

# Fortinet High Pass-Rate Valid FCSS\_NST\_SE-7.4 Exam Materials—Pass FCSS\_NST\_SE-7.4 First Attempt

DOWNLOAD the newest DumpsFree FCSS\_NST\_SE-7.4 PDF dumps from Cloud Storage for free:  
<https://drive.google.com/open?id=1whKkfxZRG9Jnp3rZWjZQuHWXfOC1q>

The bundle has an Fortinet FCSS\_NST\_SE-7.4 exam questions and answers, desktop practice software, and web-based software. All the preparation products have been designed carefully with advice from hundreds of professional Fortinet certified experts. This Fortinet FCSS\_NST\_SE-7.4 exam questions preparation material has everything to achieve success in the FCSS - Network Security 7.4 Support Engineer exam on the first attempt. The unique features of DumpsFree FCSS\_NST\_SE-7.4 Preparation products have been noted. The FCSS\_NST\_SE-7.4 pdf exam questions by DumpsFree have the most realistic Fortinet FCSS\_NST\_SE-7.4 exam questions. This FCSS\_NST\_SE-7.4 pdf covers all the FCSS\_NST\_SE-7.4 Exam Questions from the previous exam as well as the upcoming FCSS - Network Security 7.4 Support Engineer exam. You don't need to consult different books for the Fortinet certification exam with the DumpsFree.

## Fortinet FCSS\_NST\_SE-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Authentication: This section evaluates the proficiency of Fortinet network and security professionals in resolving both local and remote authentication issues.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• VPN: This section tests the knowledge of IT professionals, such as system engineers in diagnosing and resolving VPN-related issues. It emphasizes troubleshooting IPsec IKE versions 1 and 2 to ensure secure and reliable communication between networks or remote users.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Security Profiles: This segment of the exam tests the skills of IT professionals, such as network administrators in handling and troubleshooting security profile-related challenges.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>System Troubleshooting:</b> This part of the exam assesses the ability of Fortinet network and security professionals to diagnose and fix typical system-related problems within Fortinet solutions. It involves troubleshooting FortiGate-to-FortiGate Security Fabric issues, addressing automation stitch concerns, and detecting resource-related problems using integrated tools.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Routing:</b> This part of the exam examines the expertise of Fortinet network and security professionals, in routing enterprise traffic effectively.</li> </ul>

## FCSS\_NST\_SE-7.4 Sample Test Online & Valid Braindumps FCSS\_NST\_SE-7.4 Book

With all these features, another plus is the easy availability of DumpsFree's products. They are instantly downloadable and supported with our online customers service to answer your queries promptly. Your preparation for exam FCSS\_NST\_SE-7.4 with DumpsFree will surely be worth-remembering experience for you!

### Fortinet FCSS - Network Security 7.4 Support Engineer Sample Questions (Q66-Q71):

#### NEW QUESTION # 66

When investigating FortiGuard connectivity issues, which action is a valid troubleshooting step?

- A. Use the FortiGuard real-time debug command to verify rating requests.
- B. Verify that DNS requests are being proxied if auto-update tunneling is enabled.
- C. Configure a virtual IP to forward port 443 to the FortiGate external IP.
- **D. Verify management VDOM internet access.**

**Answer: D**

#### NEW QUESTION # 67

Refer to the exhibits. An administrator is expecting to receive advertised route 8.8.8.8/32 from FGT-A. On FGT-B, they confirm that the route is being advertised and received, however, the route is not being injected into the routing table. What is the most likely cause of this issue?

```
FGT-B # get router info routing-table all
Routing table for VRF=0
S*  0.0.0.0/0 [10/0] via 192.168.1.1, port1, [1/0]
C   10.23.23.0/24 is directly connected, port4
```

```
FGT-B # get router info ospf database area 0
...
AS External Link States
Link ID      ADV Router   Age  Seq#       CkSum  Flag Route      Tag
8.8.8.8      0.0.0.112    1464 80000002  3106   0002 E2 8.8.8.8/32    0
```

- **A. FGT-B is configured with a prefix list denying the 8.8.8.8/32 network to be injected into the routing table.**
- B. A better route to the 8.8.8.8/32 network exists in the routing table.
- C. FGT-B is configured with a distribution list denying the 8.8.8.8/32 network to be injected into the routing table.
- D. The administrator has misconfigured redistribution of routes on FGT-A.

**Answer: A**

#### NEW QUESTION # 68

Refer to the exhibit, which shows the output of the BGP database.

```
router info bgp network
0 BGP table version is 3, local router ID is 1.1.1.1
Codes: s suppressed, d damped, h history, * valid, best, i - internal,
      S Stale
Origin codes: i - IGP, e - EGP, ? - incomplete

Network      Next Hop      Metric      LocPrf  Weight  RouteTag  Path
0.0.0.0/0    100.64.2.254    0           100      0        0 ? <-/->
             100.64.2.1      0           32768    0 ? <-/1>
1.2.2.1/32   100.64.2.1      0           32768    0 ? <-/1>
8.8.8.8/32   100.64.2.254    0           100      0        0 ? <-/1>
10.20.30.0/24 172.16.54.115  0           100      0        0 i <-/1>

Total number of prefixes 4
```

Which two statements are correct? (Choose two.)

- A. The advertised prefix of 10.20.30.0/24 is being advertised through the redistribution of another routing protocol.
- **B. The output shows all prefixes advertised by all neighbors as well as the local router.**
- **C. The advertised prefix of 10.20.30.0/24 was configured using the network command.**
- D. The first four prefixes are being advertised using a legacy route advertisement.

**Answer: B,C**

#### NEW QUESTION # 69

Refer to the exhibit, which shows the partial output of diagnose hardware sysinfo memory.

```
Fortinet
# diagnose hardware sysinfo memory
MemTotal:      2055916 kB
MemFree:       708880 kB
Buffers:       22140 kB
Cached:        641364 kB
SwapCached:    0 kB
Active:        726352 kB
Inactive:      98908 kB
```

An administrator is troubleshooting a high memory issue.

Which two memory allocations can help the administrator pinpoint the issue? (Choose two.)

- **A. The unused cache page, which is represented by the value indicated next to the Inactive heading.**
- **B. The I/O cache, which has 641364 kB of memory allocated to it.**
- C. The 98908 kB of memory that will never be used.
- D. The user space, which has 708880 kB of physical memory that is not used by the system.

**Answer: A,B**

Explanation:

The I/O cache ("Cached"): At 641 364 kB this shows how much memory is tied up in filesystem page caching, and is immediately reclaimable under pressure.

The unused cache pages ("Inactive"): The Inactive figure (98 908 kB) represents pages that were cached but haven't been used recently - another pool of memory the OS can free when needed.

#### NEW QUESTION # 70

Refer to the exhibit, which shows the partial output of FortiOS kernel slabs.
