位，但關鍵的問題是能夠拿到SAP C\_S43的認證證書不是那麼簡單的。我們很清楚地知道網上缺乏有品質的準確性高的相關考試資料。KaoGuTi的考試練習題和答案可以為一切參加IT行業相關認證考試的人提供一切所急需的資料。它能時時刻刻地提供你們想要的資料，購買我們所有的資料能保證你通過你的第一次SAP C\_S43認證考試。

SAP C\_S43 是一個專業知識和技能的認證考試。在IT行業中找工作，很多人力資源經理在面試時會參考你有哪些SAP相關的認證證書。如果你擁有SAP C\_S43認證證書，顯然可以提高你的競爭力。

>> C\_S43學習指南 <<

## C\_S43題庫更新，C\_S43考試重點

为了能够高效率地准备C\_S43认证考试，你知道什么工具是值得使用的吗？我来告诉你吧。KaoGuTi的C\_S43考古題是最可信的資料。这个考古題是IT業界的精英們研究出來的，是一個難得的練習資料。這個考古題的命中率很高，合格率可以達到100%。這是因為IT專家們可以很好地抓住考試的出題點，從而將真實考試時可能出現的所有題都包括到資料裏了。覺得不可思議嗎？但是這是真的。用過之後你就會知道。

## 最新的 SAP Certified Application Associate C\_S43 免費考試真題 (Q10-Q15):

### 問題 #10

Create a Maintenance Plan

The project team evaluates during the implementation project Maintenance Plans in SAP S/4HANA Asset Management. The following features need to be checked:

Create a Maintenance Plan

Create a Maintenance Plan and save it. Use the following information:

Field	Value
Maint. Plan cat. (via SAP GUI) Maintenance Plan for (via FLP)	Maintenance Order
Maintenance Strategy	Z##
Description	Regular pump maintenance - Z##
Equipment	T-PA##
Order Type	PM02
Task List Type	A
Group	TL-##
Counter	1

答案：

解題說明：

See the Explanation for complete Solution of this Task.

Explanation:

Task 8: Create a Maintenance Plan

The objective of this task is to create a strategy-based maintenance plan that will automatically generate work orders for your pump based on the frequencies defined in your task list.

Step 1: Access the Transaction

\* Transaction Code : Enter IP42 in the command field and press Enter .

\* Initial Screen :

\* Maintenance Plan Category : Select Maintenance Order (or "Maintenance plan for Maintenance Order" if using the Fiori Launchpad).

\* Maintenance Strategy : Enter Z48 .

\* Press Enter .

Step 2: Enter Header and Maintenance Item Data

Once you are on the main creation screen, fill in the "Maintenance Item" section to define what is being maintained and how the orders should look:

\* Description : Enter Regular pump maintenance Z48 .

\* Equipment : Enter T-PA48 .

\* Planning Plant : This should default to 1010 based on the equipment, but ensure it is correct.

\* Order Type : Enter PM02 .

Explanation : By assigning Equipment T-PA48 and Order Type PM02 , you are telling SAP to generate a specific "Planned" maintenance order every time this schedule is triggered.

Step 3: Link the Task List

This step connects the plan to the specific maintenance steps (operations) you created in Task 7.

\* Look for the Task List section at the bottom of the screen.

\* Task List Type : Enter A (General Task List).

\* Group : Enter TL-48 .

\* Counter : Enter 1 .

\* Press Enter to validate the connection. You should see the description "Regular Maintenance GR48" appear.

Explanation : Linking the Task List ensures that when the maintenance plan generates an order, it automatically copies the 30-minute operations you defined earlier into that order.

Step 4: Set Scheduling Parameters (Optional but Recommended)

While the table in your document focuses on the data above, typically you would click the Maintenance Plan Scheduling Parameters tab to ensure the "Scheduling Period" and "Start Date" are set. However, for the assessment, the mandatory data is what we entered in Steps 1-3.

Step 5: Save

\* Click the Save (floppy disk) icon.

\* Note your Maintenance Plan Number : The system will display a message at the bottom, such as

"Maintenance plan 123 saved." Write this number down , as you will need it for Task 9: Schedule a Maintenance Plan .

