PDFExamDumps的產品不僅可以幫你順利通過ASIS ASIS-PSP 認證考試，而且還可以享用一年的免費線上更新服務，把我們研究出來的最新產品第一時間推送給客戶，方便客戶對考試做好充分的準備。如果你考試失敗，我們會全額退款給你。

ASIS-PSP（物理安全專業）證書考試適用於希望驗證其物理安全領域知識和經驗的專業人士。本證書在全球範圍內得到認可，證明個人具備必要的技能和專業知識，能夠設計、實施和管理有效的物理安全措施，並向僱主和客戶展示此能力。

最新的 Physical Security Professional ASIS-PSP 免費考試真題 (Q36-Q41):

問題 #36

In its organizational functions, security encompasses which basic activities with varying degrees of emphasis?

- A. managerial, administrative, preventive, investigative
- B. managerial, training, preventive, detective
- C. managerial, detective, preventive, investigative
- D. supervising, administrative, preventive, training

答案: A

解題說明:

In the organizational structure of a security function, the core activities typically include:

Managerial: Oversight, policy development, leadership.

Administrative: Recordkeeping, personnel management, compliance.

Preventive: Strategies and operations to deter incidents before they occur.

Investigative: Reactive efforts to determine the cause of incidents or breaches.

These functions vary depending on the organization and risk profile but represent the foundational elements of an effective security program.

問題 #37

Who developed Ethernet?

- A. Microsoft
- B. IBM
- C. Xerox Corporation
- D. None of the above

答案: C

解題說明:

Ethernet was developed in the early 1970s by Robert Metcalfe and his team at Xerox Corporation's Palo Alto Research Center (PARC). It became the foundational technology for local area networks (LANs) and remains widely used in networking today.

IBM (B) developed other networking technologies but not Ethernet.

Microsoft (C) is a software company and did not develop Ethernet.

問題 #38

A system in which a badge or pass coded for authorization to enter specific areas is issued to an employee, who keeps it until the authorization id changed or until he or she leaves the company is called:

- A. Pass-exchange system
- B. Single pass system
- C. Contractive pass system
- D. None of the above

答案: B

問題 #39

Which protocol divides the information into packets, sequentially numbers each packet, and inserts some error control information?

- A. File Transfer protocol
- B. Information Control protocol
- **C. Transmission Control protocol**
- D. None of the above

答案： C

解題說明：

The Transmission Control Protocol (TCP) works with IP as part of the TCP/IP suite. It divides data into packets, numbers them sequentially, and adds error detection and correction codes. This ensures that data is transmitted reliably, in order, and without loss or corruption.

File Transfer Protocol (B) uses TCP but does not handle packet creation itself.

Information Control Protocol (C) is not a recognized protocol.

"None of the above" (D) is incorrect because TCP is the correct answer.

問題 #40

_____ includes self-employed individuals and funded business entities and organizations providing security-related services to specific clientele for a fee.

- A. Public security
- **B. Private security**
- C. Security function
- D. Security firm

答案： B

解題說明：

Private security refers to individuals or organizations that offer security-related services for compensation.

This includes both self-employed individuals (such as independent security consultants or contractors) and funded business entities (such as security companies or firms) that provide services to private clients for a fee.

These services may include guarding, patrolling, risk assessments, investigations, alarm monitoring, or other protective activities.
