Consequently, with the help of our Chrome-Enterprise-Administrator Study Materials, you can be confident that you will pass the Chrome-Enterprise-Administrator exam and get the related certification as easy as rolling off a log. So what are you waiting for? Just take immediate actions!

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

An administrator decides to shorten the default time that a browser may be inactive before automatic deletion from the Google

Admin console What policy must be selected for the Device Token Management policy to allow devices to re-enroll in the Google Admin console?

- A. Renew Token
- B. Delete Token
- C. Revoke Token
- D. Invalidate Token

Answer: A

Explanation:

When managing inactive device tokens, the "Renew Token" option is crucial for allowing devices to re-enroll after a period of inactivity. If the token is revoked, invalidated, or deleted, the device will likely require a manual re-enrollment process. Renewing the token provides a mechanism for the device to check back in and remain managed.

NEW QUESTION # 17

A company uses Chrome Enterprise Core to manage Chrome browsers for its employees and contractors who share devices They need a way to ensure the following:

- * Full-Time Employees (FTEs) can only see and use extensions assigned to them
- * Contractors can only see and use extensions assigned to them
- * Both FTEs and contractors have access to a set of shared extensions

How can the Chrome administrator configure Chrome Enterprise Core to achieve this'?

- A. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Create a separate group in the Google Admin Console for FTEs. Assign extensions to the group based on their needs
- B. Ask users to install all the extensions they need on the shared device
- C. Create separate groups in the Google Admin Console for FTEs and Contractors. Assign extensions to respective groups based on their needs
- D. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Use Group Policy Objects to assign specific extensions by user group

Answer: A

Explanation:

The most effective way to manage extensions in this scenario is to use a combination of OUs and groups.

Create an OU for the shared devices and force-install the shared extensions at this OU level. Then, create separate user groups for FTEs and Contractors in the Google Admin console and force-install their specific extensions to these groups. User group policies have a higher precedence than OU policies, ensuring the correct extensions are available to each user type when they sign in to the shared devices. Option A mentions Group Policy Objects, which are for Windows environments and less relevant in a cloud-managed scenario across potentially different OSes. Option B doesn't address the shared device aspect effectively. Option C is not a managed approach.

NEW QUESTION # 18

An IT administrator manages a large organization that uses Chrome browser across multiple platforms including Windows, macOS, and Linux The organization has diverse user needs and varying levels of risk associated with different departments, for which the administrator must determine the most efficient method to manage Chrome updates across the organization Why is it advantageous to manage Chrome update policies using the Google Admin console instead of the Group Policy Management Console (GPMC)?

- A. Group Policy does not support platforms other than Windows
- B. Group Policy does not support Chrome update policies
- C. The Google Admin console is only applicable to devices with ChromeOS, making it more secure
- D. The Google Admin console does not allow administrators to view the browser version of any given managed device as Group Policy does

Answer: A

Explanation:

The key advantage of using the Google Admin console for managing Chrome updates in a multi-platform environment is its ability to apply policies consistently across Windows, macOS, and Linux devices. Group Policy (GPMC) is a Windows-specific tool and

cannot natively manage Chrome updates on other operating systems. The Google Admin console provides a centralized and platform-agnostic approach to Chrome management.

NEW QUESTION # 19

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----

```
ExtensionInstallAllowlist | [ "lpbdmphcndhhacbfcbdmnoffaepiici",  
"gihagpmigkmndpbjkmolikibogefcm", "enebfjnlbicamdnfnhlaapuedmgkj",  
"hpkimhnadcdidjaejaegpeeiklochd", "bnpdllbeanipnjdcnkniakhniegbcobanno" ] ExtensionInstallBlocklist | [ ]  
ExtensionInstallForceList | [ "gihagpmigkmndpbjkmolikibogefcm;[https://clients2.google.com/service  
/update2/crx](https://clients2.google.com/service/update2/crx)", "ufninibicajhgibfhjcgimlmdhccodff;  
[https://clients2.google.com/service/update2/crx](https://clients2.google.com/service/update2/crx)",  
"hpkimhnadcdidjaejaegpeeiklochd;[https://clients2.google.com/service/update2/crx](https://clients2.google.  
com/service/update2/crx)" ]
```

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID `ufninibicajhgibfhjcgimlmdhccodff`. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. The "Add to Chrome" button will be available to click, and the user can install the extension.
- B. The "Remove from Chrome" button will be available because the extension is already installed.
- C. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.
- D. A red banner that says "Your administrator has blocked this item (ID ufninibicajhgibfhjcgimlmdhccodff)" will appear, and the "Add to Chrome" button will be grayed out.

Answer: C

Explanation:

The extension ID `ufninibicajhgibfhjcgimlmdhccodff` is present in the `ExtensionInstallForceList`.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the "Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

NEW QUESTION # 20

Where can information about all of the profiles associated with a browser be found?

- A. Chrome log events
- B. Managed browsers detail
- C. Managed devices
- D. Chrome Insights report

Answer: B

Explanation:

The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions.

The "Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

NEW QUESTION # 21

.....

So rest assured that with the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) practice questions you will not only make the entire Chrome-Enterprise-Administrator exam dumps preparation process and enable

you to perform well in the final Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) certification exam with good scores.
