Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q103-Q108):

NEW QUESTION # 103
A consultant wants to understand what the important predictors are in a model.
Where is this information found?

- A. Model Deployment Wizard
- B. Model Settings
- C. Einstein Recommendations

Answer: B

Explanation:

The important predictors of a model in CRM Analytics can typically be found under theModel Settings. This area provides detailed information about the configuration and the inputs (predictors) used to train the model.

Insights into which predictors have the most significant impact on the model's outcomes can be gleaned from this section, enabling a deeper understanding of the model's internal workings and the factors driving predictions.

NEW QUESTION # 104

The CRM Analytics consultant at Universal Containers notices that some users have access to sensitive data and dashboards they should not have access to in the Manager's app.

How should the consultant fix the problem?

- A. Create separate apps, datasets, and dashboards, and share them with the proper users.
- B. Develop separate dashboards and datasets and put them in the Manager's app.
- C. Apply data encryption using Salesforce Shield.

Answer: A

Explanation:

To address issues with unauthorized access to sensitive data and dashboards, the best practice is to create separate apps, datasets, and dashboards for different user groups and then manage their sharing settings appropriately. This allows you to maintain data security while ensuring that users only access the data and insights that are relevant to their roles. In this scenario, applying separate apps for managers with defined sharing rules will prevent users who shouldn't have access from seeing sensitive data.

NEW QUESTION # 105

When creating a story in Einstein Discovery, do all potential collinear fields need to be removed before executing the build story'5

- A. No. Einstein Discovery is impervious to collinearity, so the story and subsequent model will be fine.
- B. Yes. If the collinear variables are not removed, the Einstein Discovery model build will fail.
- C. yes. If all collinear variables are not excluded, the model will over-fit and not make any sense.
- D. No. Although it is ideal to eliminate collinearity as soon as possible, Einstein will give a warning post-build and the ridge regression will prevent collinearity from over-fitting.

Answer: D

NEW QUESTION # 106

A Einstein Analytics consultant is asked to help a company report on their sales activity. The company wants to train some users to create their own dashboards. They also want another team to only be able to use the dashboards.

What must be configured to address these requirements?

- A. Create a permission set license assignment with two different levels of access-
- B. Grant "Manage" access permission to the apps.
- C. Create two permission sets with different system permissions.
- D. Use a permission set license with two different levels of access.

Answer: C

NEW QUESTION # 107

An Einstein Analytics team plans to enable data sync (replication).

Which two limits are specific to data sync (replication) and should be considered before enabling the feature because they might impact existing jobs?

Choose 2 answers

- A. Timeout for ELT (Extract Load Transform) jobs that are scheduled but not yet executed
