

MB-500 Official Cert Guide, MB-500 High Passing Score

12 CCNA 200-301 Official Cert Guide, Volume 2

Port Number	Protocol	Application
161	UDP	SNMP
443	TCP	SSL
514	UDP	Syslog

¹ DNS uses both UDP and TCP in different instances. It uses port 53 for both TCP and UDP.

Connection Establishment and Termination

TCP connection establishment occurs before any of the other TCP features can begin their work. Connection establishment refers to the process of initializing Sequence and Acknowledgment fields and agreeing on the port numbers used. Figure 1-5 shows an example of connection establishment flow.

Figure 1-5 TCP Connection Establishment

This three-way connection establishment flow (also called a three-way handshake) must complete before data transfer can begin. The connection exists between the two sockets, although the TCP header has no single socket field. Of the three parts of a socket, the IP addresses are implied based on the source and destination IP addresses in the IP header. TCP is implied because a TCP header is in use, as specified by the protocol field value in the IP header. Therefore, the only parts of the socket that need to be encoded in the TCP header are the port numbers.

TCP signals connection establishment using 2 bits inside the flag fields of the TCP header. Called the SYN and ACK flags, these bits have a particularly interesting meaning. SYN means "synchronize the sequence numbers," which is one necessary component in initialization for TCP.

Figure 1-6 shows TCP connection termination. This four-way termination sequence is straightforward and uses an additional flag, called the *FIN bit*. (*FIN* is short for "finished," as you might guess.) One interesting note: Before the device on the right sends the third TCP segment in the sequence, it notifies the application that the connection is coming down. It then waits on an acknowledgment from the application before sending the third segment in the figure. Just in case the application takes some time to reply, the PC on the right sends the second flow in the figure, acknowledging that the other PC wants to take down the connection. Otherwise, the PC on the left might resend the first segment repeatedly.

It's no exaggeration to say that it only takes you 20 to 30 hours with MB-500 practice quiz before exam. Past practice has proven that we can guarantee a high pass rate of 98% to 100% due to the advantage of high-quality. If you are skeptical about this, you can download a free trial of the version to experience our MB-500 Training Material. You can try any version of our MB-500 exam dumps as your favor, and the content of all three version is the same, only the display differs.

Microsoft MB-500 certification exam is designed for individuals who are interested in becoming Microsoft Dynamics 365: Finance and Operations Apps Developers. Microsoft Dynamics 365: Finance and Operations Apps Developer certification exam tests the candidate's knowledge and skills related to designing, developing, testing, and deploying applications for Dynamics 365 Finance and Operations. MB-500 Exam also evaluates the candidate's ability to integrate Dynamics 365 Finance and Operations with other applications and services.

Quiz MB-500 - Microsoft Dynamics 365: Finance and Operations Apps Developer Useful Official Cert Guide

If you are worried about your MB-500 real exam and you are not prepared so, now you don't need to take any stress about it. Get most updated Microsoft dumps torrent with 100% accurate answers. Our website is considered one of the best website where you can save extra money by getting one-year of free updates after buying the MB-500 Dumps PDF files.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q122-Q127):

NEW QUESTION # 122

You need to implement the reporting requirements for the Vendor exclusion list.

Which options you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

SQL Server Reporting Services

Controller class

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/create-nextgen-reporting-solution>

NEW QUESTION # 123

You have a Dynamics 365 Finance and Operations environment.

You have the following code: (Line numbers are included for reference only.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

Class extension - Method wrapping and Chain of Command.

The functionality for class extension, or class augmentation, has been improved. You can now wrap logic around methods that are defined in the base class that you're augmenting. You can extend the logic of public and protected methods without having to use event handlers. When you wrap a method, you can also access public and protected methods, and variables of the base class. In this way, you can start transactions and easily manage state variables that are associated with your class.

Box 2: Yes

In the following example, the wrapper around doSomething and the required use of the next keyword create a Chain of Command (CoC) for the method. CoC is a design pattern where a request is handled by a series of receivers. The pattern supports loose coupling of the sender and the receivers

```
[ExtensionOf(classStr(BusinessLogic1))]
```

```
final class BusinessLogic1_Extension
```

```
{
```

```
str doSomething(int arg)
```

```
{
```

```
// Part 1
```

```
var s = next doSomething(arg + 4);
```

```
// Part 2
```

```
return s;
```

```
}
```

```
}
```

Box 3: Yes

Instance and static methods can be wrapped by extension classes. If a static method is the target that will be wrapped, the method in the extension must be qualified by using the static keyword.

Box 4: No

Wrapper methods must always call next.

Note: Wrapper methods in an extension class must always call next, so that the next method in the chain and, finally, the original implementation are always called. This restriction helps guarantee that every method in the chain contributes to the result.

In the current implementation of this restriction, the call to next must be in the first-level statements in the method body.

Here are some important rules:

Calls to next can't be done conditionally inside an if statement.

Calls to next can't be done in while, do-while, or for loop statements.

A next statement can't be preceded by a return statement.

Because logical expressions are optimized, calls to next can't occur in logical expressions. At runtime, the execution of the complete expression isn't guaranteed.

NEW QUESTION # 124

You are a Dynamics 365 Finance developer. You create an integer variable named totalSales.

Which three code segments can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Option C
- B. Option A
- C. Option D
- D. Option B

Answer: A,B,C

Explanation:

A: int2Str converts an integer to the equivalent string.

C: any2Str converts an anytype value to a str value. The anytype data type is a placeholder for any data type.

D: Example:

```
void MyMethod()
{
for (int i = 0; i < 10; i++)
{
info(strfmt("i is %1", i));
}
}
```

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/dev-ref/xpp-data-primitive#anytype>

NEW QUESTION # 125

You are a Dynamics 365 Finance developer.

You need to configure integration between Dynamics 365 Finance and other tools.

Which integration types should you use? To answer, drag the appropriate integration types to the correct requirement. Each integration type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: synchronous

A synchronous pattern is a blocking request and response pattern, where the caller is blocked until the callee has finished running and gives a response.

Box 2: Asynchronous

An asynchronous pattern is a non-blocking pattern, where the caller submits the request and then continues without waiting for a response.

Box 3: synchronous

Box 4: Asynchronous

A typical Batch job.

NEW QUESTION # 126

You add a field to the SalesTable table by using an extension.

You need to ensure that the new field is available for use in forms, reports, and code.

What are three possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Navigate to the Dynamics 365 menu and select Synchronize database.
- **B. Right-click the table and select Synchronize.**
- **C. Set the project property for Synchronize database on build to true and build the solution.**
- **D. Right-click the project and select Synchronize with database.**
- E. Right-click the solution and select Synchronize with database.

Answer: B,C,D

NEW QUESTION # 127

.....

Our MB-500 real exam materials have high appraisal in the market for their quality and high efficiency. Because satisfied customer is the best ads, and the word of mouth communication by the customers give others more sense of credibility than any other form of marketing communication. We know a satisfied customer will come back again for the same or different need to the company, so we always provide high-rank MB-500 real exam materials over ten years. They have experienced all trials of the market these years approved by experts. Besides, they are easy to assimilate so if you get stuck in the bottleneck of review, and under the guidance of our Microsoft Dynamics 365: Finance and Operations Apps Developer exam question they are widely regarded as top notch in this area. Recently our MB-500 Guide prep rise to the forefront in the field of practice materials. So if you need other MB-500 real exam materials from us, we will not let you down not even once. Hope you pass the exam once successfully by our Microsoft Dynamics 365: Finance and Operations Apps Developer exam question and recommend them to your friends. We are sure you will be splendid!
