Which features should you use to create the workflow? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 328

You develop a Power Virtual Agents chatbot in a Microsoft Teams channel named Expenses.

You need to identify the operations the chatbot can perform.

Which two actions can the chatbot perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Transfer a chat to a live person if the chatbot cannot answer the question.
- **B. Trigger a request for approval from a senior manager for high-value expenses.**
- **C. Staff who are not members of the Expenses team can use the chatbot.**
- D. Upload and process a PDF file.

**Answer: B,C**

### NEW QUESTION # 329

A bank uses Power Platform apps and flows to support business processes.

The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.

You need to use AI Builder to implement the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model

Step 3: Publish the model

The last step is to publish your model.

Step 4: Use the model in PowerApps or Microsoft Flow.
