Pass4Test 질문 풀은 실제시험 변화의 기반에서 스케줄에 따라 업데이트 합니다. 만일 Zscaler ZDTE테스트에 어떤 변화가 생긴다면, 적중율이 항상 98% 이상을 유지 할 수 있도록 2일간의 근무일 안에 제품을 업데이트 하도록 합니다. Pass4Test는 고객들이 테스트에 성공적으로 합격 할 수 있도록 하기 위하여 업데이트 된 버전을 구매후 서비스로 제공해드립니다. 시험에서 불합격받으셨는데 업데이트가 힘든 상황이면 덤프비용을 환불해드립니다.

Pass4Test의 엘리트는 다년간 IT업계에 종사한 노하우로 높은 적중율을 자랑하는 Zscaler ZDTE덤프를 연구제작하였습니다. 한국어 온라인서비스가 가능하기에 Zscaler ZDTE덤프에 관하여 궁금한 점이 있으신 분은 구매전 문의하시면 됩니다. Zscaler ZDTE덤프로 시험에서 좋은 성적 받고 자격증 취득하시길 바랍니다.

>> ZDTE시험패스보장덤프 <<

ZDTE시험패스보장덤프 완벽한 시험 최신 기출문제

Pass4Test의 Zscaler인증 ZDTE덤프를 선택하여Zscaler인증 ZDTE시험공부를 하는건 제일 현명한 선택입니다. 시험에서 떨어지면 덤프비용 전액을 환불처리해드리고Zscaler인증 ZDTE시험이 바뀌면 덤프도 업데이트하여 고객님의 최신버전을 발송해드립니다. Zscaler인증 ZDTE덤프뿐만 아니라 IT인증시험에 관한 모든 덤프를 제공해드립니다.

최신 Digital Transformation Engineer ZDTE 무료샘플문제 (Q55-Q60):

질문 # 55

The Zscaler for Users - Engineer (EDU-202) learning path consists of various solutions covered in eleven courses. Which of the following topics is out of scope for the Zscaler for Users - Engineer learning path?

- A. Exploring Intrusion Prevention System, DNS Control, Tenant Restrictions, and secure application segmentation.
- B. In-depth overview of Zscaler's architecture platform, including its global scale, additional capabilities, and API infrastructure.
- C. Configuration of ZDX for applications, call quality monitoring, probes, diagnostics, alerts, and role-based administration to ensure effective SaaS and web application monitoring.
- D. Enabling versions to control which version (if any) of Zscaler Client Connector is available when end users manually update the app or when you configure automatic app updates.

정답: D

설명:

Official EDU-202 materials describe the Engineer path as focusing on advanced architecture, connectivity, platform, access control, cyberthreat protection, data protection, risk management, ZDX, and Zero Trust Automation. The published learning outcomes explicitly include: discussing the architecture of the Zscaler platform and its API infrastructure; configuring advanced connectivity options; and configuring advanced cybersecurity services and Zscaler Digital Experience (ZDX)-including application monitoring, call quality, probes, diagnostics, alerts, and role-based administration. These map directly to options A, C, and D, which align to Zscaler Architecture, Cyberthreat/Access Control Services (IPS, DNS Control, Tenant Restrictions, segmentation), and ZDX content in the EDU-202 outline.

By contrast, Client Connector App Store "version enablement" and controlling which build is available when users manually or automatically update the app is documented as an administration task in the Client Connector help and is typically taught in the Essentials/Administrator (EDU-200) path, not in the Engineer path. Those materials show how to use the App Store to enable builds and control available versions, positioning it as operational client management rather than an advanced Engineer-level topic. Consequently, option B is considered out of scope for EDU-202 in the ZDTE context.

질문 # 56

Why is it important that the IP address of ZPA App Connectors is included in an Active Directory Sites and Services configuration?

- A. So admins can access Domain Controllers by IP address.
- B. Adding the IP address of ZPA App Connectors to an AD Sites and Services configuration helps with accommodating BGP routing designs.
- C. Ensures users connect to the closest Domain Controllers or SCCM servers.
- D. So users can authenticate to ZPA with Active Directory.

정답: C

설명:

In a Zscaler Private Access (ZPA) deployment, traffic from users to Active Directory Domain Controllers and SCCM servers is proxied through App Connectors. ZPA performs DNS proxy and source NAT (SNAT) on these connections, which means the Domain Controller often sees the App Connector's IP address-rather than the end user's-when deciding which AD Site the "client" belongs to.

Zscaler's Active Directory integration guidance explains that AD site selection is therefore based on the App Connector IP, and recommends adding those connector IPs into the appropriate Active Directory Sites and Services configuration. Doing so ensures that when authentication, Group Policy, DFS, or SCCM traffic arrives via ZPA, the Domain Controller or SCCM infrastructure maps the connection to the correct site and routes users to the nearest or most appropriate DC/SCCM server, preserving efficient logon performance and content distribution.

This configuration has nothing to do with BGP routing design (option A), direct admin access to DCs by IP (option B), or the basic ability of ZPA to use AD for identity (option C). ZPA can integrate with AD without Sites and Services, but optimizing which DC/SCCM server is used depends on having App Connector IPs correctly associated with AD Sites. Thus, the correct reason is that it ensures users connect to the closest Domain Controllers or SCCM servers.

질문 # 57

An engineer attempted to push a configuration using an API call to an endpoint but received a 409 response code. What was the reason for the error response code?