Task 8 is now complete! You have built the automated "brain" that will handle the recurring maintenance for your pump.

### 問題 #11

Task 11: Classify a piece of Equipment

The project team evaluates during the implementation project the classification of Technical Objects in order to use Checklists in SAP S/4HANA Asset Management. The following features need to be checked:

- \* Assign a class to a Technical Object
- \* Assign characteristic values to a class
- \* Assign class EQ11 value to Technical Object T-PA##.
- \* Assign a characteristic value, so that Inspection Plan Q / CL-DE-00 / 1 is automatically found during the checklist process

答案:

解題說明:

See the Explanation for complete Solution of this Task.

Explanation:

Task 11 Overview

This task involves classifying a piece of equipment so it can be used in the Checklist process . By assigning a specific class and characteristic values, you enable the system to automatically find the correct inspection plan when a maintenance order is created.

Step 1: Access the Equipment Master Record

To classify the equipment, you must first open its master record in "Change" mode.

- \* Transaction Code : Enter IE02 (Change Equipment) in the command field and press Enter .
- \* Equipment : Enter T-PA48 .
- \* Action : Press Enter to open the record.

Step 2: Assign the Class to the Equipment

Now you will link the equipment to a class that contains the required technical characteristics.

- \* Navigate : Click the Classification button in the top toolbar (or go to the Classes tab if available).
- \* Class Assignment :
- \* Class Type : Ensure this is set to 002 (Equipment Class).
- \* Class : Enter EQ11 .
- \* Action : Press Enter . The system will now display the characteristics associated with class EQ11 in the bottom half of the screen.

Explanation : Assigning a class is like giving the equipment a "category". Class EQ11 is specifically configured in this system to hold the data needed for checklist processing.

Step 3: Assign Characteristic Values

This is the critical step that tells the system exactly which inspection plan to use for this specific pump.

- \* Locate the Characteristic : In the values table, look for a characteristic related to "Inspection Plan" or "Checklist Group."
- \* Enter the Value : Assign the value so that Inspection Plan CL-DE-00 / 1 is automatically found.
- \* Note: Typically, you will enter CL-DE-00 in the "Inspection Plan Group" field and 1 in the "Group Counter" field.
- \* Action : Press Enter to validate the values.

Explanation : Characteristic values are the specific details for this asset. By entering these values, you "tag" the equipment so that whenever it is added to a maintenance order, the system knows to look for the CL-DE-00 checklist automatically.

Step 4: Save

- \* Action : Click the Save (floppy disk) icon.
- \* Confirmation : The system should display a message at the bottom saying: "Equipment T-PA48 changed."

### 問題 #12

Schedule a Maintenance Plan

The project team evaluates during the implementation project the scheduling of Maintenance Plans in SAP S/4HANA Asset Management. The following features need to be checked:

Schedule a Maintenance Plan

Display a generated Maintenance Order

Schedule the previously created Maintenance Plan. The following prerequisites have to be met:

The next upcoming call is the 4 MON Maintenance Package

Calculate the Completion Date of the last Maintenance Package as follows: Today's date minus 4 weeks (e.g. today's date: 15th of December >>> Completion Date: 17th of November) The Call Date is always 10 days before the Plan Date.

Note:

Check your Maintenance Plan and adapt it, if necessary, before you schedule it.

Check the following information in the generated Maintenance Order:

number of order operations: 2

Maintenance Plan: number of the previously created Maintenance Plan

Last Included Task List: A / TL-## / 1

答案:

解題說明:

See the Explanation for complete Solution of this Task.

Explanation:

Task 9 Overview

The goal of this task is to trigger the maintenance schedule you built in Task 8 so that the system generates an actual work order.

You must meet specific scheduling conditions to ensure the right maintenance cycle (the 4- month package) is triggered.

Step 1: Adapt Scheduling Parameters (IP02)

Before starting the schedule, you must ensure the "Call Date" rules are correct.

\* Transaction : Enter IP02 (Change Maintenance Plan).

\* Maintenance Plan : Enter the number you saved in Task 8 and press Enter .

