

NCP-EUC exam dumps, Nutanix NCP-EUC test cost

What's more, part of that TestKingIT NCP-EUC dumps now are free: https://drive.google.com/open?id=1Om3135Z8_fg6ZWbwFpgvoyoJr5Yi0Ofs

If you purchase our NCP-EUC test torrent this issue is impossible. We hire experienced staff to handle this issue perfectly. We are sure that our products and payment process are surely safe and anti-virus. If you have any question about downloading and using our NCP-EUC Study Tool, we have professional staff to remotely handle for you immediately, let users to use the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam guide torrent in a safe environment, bring more comfortable experience for the user.

The NCP-EUC exam covers a wide range of topics, including Nutanix VDI architecture, installation and configuration of Nutanix VDI components, user and desktop management, application management, and performance monitoring and troubleshooting. Candidates who pass the NCP-EUC exam demonstrate their expertise in deploying and managing Nutanix VDI solutions, which can help them advance their careers and increase their earning potential. The NCP-EUC Certification is a valuable credential for IT professionals who work in industries such as healthcare, finance, education, and government, where secure and reliable end-user computing is critical.

NCP-EUC Exam Objectives Pdf & NCP-EUC Study Plan

Our NCP-EUC learning materials are highly praised for their good performance. Customers often value the functionality of the product. After a long period of research and development, our learning materials have been greatly optimized. We can promise you that all of our NCP-EUC learning materials are completely flexible. In addition, we have experts who specialize in research optimization, constantly update and improve our learning materials, and then send them to our customers. We take client's advice on NCP-EUC Learning Materials seriously.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

An administrator decides to deploy non-persistent virtual desktops for the accounting department. Currently, the department uses

physical desktops and users has full administrative rights to their machines.

Which capability will persist for users following a migration to non-persistent VDI desktops?

- A. Installing drivers for user peripherals
- B. Saving user data
- **C. Saving application configurations**
- D. Application installations

Answer: C

Explanation:

non-persistent VDI desktops are virtual desktops that do not save any changes made by the user after they log off or shut down¹². They rely on a master image that contains the OS, configuration settings, and other customizations that replicate to multiple virtual desktops¹.

NEW QUESTION # 43

What should the administrator do to optimize the virtual desktop environment?

- A. remove memory reservation.
- B. Set Host policy to Balanced.
- **C. Verify if VAAI plugin is running.**
- D. Add more resources to the cluster,

Answer: C

Explanation:

one of the possible ways to optimize the virtual desktop environment is to verify if VAAI plugin is running. VAAI (vStorage APIs for Array Integration) is a technology that enables VMware ESXi hosts to offload storage operations to Nutanix storage controllers. This can improve performance and efficiency of cloning, migrating, and snapshotting virtual machines²³⁴.

NEW QUESTION # 44

A company is planning to implement Citrix Virtual Apps and Desktops on Nutanix clusters running AHV.

The initial implementation will be sized for 1000 virtual desktops with Windows 10, Microsoft Office 2021 and Adobe Creative Cloud All Apps installed.

What is the correct prerequisite to implement a successful installation of the Nutanix AHV MCS Plug-in?

- A. Nutanix cluster virtual IP address is reachable.
- **B. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Broker.**
- C. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Storefront.
- D. Nutanix data services IP address is reachable.

Answer: B

Explanation:

The Nutanix AHV MCS Plug-in is a tool that enables Citrix Virtual Apps and Desktops Delivery Controllers (also called Brokers) to create and manage Citrix-provisioned VMs in a Nutanix AHV infrastructure environment. The plug-in is based on the Citrix-defined plug-in framework².

To install the Nutanix AHV MCS Plug-in, you need to meet some prerequisites, such as:

The Delivery Controller version must be 7.15 LTSR CU3 or later.

The Delivery Controller must be able to communicate with Prism Element (PE) using HTTPS port 9440.

The Delivery Controller must have PowerShell 5.1 or later installed.

The user running the installer must have administrator privileges on the Delivery Controller².

NEW QUESTION # 45

An administrator has been evaluating a performance issue with the current Citrix VDI solution on Nutanix.

During the evaluation, the administrator finds out there is a feature that is enabled called Shadow Clones.

What would happen if an administrator disabled Shadow Clones within a company's VDI environment?

- A. Boot storms would be eliminated due to desktop resource contention.
- B. Deployment times would decrease when deploying additional desktops.
- C. Boot storms would be eliminated because the number of desktops would be throttled.
- **D. Deployment times would increase as the number deployed desktops increase,**

Answer: D

Explanation:

Nutanix's Shadow Clones feature is used to create linked clones or snapshots of base VMs, which can improve VM provisioning time and storage efficiency by reducing the amount of duplicated data.

If an administrator disables Shadow Clones within a company's VDI environment, it is likely that deployment times would increase as the number of deployed desktops increases. This is because linked clones or snapshots would no longer be used, so each new desktop deployment would require creating a full copy of the base VM.

Nutanix Shadow Clones allow for distributed caching of a particular disk or VM data, which are in a 'multi-reader' scenario. This can help in scenarios such as VDI or private clone boot storms, where VMs on multiple nodes read from the same set of base disks¹²

NEW QUESTION # 46

A company is planning to implement Citrix Virtual Apps and Desktops on Nutanix clusters running AHV.

The initial implementation will be sized for 1000 virtual desktops with Windows 10, Microsoft Office 2021 and Adobe Creative Cloud All Apps installed.

What is the correct prerequisite to implement a successful installation of the Nutanix AHV MCS Plug-in?

- A. Nutanix cluster virtual IP address is reachable.
- **B. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Broker.**
- C. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Storefront.
- D. Nutanix data services IP address is reachable.

Answer: B

Explanation:

The Nutanix AHV MCS Plug-in is a tool that enables Citrix Virtual Apps and Desktops Delivery Controllers (also called Brokers) to create and manage Citrix-provisioned VMs in a Nutanix AHV infrastructure environment. The plug-in is based on the Citrix-defined plug-in framework².

To install the Nutanix AHV MCS Plug-in, you need to meet some prerequisites, such as:

The Delivery Controller version must be 7.15 LTSR CU3 or later.

The Delivery Controller must be able to communicate with Prism Element (PE) using HTTPS port 9440.

The Delivery Controller must have PowerShell 5.1 or later installed.

The user running the installer must have administrator privileges on the Delivery Controller².
