SAP Certified Associate - Security Administrator Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which of the following allow you to control the assignment of table authorization groups? Note: There are 2 correct answers to this question.

- A. SSM_CUST
- B. V_BRG_54
- C. V_DDAT_54
- D. PRGN_CUST

Answer: B,D

Explanation:

Table authorization groups control access to specific database tables, and their assignment can be managed through the following:

- * PRGN_CUST (A):Used to configure specific customization settings in SAP, including the assignment of table authorization groups.
- * V_BRG_54 (C):Provides access to maintain and view table authorization group assignments, aiding in security management.

SAP Security References:

- * SAP Help Portal: Role and Authorization Maintenance
- * SAP Table Authorization Group Configuration Guide

NEW QUESTION # 52

Which SU01 user types are NOT enabled for interaction? Note: There are 2 correct answers to this question.

- A. Communications Data
- B. Dialog
- C. Service
- D. System

Answer: C,D

Explanation:

In SAP, certain SU01 user types are not enabled for interactive use:

- * Service Users (A):
 - * Designed for background jobs or tasks requiring anonymous or shared access.
 - * Cannot log in interactively.
- * System Users (B):
 - * Used for communication between systems and background processes.
 - * Does not support interactive login.

Why Others Are Incorrect:

- * Dialog Users (C): Designed specifically for interactive logins.
- * Communications Data (D): Often refers to communication-specific settings, not user types.

SAP Security References:

- * SAP Help Portal: User Type Overview
- * SAP Documentation: SU01 User Type Functionalities

NEW QUESTION # 53

Where can you find information on the SAP-delivered default authorization object and value assignments?

Note: There are 2 correct answers to this question.

- A. SU24
- B. USOBT
- C. USOBT_C
- D. SU22

Answer: B,D

Explanation:

Information on SAP-delivered default authorization objects and their value assignments can be found in:

- * USOBT (B):
 - * USOBT is a table that contains SAP's default check indicators and authorization object assignments for transactions.
 - * It holds the relationships between transaction codes and the authorization objects checked during transaction execution.
- * SU22 (D):
 - * Transaction SU22 displays the SAP default authorization data.
 - * It allows administrators to view the standard authorization objects and field values that SAP assigns to transactions.

Note:

- * USOBT_C is the customer version of the USOBT table, containing customer-specific modifications.

However, for SAP-delivered defaults, USOBT is the correct source.

- * SU24 is used for maintaining customer-specific authorization data, not for viewing SAP defaults.

SAP Security References:

- * SAP Help Portal: Understanding Authorization Object Tables (USOBT and USOBT_C)
- * SAP Documentation: Using SU22 for Default Authorization Data
- * SAP Note: Managing Authorization Checks with SU22 and SU24

NEW QUESTION # 54

What do you configure the Social Media deny providers?

- A. In the code editor of the SAP Business Application Studio
- B. In the SAP BTP Cockpit Account Explorer
- **C. In the administration console for SAP Cloud identity Services**

Answer: C

Explanation:

The administration console for SAP Cloud Identity Services is where configurations related to social media providers can be managed. This includes setting up deny lists to restrict access or usage by specific social media platforms.

SAP Security References:

- * SAP Help Portal: Social Media Integration Guide
- * SAP Cloud Identity Services Administration Documentation

NEW QUESTION # 55

What authorization object can be used to restrict which users a security administrator is authorized to maintain?

- A. S_USER_AUTO
- B. S_USER_GRD
- C. S_USER_GRP
- **D. S_USER_SASO**

Answer: D

Explanation:

The authorization object S_USER_SASO (Security Administrator's Specific Object) is used to restrict the users that a security administrator can maintain. It ensures granular control over user maintenance activities.

SAP Security References:

- * SAP Authorization Object Documentation
- * SAP Note on User Administration and Maintenance