\* Scheduling Parameters Tab :

\* Call Horizon : Adjust this so that the Call Date occurs exactly 10 days before the Plan Date.

\* Note: If your system uses percentages, you will need to calculate the percentage of the 4-month cycle that results in a 10-day lead time.

\* Save your changes.

Step 2: Schedule the Plan (IP10)

Now you will "start" the clock for this maintenance schedule.

\* Transaction : Enter IP10 (Schedule Maintenance Plan).

\* Maintenance Plan : Enter your plan number and press Enter .

\* Start Scheduling : Click the Start icon (or go to Maintenance plan > Scheduling > Start ).

\* Enter the "Start Date" / "Completion Date" :

\* The Rule : You must use Today's date minus 4 weeks .

\* Example: If today is April 19, enter March 22.

\* Press Enter . The system will calculate the next calls.

\* Verify the Package : Ensure the next upcoming call is indeed the 4 MON (4-month) Maintenance Package.

\* Save (Floppy Disk icon). This will generate a new Maintenance Order number.

Step 3: Verify the Generated Maintenance Order

You must now check that the order was created correctly based on the rules of your Task List (Task 7) and Maintenance Plan (Task 8).

\* Display Order : In IP10 , select the line for the generated call and click the Display Order icon (or use transaction IW33 with the new order number).

\* Check the following three items :

\* Operations : Verify there are exactly 2 operations in the order (the Monthly and 4-Month tasks).

\* Maintenance Plan : Confirm the order shows your specific Maintenance Plan number.

\* Task List : Verify the "Last Included Task List" is A / TL-48 / 1 .

### 問題 #13

Create a Maintenance Order with Checklists

The project team evaluates during the implementation project Maintenance Orders with Checklists in SAP S/4HANA Asset Management. The following features need to be checked:

\* Create a Maintenance Order with Checklist

\* Display a Maintenance Order with automatically generated Object List and Checklist.

\* Create a Maintenance Order using an Order Type which is already configured for the checklist process.

Use the following data:

Field	Value
Functional Location	##-01-PRD-01-03-HD
General Maintenance Task List	A / T-PMCLN / 1

\* Display the previously created Maintenance Order with automatically generated Object List and Checklist.

**答案:**

**解題說明:**

See the Explanation for complete Solution of this Task.

Explanation:

Task 12 Overview

In this task, you will create a maintenance order using a specific order type configured for the checklist process. The system will then automatically generate an object list and a corresponding checklist based on the equipment and task list assigned.

Step 1: Create a Maintenance Order with Checklist

You need to create a new order using a functional location and a specific task list that triggers the checklist functionality.

\* Access the Transaction : Use transaction code IW31 (Create Maintenance Order).

\* Initial Screen :

\* Order Type : Select an order type already configured for the checklist process (typically PM01 or a specific custom type designated for checklists in your training environment).

\* Press Enter .

\* Enter Header and Location Data :

\* Functional Location : Enter 48-01-PRD-01-03-HD .

\* Description : Enter a relevant description (e.g., Pump Checklist Maintenance GR48).

\* Assign the Task List :

\* Go to the Operations tab or find the task list assignment section.

\* General Maintenance Task List : Enter A / T-PMCLEN / 1 .

\* Press Enter to validate.

\* Save : Click the Save (floppy disk) icon.

Explanation : By assigning this specific functional location and general task list, you are triggering the

"Checklist" integration. The system uses the classification data you set up in Task 11 to determine that a checklist (inspection lot) is required for this job.

Step 2: Display and Verify the Checklist

After saving, you must verify that the system correctly generated the technical components of the checklist.

\* Display the Order : Use transaction code IW33 and enter the order number you just created.

\* Verify the Object List :

\* Navigate to the Object List tab.

\* You should see the equipment or functional location listed here with a link to the checklist.

\* Verify the Checklist :

\* Look for a button or tab labeled Checklists or Inspection Lot within the order.

\* The system should show that a checklist has been automatically generated for the repair operations.

Explanation : The goal of this step is to confirm that the "Object List" and "Checklist" were created automatically by the system. This proves the background configuration for QM (Quality Management) integration is working correctly with your maintenance order

## 問題 #14

Task 4: Configure and create Technical Objects

The project team evaluates during the implementation project Technical Object structures in SAP S/4HANA Asset Management.

