## AI-102 Updated Testkings - AI-102 Technical Training

Sometimes, you may worry about too much on the AI-102 exam and doubt a lot on the AI-102 exam questions. But if your friends or other familiar people passed the exam, you may be more confident in his evaluation. In any case, our common goal is to let you pass the exam in the shortest possible time! And we can proudly claim that if you study with our AI-102 Training Materials for 20 to 30 hours, then you can pass the exam with ease. And it is the data provided and tested by our worthy customers!

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q296-Q301):

### NEW QUESTION # 296

You are developing a new sales system that will process the video and text from a public-facing website.

You plan to monitor the sales system to ensure that it provides equitable results regardless of the user ' s location or background.

Which two responsible AI principles provide guidance to meet the monitoring requirements? Each correct answer presents part of the solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. transparency
- B. reliability and safety
- C. privacy and security
- D. fairness

- E. inclusiveness

**Answer: D,E**

Explanation:

Comprehensive Detailed Explanation

The question focuses on monitoring a public-facing sales system that processes video and text, ensuring that the system provides equitable results regardless of user location or background.

Two Microsoft Responsible AI principles apply directly here:

Fairness

AI systems should treat all people fairly and avoid bias.

Monitoring ensures that outcomes do not disadvantage people based on location, background, or demographics.

This directly addresses the requirement for equitable results.

Inclusiveness

AI systems should empower everyone and engage people of all backgrounds.

Monitoring for inclusiveness ensures that the system works well across different regions, languages, and cultures, making the system accessible and beneficial for all users.

Why not the other options?

A). Transparency

Important for explaining how AI systems work, but does not directly address equitable results across demographics.

D). Reliability and safety

Focuses on consistent and safe system operation, not equity across users.

E). Privacy and security

Critical for data protection, but not related to equitable treatment of users.

The Answer:

B). fairness

C). inclusiveness

Inclusiveness in AI systems

### NEW QUESTION # 297

You have a custom Azure OpenAI model.

You have the files shown in the following table.

You need to prepare training data for the model by using the OpenAI CLI data preparation tool. Which files can you upload to the tool?

- A. File1.tsv only
- B. File3.pdf only
- C. File4.xlsx only
- D. File1.tsv, File2.xml, File3.pdf and File4.xlsx
- E. File1.tsv and File4.xlsx only
- F. File1.tsv, File2.xml and File4.xlsx only
- G. File2.xml only

**Answer: A**

Explanation:

You need to prepare training data for Azure OpenAI custom model fine-tuning using the OpenAI CLI data preparation tool.

\* Supported input formats: JSONL (primary).

\* CLI pre-processing accepted formats: TSV, CSV, JSON.

\* Not supported: PDF, XML, XLSX directly.

Checking files:

\* File1.tsv (80 MB) # Supported (CLI can convert TSV to JSONL).

\* File2.xml (25 MB) # Not supported (XML not accepted).

\* File3.pdf (50 MB) # Not supported.

\* File4.xlsx (200 MB) # Not supported directly.

The answer: A. File1.tsv only

### NEW QUESTION # 298

You need to enable speech capabilities for a chatbot.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Register a Cortana channel.
- B. Enable CORS for the chatbot app.
- C. Enable WebSockets for the chatbot app.
- D. Register a Direct Line Speech channel.
- E. Create a Language Understanding service.
- F. Create a Speech service.

**Answer: C,D,F**

Explanation:

You can use the Speech service to voice-enable a chat bot.

The Direct Line Speech channel uses the text-to-speech service, which has neural and standard voices.

You'll need to make a small configuration change so that your bot can communicate with the Direct Line Speech channel using web sockets.

### NEW QUESTION # 299

You need to develop code to upload images for the product creation project. The solution must meet the accessibility requirements.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

□

Explanation:

Parameter type: stream

\* Visual features list: VisualFeatureTypes.Description

\* Result to use: results.Description.Captions[0]

To generate accessible alt text, you should use the caption produced by Azure Computer Vision's Description feature (it produces a human-readable sentence with a confidence score). Therefore:

\* The image input should be a stream, because you're uploading images (not just passing URLs) during product creation and

AnalyzeImage...Async supports image streams.

\* Request the Description feature in VisualFeatureTypes so the service returns results.Description.

Captions.

\* Use results.Description.Captions[0] and return the caption text if its confidence is high enough (e.g., >

0.5) to meet the accessibility requirement that all images must have relevant alt text.

Other features (Tags, Objects, Brands) are useful for enrichment but do not directly return natural-language captions suitable for alt text.

### NEW QUESTION # 300

Hotspot Question

You have a chatbot.

You need to ensure that the bot conversation resets if a user fails to respond for 10 minutes.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

<https://learn.microsoft.com/en-us/azure/bot-service/bot-builder-howto-expire-conversation?view=azure-bot-service-4.0&tabs=python#user-interaction-expiration>

# Notify the user that the conversation is being restarted.

- await turn\_context.send\_activity(

# Clear state.

- await self.conversation\_state.clear\_state(turn\_context)

#### NEW QUESTION # 301

.....

The Designing and Implementing a Microsoft Azure AI Solution AI-102 exam is a valuable credential that will assist you to advance your career. To pass the AI-102 exam is not an easy job. It always gives tough times to their candidates. The best AI-102 Exam Preparation strategy along with the Lead2PassExam AI-102 exam practice test questions can help you to crack the Microsoft AI-102 exam easily.
