**Try Google Chrome-Enterprise-Administrator Questions - Best Way To Go Through Chrome-Enterprise-Administrator Exam [2026]**

Now we can say that Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam questions are real and top-notch Google Chrome-Enterprise-Administrator exam questions that you can expect in the upcoming Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam. In this way, you can easily pass the Chrome-Enterprise-Administrator exam with good scores. The countless Chrome-Enterprise-Administrator Exam candidates have passed their dream Chrome-Enterprise-Administrator certification exam and they all got help from real, valid, and updated Chrome-Enterprise-Administrator practice questions, You can also trust on Prep4away and start preparation with confidence.

## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li> </ul>

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q45-Q50):

### NEW QUESTION # 45

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates?

- A. Relaunch notification
- B. Rollback to target version
- C. Component updates
- D. Auto-update check period

**Answer: D**

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

#### NEW QUESTION # 46

A user reports having frequent issues accessing corporate pages and logging into corporate applications. After looking into user reports, it is determined that other users have reported similar issues over the past few months. While the broader investigation is launched to identify and resolve the root cause, which Google Admin remote actions for managed Chrome browsers can be used to help alleviate such issues for the user?

- A. Clear Cache and Cookies; Delete Temporary Files; Restart User Session
- B. Clear Cache; Delete Temporary Files; Delete Swap File
- C. Clear Cache; Clear Cookies; Clear Cache and Cookies
- D. Clear Cookies; Restart Browser; Logout User

**Answer: C**

Explanation:

Clearing the browser's cache and cookies is a common first-line troubleshooting step for issues related to website access and login problems. Outdated or corrupted cached data and cookies can often interfere with website functionality and authentication processes. The Google Admin console provides remote actions to "Clear Cache," "Clear Cookies," or both. Options B, C, and D include actions that are either more disruptive (restart browser, logout user, restart user session) or not standard remote actions available for managed Chrome browsers through the Admin console (delete temporary files, delete swap file).

#### NEW QUESTION # 47

A company is reviewing the permissions of extensions that are popular among employees. The security team wants to make sure all extensions in the environment have these capabilities disabled:

- \* Modify to internal home page: `internal.acme.com`
- \* Access to the storage
- \* Access to history

Which actions should be taken in the company default extension Permissions and URLs fields to meet the security team's requirements?

- A. Add `internal.acme.com` to runtime blocked hosts; Disable storage permission; Disable history permission
- B. Add `internal.acme.com` to runtime blocked hosts; Enable storage permission; Enable history permission
- C. Add `\*.acme.com` to runtime blocked hosts; Disable storage permission; Disable history permission
- D. Add `\*.acme.com` to runtime blocked hosts; Enable storage permission; Enable history permission

**Answer: C**

Explanation:

To prevent extensions from modifying the internal homepage, the administrator should add `\*.acme.com` to the "Runtime blocked hosts" list. The wildcard `\*` ensures that any attempt to access or modify this domain by an extension will be blocked at runtime. Additionally, to disable access to storage and history, the administrator needs to explicitly disable the "Storage" and "History" permissions within the extension management settings. Therefore, the correct combination is to block the host and disable the permissions.

#### NEW QUESTION # 48

Chrome Browser Cloud Management has been successfully implemented at a company for the past year.

Recently, the engineering team has received feedback from the security team that Chrome browsers are not meeting patching Service Level Agreements (SLAs). In the Insight report, the engineering team sees that 30% of their companies' browsers are pending updates.

Which browser policy could the engineering team implement to ensure better compliance with the security team's patching requirement?

- A. Relaunch notification
- B. Google updater policy precedence
- C. Chrome browser updates
- D. Auto-update check period

**Answer: D**

Explanation:

To ensure timely patching, the engineering team should adjust the "Auto-update check period" policy. By shortening this period, Chrome browsers will check for updates more frequently, increasing the likelihood of applying security patches sooner and improving compliance with patching SLAs. "Chrome browser updates" is a general category, "Relaunch notification" affects when users are prompted to restart, and "Google updater policy precedence" deals with the order of policy application, not the frequency of checks.

#### NEW QUESTION # 49

What policy and value provides the most protection against malicious websites?

- A. Enable site isolation for all websites
- **B. Set the Safe Browsing policy to Enhanced mode**
- C. Allow the user ability to bypass Safe Browsing warnings
- D. Set the site isolation policy to be required for all websites

**Answer: B**

Explanation:

Setting the **\*\*Safe Browsing policy to Enhanced mode\*\*** provides the most direct and comprehensive protection against malicious websites by leveraging Google's real-time threat intelligence. Allowing users to bypass warnings (option A) defeats the purpose of Safe Browsing. While site isolation (options C and D) protects against cross-site data leakage, it doesn't directly prevent users from accessing malicious sites in the first place. Enhanced Safe Browsing actively warns and blocks access to dangerous websites.

#### NEW QUESTION # 50

.....

Prep4away's Google exam practice test content is tested and approved by the best industry experts and is constantly updated to meet the requirements of the actual Chrome-Enterprise-Administrator exam questions. Prep4away reputation is established particularly with an outstanding success rate of 99.1%.