The following features need to be checked:

\* Configure and create Functional Locations

\* Create, serialize and install Equipment

\* Create Functional Location master record ZZ0##-01 and save it. Use the following information:

Field	Value
Functional Location	ZZ0##-01
Structure Indicator	ZZ##
Functional Location Category	T
Description	Production Line Z##
Maintenance Plant	1020
Cost Center	4110
Planning Plant	1020
Planner Group	Z##
Main WorkCtr	T-ME##
Work Center Plant	1010

\* Create Equipment master record EQUI-## and save it. Use the following information:

Field	Value
Equipment	EQUI-##
Description	Drive Motor GR##
Equipment Category	T

\* Serialize the just created Equipment master record EQUI-## . Use the following data:

Field	Value
Material	T-PM8000
Serial Number	EQUI-##

\* Install Equipment EQUI-## at the Functional Location 00-01-ASS-02 .

答案：

解題說明：

See the Explanation for complete Solution of this Task.

Explanation:

Task 4: Configure and create Technical Objects

This task evaluates your ability to structure and manage the physical and functional hierarchy of assets in SAP S/4HANA Asset Management.

Step 1: Create Functional Location Master Record

A Functional Location represents the area at which a maintenance task is to be performed.

\* Access the Transaction : Use transaction code IL01 (Create Functional Location).

\* Enter Initial Data :

\* Functional Location : ZZ048-01.

\* Structure Indicator : ZZ48.

\* Functional Location Category : T.

\* Press Enter .

Table View Edit Goto Sejection Utilities System Help

Structure

Edit mask XXXXX-XX  
 HierLevels 1 2

Identifying Lvl  Ident. Label   
 2nd Ident. Lvl 0 2nd Iden. Label

✔ Data was saved

- \* Enter General Data :
- \* Description : Production Line Z48.
- \* Enter Location and Organization Data :
- \* Maintenance Plant : 1020.
- \* Cost Center : 4110.
- \* Planning Plant : 1020.
- \* Planner Group : Z48.
- \* Main WorkCtr : T-ME48.
- \* Work Center Plant : 1010.
- \* Save : Click the Save icon.

Explanation : By creating this record, you define a specific functional area within Plant 1020 where maintenance costs and history will be tracked for all equipment installed there.

### Create Functional Location: Master Data

Classification Measuring points/counters Data origin... AllMeasDocs

Equipment category M Machines

Reference

Equipment	<input type="text"/>
Material	<input type="text"/>

✔ Equipment created with the number EQUI48

\* Enter General Data :

