

your own experience. Now let's take a look at why a worthy product of your choice is our CPC-CDE-RECERT actual exam. Firstly, with a high pass rate of 98% to 100%, you will get the pass guarantee form our CPC-CDE-RECERT Practice Engine. Secondly, the price of our CPC-CDE-RECERT learning guide is quite favourable than the other websites'.

CyberArk CDE-CPC Recertification Sample Questions (Q30-Q35):

NEW QUESTION # 30

In addition to CyberArk, which additional licensing implication does the PSM have?

- A. AWS
- B. GCP
- C. Microsoft Office
- **D. RDS CALs**

Answer: D

Explanation:

PSM relies on Microsoft Remote Desktop Services capabilities on Windows, and CyberArk documentation /knowledge articles call out RDS CAL considerations for PSM deployments (including guidance on CAL type implications, especially with Windows Server 2019 licensing enforcement behavior).

NEW QUESTION # 31

The Secure Tunnel component of CyberArk Privilege Cloud connects to which services in the CyberArk Privilege Cloud? (Choose two.)

- **A. <https://console.privilegecloud.cyberark.cloud>**
- B. <https://update.privilegecloud.cyberark.cloud>
- **C. <https://connector-<subdomain>.privilegecloud.cyberark.cloud>**
- D. <https://telemetry.privilegecloud.cyberark.cloud>
- E. <https://backend-services.privilegecloud.cyberark.cloud>

Answer: A,C

Explanation:

CyberArk's official outbound traffic/network requirements explicitly list the two Privilege Cloud cloud- side endpoints that are required for Secure Tunnel communications (for REST/API calls over HTTPS/443):

* Backend service management (Required for Secure Tunnel): <https://console.privilegecloud.cyberark.com>

* Connector (Required for Secure Tunnel): <https://connector-<subdomain>.privilegecloud.cyberark.com>

These map directly to answer choices A (console) and B (connector-<subdomain>).

Note: Your options use the .cyberark.cloud domain, while CyberArk's network requirements documentation shows these endpoints in the .cyberark.com domain for Privilege Cloud. The service roles (Console + Connector endpoint) are what Secure Tunnel must reach, and those are the two "Required for Secure Tunnel" services in the official requirements.

Why the other options are not selected (based on what's "required for Secure Tunnel" in the official allowlist guidance):

* C (backend-services...): Not listed in CyberArk's published "Required for Secure Tunnel" FQDN allowlist entries (console + connector are).

* D (telemetry...): Telemetry is a separate capability (dashboards / utilization tracking) and is not documented as the required Secure Tunnel service endpoint.

* E (update...): Secure Tunnel upgrade/download processes are documented, but "update.*" is not listed as a required Secure Tunnel cloud endpoint in the outbound allowlist table.

NEW QUESTION # 32

Which statements are correct regarding enabling end users from multiple domains in the same forest to authenticate to CyberArk Privilege Cloud? (Choose two.)

- **A. To enable authentication for users in multiple domains in the same forest, you should install separate CyberArk Identity Connectors for each independent domain.**
- **B. This can be accomplished when the users' Active Directory accounts are in domains with domain controllers that have a**

two-way, transitive trust relationship with the domain controller to which the connector is connected.

- C. CyberArk does not permit end users from multiple domains to authenticate to CyberArk Privilege Cloud; it only allows users from multiple directory services, such as AD, Azure AD, CyberArk Cloud Directory, etc.
- D. CyberArk recommends consolidating users from multiple domains in the same forest into the CyberArk Cloud Directory for this specific use case.
- E. Configuring authentication for users in multiple domains in the same forest is not recommended due to potential performance issues.

Answer: A,B

Explanation:

CyberArk's official connector guidance (CyberArk Identity / Identity Administration-used with Privilege Cloud Shared Services for AD user authentication) says that for trusted domains in a single forest, you use this model when the domain controllers have a two-way, transitive trust relationship with the domain controller the connector is joined to.

It also clarifies that a single connector can be used for the entire domain tree or forest in that trusted- domain model, and authentication requests are handled according to AD trust relationships within the forest /tree.

NEW QUESTION # 33

What is a requirement for increasing the redundancy of PSMs?

- A. Set it by adding parameters to the basic_PSM.ini configuration file.
- B. Install the Vault in an HA cluster.
- C. CPM must be in all data centers.
- **D. Use a load balancer.**

Answer: D

Explanation:

CyberArk's Privilege Cloud guidance for PSM high availability explicitly ties multiple PSM instances to high availability and load balancing implementations, i.e., redundancy is achieved by deploying multiple PSMs and placing them behind a load balancer.

NEW QUESTION # 34

When installing the first CPM within Privilege Cloud using the Connector Management Agent, what should you set the Installation Mode to in the CPM section?

- **A. Active**
- B. Default
- C. Primary
- D. Passive

Answer: A

Explanation:

When installing the first CyberArk Privilege Management (CPM) instance in the Privilege Cloud using the Connector Management Agent, the installation mode should be set to "Active". This configuration sets the CPM to be actively involved in password management and task processing without being in a standby or passive mode. Here are the step-by-step details:

* Download the Connector Management Agent: Obtain the installer from the CyberArk Marketplace or your installation kit.

* Run the Installer: Start the setup and select the CPM component to install.

* Choose Installation Mode: When prompted, select "Active" as the installation mode. This sets up the CPM as the primary node responsible for handling password management operations.

This setup ensures that the CPM is immediately active and capable of handling requests without waiting for manual intervention or failover.

Reference: CyberArk's official documentation provides guidance on setting up the CPM, where it specifies the modes and their purposes.

NEW QUESTION # 35

.....

The CyberArk CPC-CDE-RECERT exam offers a great opportunity for beginner and experienced to validate their expertise in a short time period. To do this they just need to pass the CyberArk CDE-CPC Recertification CPC-CDE-RECERT Certification Exam which is not an easy task. And Dumpkiller offers latest CPC-CDE-RECERT exam practice, exam pattern and practice exam online.

Trustworthy CPC-CDE-RECERT Pdf: https://www.dumpkiller.com/CPC-CDE-RECERT_braindumps.html

Guarantee-Graphic, Selecting a brand like CPC-CDE-RECERT learning guide is really the most secure, The Dumpkiller team works directly with industry experts to provide you with practical questions and answers to the latest version of the CyberArk Certification CPC-CDE-RECERT exam, as well as descriptive explanations, From the free demo, you can have a basic knowledge of our CPC-CDE-RECERT training dumps, With the help of CyberArk CDE-CPC Recertification practical training, you can pass the CPC-CDE-RECERT test with high efficiency and less time.

Function points are perhaps one of the best methods to estimate the CPC-CDE-RECERT size of an application, It also includes an understanding of how the author compares and contrasts information, how the writer presents problems and solutions, the writer's use of descriptive Trustworthy CPC-CDE-RECERT Pdf language, how the author organizes events in chronological sequence, and how the writer uses language to reveal cause and effect.

Here's a Quick and Proven Way to Pass CPC-CDE-RECERT Certification exam

Guarantee-Graphic, Selecting a brand like CPC-CDE-RECERT learning guide is really the most secure, The Dumpkiller team works directly with industry experts to provide you with practical questions and answers to the latest version of the CyberArk Certification CPC-CDE-RECERT exam, as well as descriptive explanations.

From the free demo, you can have a basic knowledge of our CPC-CDE-RECERT training dumps, With the help of CyberArk CDE-CPC Recertification practical training, you can pass the CPC-CDE-RECERT test with high efficiency and less time.
