Latest HPE7-A06 Exam Question, Exam Sample HPE7-A06 Online

To make sure your situation of passing the certificate efficiently, our HPE7-A06 study materials are compiled by first-rank experts. So the proficiency of our team is unquestionable. They handpicked what the HPE7-A06 training guide usually tested in exam recent years and devoted their knowledge accumulated into these HPE7-A06 Actual Tests. We are on the same team, and it is our common wish to help your realize it. So you can relay on us to success and we won't let you down!

HPE Campus Access Switching Expert Written Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

Security administrators are complaining about the number if HPE Aruba Networking ClearPass Access Tracker events from the user 'radius-test'. Given the configuration below, hao can the number of events be reduced?

- **A. Configure 'dead-only' tracking mode.**
- B. Increase the tracking interval.
- C. Configure 'any' tracking mode.
- D. Decrease the tracking retries.

Answer: A

Explanation:
The configuration shown enables RADIUS server tracking using the test user radius-test. By default, this generates continuous Access Tracker events because every probe attempt is logged.
To reduce the number of events, the tracking mode should be changed to dead-only, which limits authentication probes to when the RADIUS server is marked as unreachable. This way, ClearPass only sees test authentications when a failure condition occurs, significantly reducing unnecessary log entries.

NEW QUESTION # 37

Which set of commands will apply the device profile 'AP' to the device shown in the LLDP neighbor output below?

- A.
- B.
- C.
- **D.**

Answer: D

Explanation:
The LLDP neighbor output shows "Neighbor Chassis-Description: ArubaOS (MODEL: 635)".
The configuration uses seq 10 match sys-desc 635, which will match the sys-desc value seen in the LLDP output.
The device profile AP-PROFILE is enabled and correctly associates the role and LLDP group, which matches the requirement to apply the profile to APs with the "635" model in the sys-desc.

NEW QUESTION # 38

Drag and Drop Question
Match the AOS-CX switch BGP keepalive and holddown timers to the default.

Answer:

Explanation:
Explanation:
Keepalive timer: 60 seconds (interval for sending keepalive messages).
Holddown (Hold) timer: 180 seconds (maximum time to wait before declaring a neighbor down if no keepalives are received).

NEW QUESTION # 39

Two CX 8325 switches are configured as a cluster using VSX for the core role and two CX
6300M in VSF for the aggregation role. When a minor software upgrade is issued on the switches, what is the method to achieve a hitless upgrade with the aggregation switches?

- **A. VSF update-software initiates the software upgrade first on the secondary switch, followed by the primary.**
- B. ISSU update-software initiates the upgrade first on the secondary switch, followed by the primary.
- C. VSF update-software initiates the software upgrade first on the primary switch, followed by the secondary.

- D. ISSU update-software initiates the upgrade first on the primary switch, followed, by the secondary.

Answer: A

Explanation:
For CX 6300M switches in a VSF (Virtual Switching Framework), the correct method for a hitless (non-disruptive) minor software upgrade is to use the vsf update-software command. The process always upgrades the secondary member first, then the primary, ensuring continuous forwarding and minimizing downtime.

NEW QUESTION # 40
A customer is experiencing problems with BGP on their AOS-CX network. The users cannot access specific resources on the network, even though they have been assigned the appropriate roles and permissions.
What is the most likely cause of the problem?

- A. The HPE Aruba Networking ClearPass configuration is incorrect.
- B. The GBP database is corrupted.
- C. The users are not being assigned the correct GBP classes.
- D. The GBP tags are not being applied correctly to the user's traffic.

Answer: D

Explanation:
In AOS-CX, Group-Based Policy (GBP) relies on correct tagging of user traffic. If GBP tags are not applied properly, even users with the correct roles and permissions will not be able to access the intended network resources. This makes incorrect tag application the most likely cause of the BGP-related issue described.

NEW QUESTION # 41
......

As the saying goes, to develop study interest requires to giving learner a good key for study, this is promoting learner active development of internal factors. The most function of our HPE7-A06 question torrent is to help our customers develop a good study habits, cultivate interest in learning and make them pass their exam easily and get their HPE7-A06 Certification. All workers of our company are working together, in order to produce a high-quality product for candidates. I believe that our HPE7-A06 exam torrent will be very useful for your future.