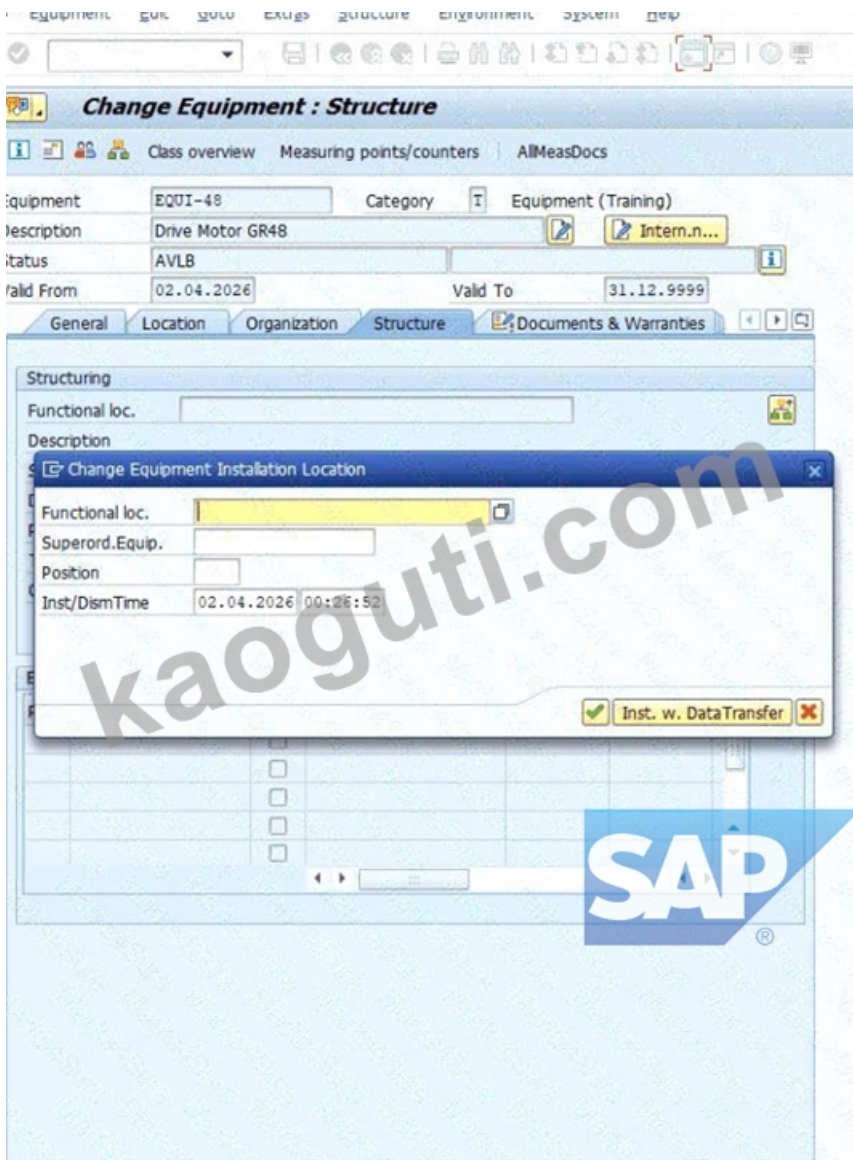

\* Description : Drive Motor GR48.

\* Save : Click the Save icon.

Explanation : This step creates a master record for a physical asset-a drive motor-allowing you to track its individual lifecycle,

independent of where it is currently installed.

### Step 3: Serialize the Equipment

Serialization links a piece of equipment to a specific material and unique serial number for inventory management and tracking.

\* Access the Transaction : Use transaction code IE02 (Change Equipment) and enter EQUI-48.

\* Navigate to Serial Data : Go to the SerData (Serial Data) tab.

