Die seit kurzem aktuellsten CrowdStrike CCFH-202b Prüfungsunterlagen, 100% Garantie für Ihen Erfolg in der Prüfungen!

Es gibt viele Methoden, die Ihnen beim Bestehen der CrowdStrike CCFH-202b Zertifizierungsprüfung helfen. Eine geeignete Methode zu wählen bedeutet auch eine gute Garantie. Zertpruefung bietet Ihnen gute CrowdStrike CCFH-202b Trainingsinstrumente und Schulungsunterlagen von guter Qualität. Die CrowdStrike CCFH-202b Prügungsfragen und Antworten von Zertpruefung werden nach dem Lernprogramm bearbeitet. So sind sie von guter Qualität und besitzt zugleich eine hohe Autorität. Sie werden Ihnen helfen, die Prüfung sicher zu bestehen. Zertpruefung wird auch die Prüfungsmaterialien zur CrowdStrike CCFH-202b Zertifizierungsprüfung ständig aktualisieren, um Ihre Bedürfnisse abzudecken.

CrowdStrike Certified Falcon Hunter CCFH-202b Prüfungsfragen mit

Lösungen (Q55-Q60):

55. Frage

Adversaries commonly execute discovery commands such as net.exe, ipconfig.exe, and whoami.exe. Rather than query for each of these commands individually, you would like to use a single query with all of them. What Splunk operator is needed to complete the following query?

- A. OR
- B. IN
- C. NOT
- D. AND

Antwort: A

Begründung:

The OR operator is needed to complete the following query, as it allows to search for events that match any of the specified values. The query would look like this:

event_simpleName=ProcessRollup2 FileName=net.exe OR FileName=ipconfig.exe OR FileName=whoami.exe The OR operator is used to combine multiple search terms or expressions and return events that match at least one of them. The IN, NOT, and AND operators are not suitable for this query, as they have different functions and meanings.

56. Frage

How do you rename fields while using transforming commands such as table, chart, and stats?

- A. By specifying the desired name after the field name eg "stats count totalcount by ComputerName"
- B. By renaming the fields with the "rename" command after the transforming command e.g. "stats count by ComputerName | rename count AS total_count"
- C. By using the "renamed" keyword after the field name eg "stats count renamed totalcount by ComputerName"
- D. You cannot rename fields as it would affect sub-queries and statistical analysis

Antwort: B

Begründung:

The rename command is used to rename fields while using transforming commands such as table, chart, and stats. It can be used after the transforming command and specify the old and new field names with the AS keyword. You can rename fields as it would not affect sub-queries and statistical analysis, as long as you use the correct field names in your queries. The renamed keyword and the desired name after the field name are not valid ways to rename fields.

57. Frage

What information is provided from the MITRE ATT&CK framework in a detection's Execution Details?

- A. Technique ID
- B. Triggering Indicator
- C. Grouping Tag
- D. Command Line

Antwort: A

Begründung:

Technique ID is the information that is provided from the MITRE ATT&CK framework in a detection's Execution Details.

Technique ID is a unique identifier for each technique in the MITRE ATT&CK framework, such as T1059 for Command and Scripting Interpreter or T1566 for Phishing. Technique ID helps to map a detection to a specific adversary behavior and tactic.

Grouping Tag, Command Line, and Triggering Indicator are not information that is provided from the MITRE ATT&CK framework in a detection's Execution Details.

58. Frage

With Custom Alerts you are able to configure email alerts using predefined templates so you're notified about specific activity in your

environment. Which of the following outlines the steps required to properly create a custom alert rule?

- **A. Choose the template you would like to configure, preview the search results, and then schedule the alert**
- B. Create a new custom template, configure the email template, and then create the custom query for the alert
- C. Choose the template you would like to configure, setup how often you would like the alert to run, and then schedule the alert
- D. Create the query for the alert, setup the email template for the alert, and then set the schedule for the alert

Antwort: A

Begründung:

These are the steps required to properly create a custom alert rule. Custom Alerts are a feature that allows you to configure email alerts using predefined templates so you're notified about specific activity in your environment. You can choose from various templates that cover different use cases, such as suspicious PowerShell activity, network connections to risky countries, etc. You can also preview the search results of the template before scheduling the alert. You do not need to create the query for the alert, setup the email template for the alert, or create a new custom template, as these are already provided by the predefined templates.

59. Frage

When performing a raw event search via the Events search page, what are Event Actions?

- **A. Event Actions are pivotable workflows including connecting to a host, pre-made event searches and pivots to other investigatory pages such as host search**
- B. Event Actions contains an audit information log of actions an analyst took in regards to a specific detection
- C. Event Actions is the field name that contains the event name defined in the Events Data Dictionary such as ProcessRollup, SyntheticProcessRollup, DNS request, etc
- D. Event Actions contains the summary of actions taken by the Falcon sensor such as quarantining a file, prevent a process from executing or taking no actions and creating a detection only

Antwort: A

Begründung:

When performing a raw event search via the Events search page, Event Actions are pivotable workflows that allow you to perform various tasks related to the event or the host. For example, you can connect to a host using Real Time Response, run pre-made event searches based on the event type or name, or pivot to other investigatory pages such as host search, hash search, etc. Event Actions do not contain audit information log, summary of actions taken by the Falcon sensor, or the event name defined in the Events Data Dictionary.

60. Frage

.....

Das Expertenteam von Zertpruefung hat neulich das effiziente kurzfristige Schulungsprogramm zur CrowdStrike CCFH-202b Zertifizierungsprüfung entwickelt. Die Kandidaten sollen an dem 20-stündigen Kurs teilnehmen, dann können sie neue Kenntnisse beherrschen und ihre ursprüngliches Wissen konsolidieren und auch die CrowdStrike CCFH-202b Zertifizierungsprüfung leichter als diejenigen, die viel Zeit und Energie auf die Prüfung verwendet, bestehen.
