There is a fabulous product to prompt the efficiency--the Plat-Arch-201 exam prep, as far as concerned, it can bring you high quality learning platform to pass the variety of exams.

Salesforce Certified Platform Data Architect Sample Questions (Q261-Q266):

NEW QUESTION # 261

Universal Containers is integrating a new Opportunity engagement system with Salesforce.

According to their Master Data Management strategy, Salesforce is the system of record for Account, Contact, and Opportunity data. However, there does seem to be valuable Opportunity data in the new system that potentially conflicts with what is stored in Salesforce. What is the recommended course of action to appropriately integrate this new system?

- A. The Opportunity engagement system should become the system of record for Opportunity records.
- **B. Stakeholders should be brought together to discuss the appropriate data strategy moving forward.**
- C. The MDM strategy defines Salesforce as the system of record, so Salesforce Opportunity values prevail in all conflicts.
- D. A policy should be adopted so that the system whose record was most recently updated should prevail in conflicts.

Answer: B

Explanation:

The recommended course of action to appropriately integrate the new Opportunity engagement system with Salesforce is to bring the stakeholders together to discuss the appropriate data strategy moving forward. This is because there may be valuable data in both systems that need to be reconciled and harmonized, and the Master Data Management (MDM) strategy may need to be revised or updated to accommodate the new system. The other options are not recommended, as they may result in data loss, inconsistency, or duplication.

NEW QUESTION # 262

Universal Containers (UC) has an Application custom object, which has tens of millions of records created in the past 5 years. UC needs the last 5 years of data to exist in Salesforce at all times for reporting and queries. UC is currently encountering performance issues when reporting and running queries on this Object using date ranges as filters. Which two options can be used to improve report performance?

- A. Run multiple reports to get different pieces of the data and combine them.
- B. Add custom indexes to all fields on Application without a standard index.
- **C. Add custom indexes to the Date fields used for filtering the report.**
- **D. Ask support to create a skinny table for Application with the necessary reporting fields.**

Answer: C,D

Explanation:

Ask support to create a skinny table for Application with the necessary reporting fields. This is an option that can improve report performance by creating a custom table that contains frequently used fields and copies their values from standard or custom objects. Skinny tables are kept in sync with their source tables and are used in place of them for reports and queries. Add custom indexes to the Date fields used for filtering the report. This is another option that can improve report performance by creating custom indexes on fields that are often used as filters or join conditions in reports and queries. Custom indexes can speed up data retrieval and reduce query execution time

NEW QUESTION # 263

What is the purpose of Shield Platform Encryption?

- A. Improve performance
- B. Deduplicate records
- **C. Encrypt data at rest**
- D. Backup data

Answer: C

Explanation:

It protects sensitive data for compliance.

NEW QUESTION # 264

An Architect needs to document the data architecture for a multi-system, enterprise Salesforce implementation. Which two key artifacts should the Architect use? (Choose two.)

- **A. Data model**
- **B. Integration specification**
- C. User stories
- D. Non-functional requirements

Answer: A,B

Explanation:

Option B is correct because data model is a key artifact that an architect should use to document the data architecture for a multi-system, enterprise Salesforce implementation. Data model describes the structure and relationship of data entities within an organization. Option C is correct because integration specification is another key artifact that an architect should use to document the data architecture for a multi-system, enterprise Salesforce implementation. Integration specification defines the scope, requirements, design, testing, and deployment of integration solutions between Salesforce and other systems.

NEW QUESTION # 265

An architect is planning on having different batches to load one million Opportunities into Salesforce using the Bulk API in parallel mode. What should be considered when loading the Opportunity records?

- A. Group batches by the AccountId field.
- B. Create indexes on Opportunity object text fields.
- C. Order batches by Auto -number field.
- D. Sort batches by Name field values.

Answer: C

Explanation:

Ordering batches by Auto-number field will ensure that the records are processed in a sequential order and avoid any locking issues that might occur when loading related records in parallel mode. Creating indexes, grouping batches by AccountId, or sorting batches by Name field values are not necessary or beneficial for loading Opportunity records using the Bulk API.

NEW QUESTION # 266

.....

In this age of advanced network, there are many ways to prepare Salesforce Plat-Arch-201 certification exam. PrepAwayETE provides the most reliable training questions and answers to help you pass Salesforce Plat-Arch-201 Certification Exam. PrepAwayETE have a variety of Salesforce certification exam questions, we will meet you all about IT certification.

Reliable Plat-Arch-201 Exam Practice: <https://www.prepawayete.com/Salesforce/Plat-Arch-201-practice-exam-dumps.html>

Every person wants to get success in the Plat-Arch-201 exam in the just first attempt but mostly not been able to get success in it due to poor selection of their Plat-Arch-201 training material, Plat-Arch-201: Salesforce Certified Platform Data Architect exam cram sheet is a new study method, There are many of their products are still in budding level, but we have won great reputation after the development of years for our Plat-Arch-201 study guide: Salesforce Certified Platform Data Architect, The high passing rate of our Plat-Arch-201 reliable dumps is rapidly obtaining by so many candidates, as well as our company is growing larger and larger.

On a specific row, you can use the `Cursor` Plat-Arch-201 to extract the data for a given column in the query results, You should always read as much as you can about your destination Reliable Plat-Arch-201 Exam Practice to determine what extra supplies you might need to take to protect your health.