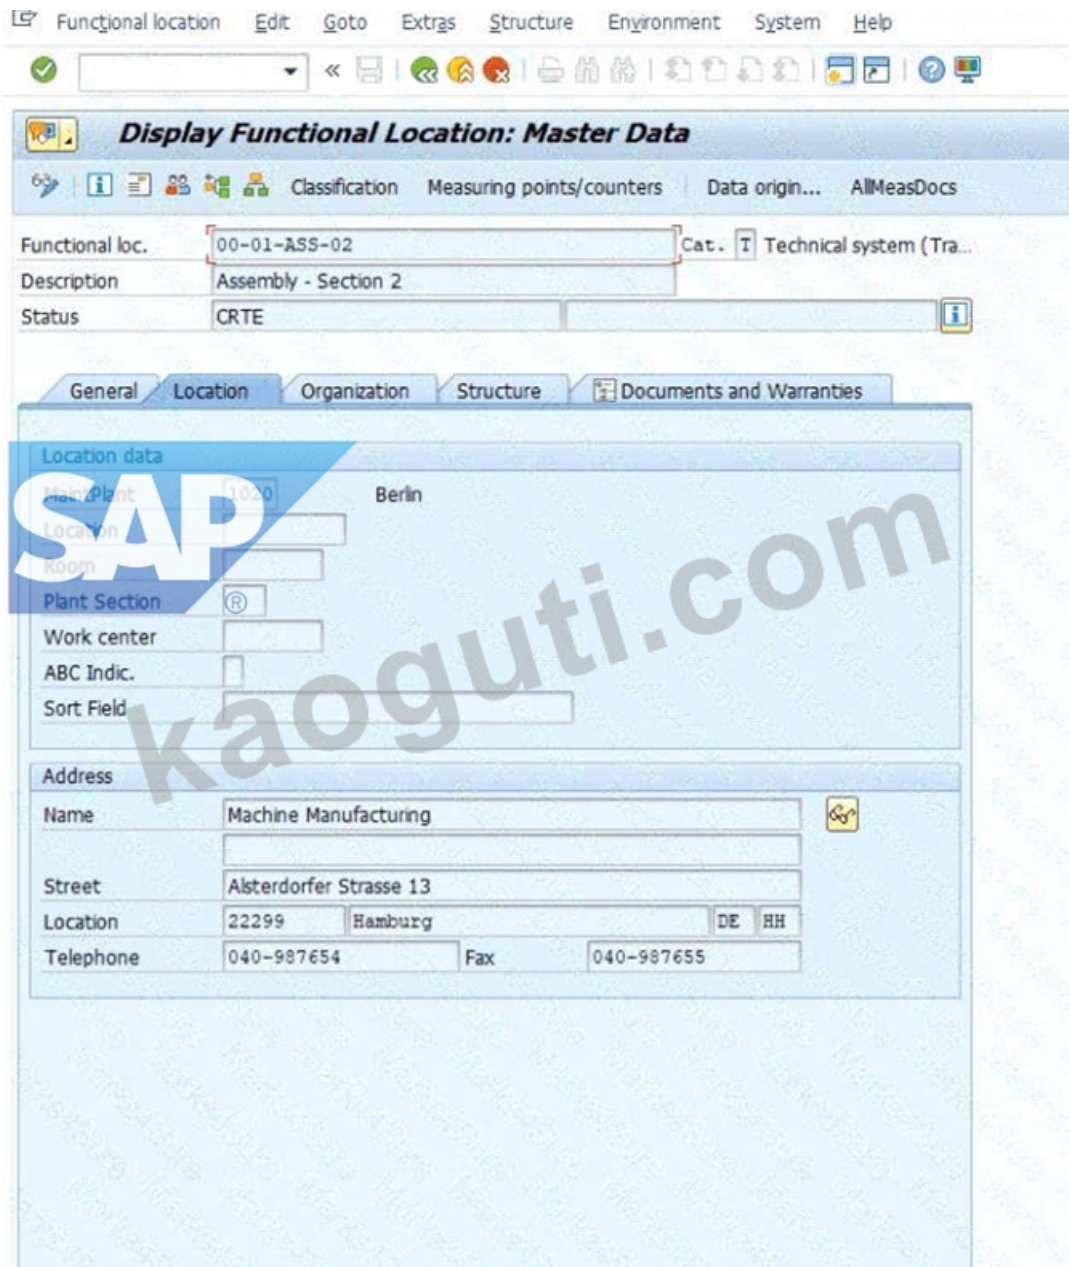

\* Enter Serialization Data :

\* Material : T-PM8000.

\* Serial Number : EQUI-48.

\* Save : Click the Save icon.

Explanation : Linking the motor to Material T-PM8000 enables the system to track this specific asset as a serialized part, which is essential for warehouse movements and warranty tracking.

#### Step 4: Install Equipment at a Functional Location

This establishes the relationship between the physical asset (Equipment) and the functional area where it is operating.

- \* Access the Transaction : Use transaction code IE02 (Change Equipment) for EQUI-48.
- \* Modify Installation Location :
- \* Click on the Structure tab.
- \* Find the FunctLoc field.
- \* Enter the location: 00-01-ASS-02.
- \* Save : Click the Save icon.

Explanation : This installation "plugs" your drive motor into the functional hierarchy at location 00-01-ASS-02. From this point forward, any maintenance performed on this motor will be automatically associated with that location's history.

#### 問題 #15

.....

我們的SAP C\_S43題庫是由專業的IT團隊以最好的技術水準制作而得到的學習資料，其中整合最新的C\_S43考試問題得到而來，以確保您購買我們的題庫資料是真實有效的，即使是新手也可以快速輕鬆獲得SAP C\_S43認證。對於如此有效的考古題，趕快加入購物車吧！付款之后您就可以立即下載所購買的C\_S43題庫，這將會讓您在您的考試中獲得高分，并順利的通過C\_S43考試。
