DEP-2025 Question Explanations - DEP-2025 Valid Exam Pass4sure

Our DEP-2025 learning materials can help you dream come true. A surprising percentage of exam candidates are competing for the certificate of the DEP-2025 exam in recent years. Each man is the architect of his own fate. So you need speed up your pace with the help of our DEP-2025 Guide prep which owns the high pass rate as 98% to 100% to give you success guarantee and considered the most effective DEP-2025 exam braindumps in the market.

Apple Deployment and Management Exam Sample Questions (Q249-Q254):

NEW QUESTION # 249

Which Wi-Fi standard helps devices join Wi-Fi networks and roam more quickly and effectively between access points?

- A. 802.11r
- B. 802.11ad
- C. FastLane
- D. 802.11q

Answer: A

Explanation:

802.11r enhances roaming. The Apple Platform Deployment Guide states, "802.11r, or Fast BSS Transition, improves Wi-Fi performance by enabling faster roaming between access points, reducing authentication overhead." Option C is a QoS feature, not a standard, and A and D are unrelated.

Reference:

Apple Platform Deployment Guide, "Wi-Fi Standards" section.
macOS Deployment Reference, "Network Optimization" section.

NEW QUESTION # 250

What file downloaded from MDM must be uploaded to Apple Business Manager to generate a server token?

- A. Private key
- B. MDM Intermediate Certificate
- C. Public key
- D. Content token

Answer: C

Explanation:

The public key generates the server token. The Apple Business Manager User Guide states, "To generate a server token for ADE, download the public key from your MDM solution and upload it to Apple Business Manager." Option C is never shared, and B and D serve different purposes.

Reference:

Apple Business Manager User Guide, "Set Up ADE" section.
Mobile Device Management Protocol Reference, "ADE Configuration" section.

NEW QUESTION # 251

What does MDM need to operate, specifically for APNs and SSL?

- A. Certificates
- B. Restrictions
- C. Enrollment profiles

Answer: A

Explanation:

For an MDM solution to operate effectively, it relies on certificates, particularly for secure communication with Apple Push Notification service (APNs) and for establishing encrypted connections via SSL/TLS. An APNs certificate is required to authenticate the MDM server with Apple's APNs infrastructure, enabling it to send push notifications to managed devices. Additionally, an SSL certificate secures the communication channel between the MDM server and the devices, ensuring data privacy and integrity. Restrictions (option B) are policies enforced by MDM but are not prerequisites for its operation. Enrollment profiles (option C) are necessary to link devices to MDM, as discussed in Question 1, but they do not specifically address the APNs and SSL requirements. Apple's documentation, such as the MDM Protocol Reference, explicitly states that certificates are essential for APNs and SSL functionality in MDM deployments.

Reference: MDM Protocol Reference (Section: Certificates and Authentication).

NEW QUESTION # 252

A user enrolled their personal iPhone in your organization's MDM solution. Which of these management capabilities does your organization's MDM solution have on the user's iPhone?

- A. Remotely wipe the device
- B. Access device location
- C. Enable Activation Lock
- **D. Install and configure apps**

Answer: D

Explanation:

User Enrollment limits MDM capabilities. The iOS Deployment Reference states, "With User Enrollment, MDM can install and configure apps, manage accounts, and apply restrictions to managed data, but it cannot access location, wipe the device, or enable Activation Lock." References:

iOS Deployment Reference, "User Enrollment" section.

Apple Platform Deployment Guide, "BYOD Management" section.

NEW QUESTION # 253

Which macOS tool allows IT administrators to create configuration profiles?

- A. System Preferences
- B. Terminal
- **C. Profile Manager**
- D. Apple Configurator

Answer: C

Explanation:

Profile Manager, part of macOS Server (now integrated into macOS as a standalone service), is a tool that allows IT administrators to create, edit, and distribute configuration profiles for macOS, iOS, and iPadOS devices. These profiles define settings and restrictions that can be deployed via MDM or manually. Apple Configurator (option A) is primarily for iOS/iPadOS/tvOS device supervision and configuration, not profile creation for macOS. System Preferences (option C) is a user-facing settings app, not a profile creation tool. Terminal (option D) can be used for scripting but isn't designed for profile creation. The Apple Platform Deployment Guide identifies Profile Manager as the macOS tool for this purpose.

NEW QUESTION # 254

.....

Our website is here to provide you with the accurate DEP-2025 real dumps in PDF and test engine mode. Using our latest DEP-2025 training materials is the only fast way to clear the actual test because our test answers are approved by our experts. The content of our DEP-2025 Braindumps Torrent is easy to understand that adapted to any level of candidates. It just needs few hours to your success.
