Explanation:
Step-by-Step Solution
1. CPO (Chief Procurement Officer)
Main Challenge: Procurement, supplier optimization, risk management.
Best Solution:
* Use AI-driven supplier insights to optimize supplier selection and manage procurement risks Reason:
CPOs focus on procurement efficiency, supplier management, and risk minimization. AI insights help select the best suppliers and mitigate procurement risks.
2. CIO (Chief Information Officer)
Main Challenge: IT modernization, technology innovation, and system integration.
Best Solution:
* Deliver IT modernization and AI-powered innovation with the SAP Business Suite Reason:
CIOs drive IT modernization and innovation. SAP Business Suite with AI powers digital transformation and future-ready IT infrastructure.
3. CHRO (Chief Human Resources Officer)
Main Challenge: Workforce planning, employee development, HR efficiency.
Best Solution:
* Utilize AI-infused workforce planning to identify gaps, upskill employees, and enhance HR interactions Reason:
CHROs want to optimize workforce management, fill talent gaps, and make HR processes smarter using AI.
4. COO (Chief Operating Officer)
Main Challenge: Operational efficiency, supply chain management, minimizing disruptions.
Best Solution:
* Harness AI-powered analytics to predict and respond to supply chain disruptions in real-time Reason:
COOs focus on ensuring smooth operations and a resilient supply chain; AI analytics help predict and manage disruptions.
5. CRO (Chief Revenue Officer)
Main Challenge: Customer experience, sales opportunities, revenue growth.
Best Solution:
* Apply AI-enabled personalization to customer interactions and predict sales opportunities Reason:
CROs are responsible for boosting revenue, improving customer relationships, and finding new sales opportunities through personalized experiences.
6. CFO (Chief Financial Officer)
Main Challenge: Financial forecasting, balancing growth with profitability.
Best Solution:
* Leverage AI-powered financial forecasting to enhance planning and balance growth with profitability Reason:
CFOs need accurate forecasting and strategic planning to maintain profitability and support sustainable growth.

質問 # 24
A multinational company is struggling with fragmented data across different departments, leading to inefficiencies in finance, procurement, and supply chain operations. They need an SAP solution that integrates these business processes into a unified system with real-time data access. Which SAP solutions should they implement? There are 3 correct answers to this question.

- A. SAP BusinessObjects
- B. SAP S/4HANA
- C. SAP SuccessFactors
- D. SAP ERP
- E. SAP Ariba

正解：A、B、D

質問 # 25
Which solution enables advanced AI and machine learning models on combined SAP and third-party data?

- A. SAP Datasphere
- B. SAP Analytics Cloud
- C. SAP AI Launchpad
- D. SAP Databricks

正解：**D**

解説：
The question asks which solution within the SAP ecosystem enables advanced AI and machine learning (ML) models using both SAP and third-party data. The correct answer is SAP Databricks, as it is specifically designed to provide advanced data engineering, AI, and ML capabilities within the SAP Business Data Cloud platform, seamlessly integrating SAP and non-SAP data. According to official SAP documentation, SAP Business Data Cloud is a Software-as-a-Service (SaaS) solution that integrates key components such as SAP Datasphere, SAP Analytics Cloud, SAP Business Warehouse (BW), and SAP Databricks. Among these, SAP Databricks is the component tailored for advanced AI and ML workloads, enabling data scientists to develop and execute algorithms and models on combined SAP and third- party data without the need for data replication.
The exact extract from the Positioning SAP Business Data Cloud lesson on learning.sap.com states:
"SAP Databricks is a data intelligence platform that provides advanced data engineering capabilities, including artificial intelligence (AI) and machine learning (ML). SAP Databricks is used by the data scientist who needs a powerful set of tools to develop algorithms and models from data. ... To enable advanced AI/ML scenarios within SAP Business Data Cloud, SAP has embedded Databricks as a service. The name of the embedded version of Databricks is SAP Databricks." learning.sap.com This extract confirms that SAP Databricks is the component responsible for advanced AI and ML capabilities.
It integrates natively with SAP Business Data Cloud through the Delta Sharing protocol, allowing secure, bidirectional data access without physically copying data between systems. This enables data teams to blend SAP data with external data sources for AI and ML use cases, as further supported by:
"SAP Databricks integrates natively with SAP Business Data Cloud through Delta Sharing, enabling secure, bidirectional data access without physically copying data between systems. This shared foundation allows data teams to: Blend SAP data with external data: Data teams can blend their SAP data with data from other applications, databases, and object storage systems." databricks.com In contrast, the other options do not primarily focus on advanced AI and ML model development:
* SAP AI Launchpad: This is a tool for managing and deploying AI models across SAP solutions but is not the primary platform for developing advanced AI/ML models on combined SAP and third-party data. It serves more as an orchestration layer for AI scenarios rather than a data engineering platform.
* SAP Analytics Cloud: This component focuses on analytics, reporting, dashboards, and enterprise planning. While it supports some AI-driven insights (e.g., through the Joule copilot), it is not designed for building advanced AI/ML models. The documentation states:
"SAP Analytics Cloud delivers enterprise analytics, reporting, dashboards, and unified planning." learning.sap. com
* SAP Datasphere: This component provides data integration, federation, and semantic modeling, forming the foundation for data products in SAP Business Data Cloud. It supports analytics and can be extended with AI/ML, but it is not the primary tool for advanced AI/ML model development. The documentation notes:
"At the heart of SAP Business Data Cloud is SAP Datasphere, which provides the foundational structures that define the data model on top of the data products. ... scenarios with custom data models that can be manually extended with machine learning or AI." learning.sap.com The integration of SAP Databricks with SAP Business Data Cloud is further emphasized as a key innovation for AI-driven use cases, particularly for handling both structured and unstructured data from SAP and non-SAP sources. For example:
"The integration with Databricks enables advanced Artificial Intelligence (AI) and Machine Learning (ML) models, leveraging both SAP and third-party data." learning.sap.com This partnership with Databricks, a market leader in AI and ML, ensures that SAP Databricks provides robust tools for data scientists to work with harmonized data, making it the definitive solution for the question's requirements.
