## 높은 통과율 OGEA-101최고품질 덤프문제 시험대비 덤프공부

우리Itexamdump 에서 제공하는 학습가이드에는 IT전문가들이 만들어낸 시험대비 자료들과The Open Group OGEA-101인증 시험의 완벽한 문제와 답들입니다. 그리고 우리Itexamdump에서는 IT업계에서의 높은 신뢰감으로 여러분들한테 100%보장을 드립니다. 우리에게 믿음을 드리키 위하여The Open Group OGEA-101관련자료의 일부분 문제와 답 등 샘플을 무료로 다운받아 체험해볼수 있게 제공합니다.

## 최신 Enterprise Architecture OGEA-101 무료샘플문제 (Q121-Q126):

### 질문 # 121

What component of the Architecture Repository represents architecture requirements agreed with the Architecture Board?

- A. Reference Library

- B. Architecture Requirements Repository
- C. Architecture Capability
- D. Governance Log

정답: B

설명:

The Architecture Requirements Repository stores all the requirements that are output of the architecture development cycle, as well as the requirements that are input to the architecture development cycle<sup>1</sup>. The Architecture Requirements Repository includes the following types of requirements<sup>1</sup>:

\*Stakeholder Requirements: These are the high-level requirements and expectations of the stakeholders, derived from the business drivers, goals, and objectives. They are captured and refined in the Architecture Vision phase and the Requirements Management phase.

\*Architecture Requirements: These are the detailed requirements that specify what the architecture must do or deliver to meet the stakeholder requirements. They are derived and refined in the Business, Information Systems, and Technology Architecture phases.

\*Implementation and Migration Requirements: These are the detailed requirements that specify what the implementation and migration projects must do or deliver to realize the architecture. They are derived and refined in the Opportunities and Solutions and Migration Planning phases.

The Architecture Requirements Repository is used to manage the architecture requirements throughout the architecture lifecycle, ensuring their traceability, consistency, and compliance<sup>1</sup>. The Architecture Board is the authority that reviews and approves the architecture requirements, as well as the architecture deliverables and artifacts, as part of the architecture governance process<sup>2</sup>.

질문 # 122

When considering Architecture Governance, what is the benefit that derives from discipline?

- A. All decision-making will be established so as to minimize conflicts of interest
- B. Actions implemented and their decision support will be available for inspection
- C. All parties will have a commitment to adhere to procedures and process
- D. Groups within the organization are accountable for their actions

정답: C

설명:

TOGAF's governance guidance distinguishes benefits such as transparency, accountability, and discipline in operating governance processes. Formal TOGAF conformance topics include "The benefits of Architecture Governance," which include establishing and enforcing processes and controls (discipline) for architecture decision-making and compliance. [togaf-cert.opengroup.org](http://togaf-cert.opengroup.org) Reference: The Open Group, TOGAF Conformance Requirements (Multi-Level)-Unit on Architecture Governance (KLP 44.2-2 "The benefits of Architecture Governance").

질문 # 123

Consider the following statements:

1. Each contracted party is required to act responsibly to the organization and its stakeholders.
2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
3. Digital Transformation and operations will be more effective and efficient.
4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 1 & 4
- B. 2 & 3
- C. 1 & 2
- D. 3 & 4

정답: C

설명:

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and

implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect. Reference: : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 50: Architecture Governance : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 29: Architecture Governance

#### 질문 # 124

Complete the following sentence. In the ADM, documents which are under development and have not undergone any formal review and approval process are \_\_\_\_\_

- A. invalid
- B. called "draft"
- C. known as "Version 0.1"
- D. in between phases

정답: B

#### 질문 # 125

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- A. Alternatives and Trade-offs
- B. Business Scenarios and Business Models
- C. Architecture Views and Architecture Viewpoints
- D. Solutions and Applications

정답: C

설명:

\* According to the TOGAF Standard, Version 9.2, an architecture view is a representation of a system from the perspective of a related set of concerns<sup>1</sup>. It consists of one or more architecture models that demonstrate how the system addresses the stakeholder concerns<sup>1</sup>.

\* An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns<sup>1</sup>. It defines the perspective, scope, notation, and techniques for creating an architecture view of a system<sup>1</sup>.

\* Architects can present architecture views and viewpoints to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture, because<sup>2,3</sup>:

oArchitecture views and viewpoints help to communicate and visualize the architecture in a way that is meaningful and relevant to different stakeholders, addressing their specific interests and needs.

oArchitecture views and viewpoints help to elicit and validate the stakeholder concerns and requirements, ensuring that they are aligned with the business goals and objectives, and that they are consistent and feasible within the architecture context.

oArchitecture views and viewpoints help to identify and resolve any conflicts, gaps, or trade-offs among the stakeholder concerns and requirements, ensuring that they are balanced and prioritized in the architecture design and decision-making.

oArchitecture views and viewpoints help to demonstrate and verify the value and benefits of the architecture to the stakeholders, ensuring that they are satisfied and committed to the architecture outcome and governance.

Reference:

\* 1: The TOGAF Standard, Version 9.2, Chapter 22: Architecture Views, Viewpoints, and Stakeholders

\* 2: The TOGAF Standard, Version 9.2, Chapter 4: Introduction to Part II, Section 4.2: What is an Architecture Framework?

\* 3: The TOGAF Standard, Version 9.2, Chapter 31: Architectural Artifacts, Section 31.1: Basic Concepts
