3V0-32.23 real test engine & 3V0-32.23 exam training vce & 3V0-32.23 practice torrent

Achieving the Cloud Management and Automation Advanced Design (3V0-32.23) certification can significantly impact your career progression and earning potential. This certification showcases your expertise and knowledge to employers, making you a valuable asset in the VMware 3V0-32.23 industry. With the rapidly evolving nature of the VMware world, staying up-to-date with the latest technologies and trends is crucial. The 3V0-32.23 Certification Exam enables you to learn these changes and ensures you remain current in your field.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q167-Q172):

NEW QUESTION # 167
Identify the example that best represents a technical requirement rather than a business requirement.

- A. "The platform should target users in the age group of 18-35."
- B. "The system should be accessible on both desktop and mobile devices."

- C. "The software should increase customer engagement by 20%."
- D. "The application must support 1000 concurrent users."

Answer: D

NEW QUESTION # 168

A company is planning the Aria Automation design as part of the logical design for a cloud management solution project. There are design requirements that VMware Aria Automation be deployed on-prem in a VMware Cloud Foundation environment, and also support high availability.
Which design decision supports the requirements?

- A. Ensure that the nodes of a VMware Aria Automation cluster are included within a vSphere Distributed Resource Scheduler (DRS) anti-affinity rule so that each node is located on a different host.
- B. Place the VMware Aria Automation cluster nodes on the cross-instance NSX network segment.
- C. Deploy VMware Aria Automation as a cluster of three nodes with an embedded load balancer in the default management vSphere cluster.
- D. Deploy the VMware Aria Automation cluster nodes as medium-size or larger appliances.

Answer: C

Explanation:
A three-node cluster with a load balancer provides the required high availability for an on-prem VMware Aria Automation deployment in a VMware Cloud Foundation environment.

NEW QUESTION # 169

Which three privileges are assigned to a fabric administrator in a vRealize Automation solution?
(Choose three.)

- A. manage property groups and machine prefixes and the property dictionary that are used across all tenants and business groups
- B. create and manage the reservations and policies associated with the physical resources for their fabric group
- C. create reservations for any tenant that uses their fabric group
- D. manage physical machines and compute resources assigned to the fabric group
- E. define cost profiles for compute resources of their fabric group

Answer: A,B,E

NEW QUESTION # 170

An administrator maintains multiple tenants on a vRealize Automation environment. Consumers of Tenant B have requested to modify their current tenant architecture from the default to incorporate their own mail servers so that their user base can respond to notifications for completing work items and approvals. Consumers of Tenant A insist that no change be made to their current mail settings.
Which design changes are required to the architecture to meet the requirements for both tenants?

- A. Log in to Tenant B as a tenant administrator and under the Administration tab, select each mail server and click Override Global, then configure the requested new mail servers.
- B. Log in to the default tenant as administrator and under the Administration tab, select Tenant B, then add and configure the requested new mail servers for the tenant.
- C. Log in to the default tenant as administrator and under the Administration tab, select Email Servers, then add and configure the additional new mail servers.
- D. Log in to Tenant B as an IaaS administrator and grant approval administrator privileges to the required user base of the tenant.

Answer: A

NEW QUESTION # 171

A company is currently reviewing all of its security roles and permissions due to an upcoming compliance audit. They must identify tenant-specific and system-wide roles.

Which option includes ONLY tenant-specific roles?

- A. Tenant administrator, Services architect, IaaS administrator, Approval administrator
- B. Tenant administrator, IaaS administrator, Fabric administrator, Support user
- C. XaaS architect, Tenant administrator, Services architect, Approval administrator
- D. Services architect, Business user, Approver, IaaS administrator

Answer: C

NEW QUESTION # 172
