ISACA Certified Information Security Manager Sample Questions (Q1037-Q1042):

NEW QUESTION # 1037

An information security manager has discovered that a business unit is planning on implementing a new application and has not engaged anyone from the information security department. Which of the following is the BEST course of action?

- A. Review and update the change management process.
- **B. Discuss the issue with senior leadership.**
- C. Recommend involvement with the change manager.
- D. Block the application from going into production.

Answer: B

NEW QUESTION # 1038

Which of the following should be the PRIMARY objective when establishing a new information security program?

- **A. Executing the security strategy**
- B. Optimizing resources
- C. Facilitating operational security
- D. Minimizing organizational risk

Answer: A

Explanation:

According to the CISM Review Manual, the primary objective when establishing a new information security program is to execute the security strategy that has been defined and approved by the senior management. The security strategy provides the direction, scope, and goals for the information security program, and aligns with the business objectives and requirements. Minimizing organizational risk, optimizing resources, and facilitating operational security are possible outcomes or benefits of the information security program, but they are not the primary objective.

Reference = CISM Review Manual, 27th Edition, Chapter 3, Section 3.1.1, page 1151.