- A. Resource does not exist
- B. Exceeded the rate limit or quota
- C. Edit conflict occurred
- D. Request is not complete due to incorrect syntax

정답: C

설명:

In the context of Zscaler's public APIs, HTTP status code 409 indicates a conflict with the current state of the target resource, most commonly an edit conflict. When configuration is managed via API, Zscaler uses versioning or similar concurrency controls to ensure that two administrators or systems do not overwrite each other's changes unintentionally. A 409 response typically appears when the payload being pushed is based on an outdated version of the object or when another change has been committed between the time the configuration was retrieved and the time the update was sent.

The Digital Transformation Engineer documentation explains that clients should first retrieve the latest configuration (often including a version or ETag-like value), apply their modifications, and then push the update. If the server detects that the version in the request no longer matches the current version, it returns

409 Conflict to signal that the update cannot be safely applied.

The other options map to different HTTP codes: rate limit or quota issues are indicated by 429 Too Many Requests, non-existent resources by 404 Not Found, and syntax or malformed payloads by 400 Bad Request

. Thus, for a 409 response during a configuration push, the correct interpretation is an edit conflict.

질문 # 58

What are the four distinct stages in the Cloud Sandbox workflow?

- A. Pre-Filtering # Behavioral Analysis # Post-Processing # Cloud Effect

- B. Behavioral Analysis # Post-Processing # Engage your SOC Team for further investigation
- C. Cloud Effect # Pre-Filtering # Behavioral Analysis # Post-Processing
- D. Pre-Filtering # Cloud Effect # Behavioral Analysis # Post-Processing

정답: C

설명:

Zscaler Cloud Sandbox is described in Zscaler threat-protection training as following a four-stage workflow.

The documented order is: Cloud Effect, Pre-Filtering, Behavioral Analysis, and Post-Processing.

* Cloud Effect - Before detonation, files are checked against global threat intelligence and prior sandbox verdicts so that known malicious objects can be immediately blocked, and known benign files can be allowed without re-analysis.

* Pre-Filtering - Static and signature-based checks (antivirus, file heuristics, and related engines) quickly discard clearly malicious or clearly safe files, reducing load on deep analysis.

* Behavioral Analysis - Suspicious or unknown samples are executed in a virtual environment to observe behavior such as process spawning, registry changes, or C2 activity.

* Post-Processing - Final verdicts are generated, policies are enforced (block, quarantine, allow), and new indicators are fed back into threat intelligence for future Cloud Effect decisions.

This exact ordered sequence-Cloud Effect # Pre-Filtering # Behavioral Analysis # Post-Processing-is what appears in ZDTE study material, so option C is correct.

질문 # 59

Customers would like to use a PAC file to forward web traffic to a Subcloud. Which one below uses the correct variables for the required PAC file?

- A. {REGION.<Subcloud>.<Zscaler cloud>}
- B. {<Subcloud>.REGION.<Zscaler cloud>}
- C. {<Subcloud>.GATEWAY.<Zscaler cloud>}
- D. {GATEWAY.<Subcloud>.<Zscaler cloud>}

정답: D

설명:

In Zscaler's PAC file guidance for directing traffic to specific Subclouds, the fully qualified proxy host name is constructed using the standard gateway label, followed by the subcloud identifier, and then the Zscaler cloud domain. In template form, this is represented as:

{GATEWAY.<Subcloud>.<Zscaler cloud>}

Here, GATEWAY corresponds to the Zscaler gateway label, <Subcloud> is the dynamically assigned subcloud (which helps optimize routing and resiliency), and <Zscaler cloud> represents the customer's Zscaler cloud domain (for example, one of the standard ZIA cloud domains). The Digital Transformation Engineer training emphasizes that using the correct order of these variables ensures that browsers resolve to the appropriate subcloud-specific gateway, enabling optimized performance and regional affinity.

Options B and C incorrectly introduce or misplace a REGION label, which does not match the documented variable order when explicitly targeting a Subcloud. Option D reverses the positions of GATEWAY and

<Subcloud>, which does not align with the hostname structure used by Zscaler for subcloud-aware PAC configurations.

Therefore, the correct PAC variable pattern for forwarding web traffic specifically to a Subcloud is

{GATEWAY.<Subcloud>.<Zscaler cloud>}.

질문 # 60

.....

여러분이 다른 사이트에서도 Zscaler 인증 ZDTE 시험 관련 덤프 자료를 보셨을 것입니다 하지만 우리 Pass4Test의 자료 만의 최고의 전문가들이 만들어낸 제일 전면적이고 또 최신 업데이트일 것입니다. 우리 덤프의 문제와 답으로 여러분은 꼭 한번에 Zscaler 인증 ZDTE 시험을 패스하실 수 있습니다.

ZDTE 시험 패스 가능 덤프 문제: <https://www.pass4test.net/ZDTE.html>

Pass4Test 덤프 자료는 실제 시험 문제의 모든 유형에 근거하여 예상 문제를 묶어둔 문제은행입니다. 시험적중율이 거의 100%에 달하여 Zscaler 인증 ZDTE 시험을 한방에 통과하도록 도와드립니다. 지금 Pass4Test에서 Zscaler ZDTE 인증 시험을 안전하게 넘을 수 있도록 대책을 내드리겠습니다. 수많은 Zscaler 인증 ZDTE 시험 공부 자료 중에서 Pass4Test의 Zscaler 인증 ZDTE 덤프가 가장 출중한 원인은 무엇일까요, Pass4Test ZDTE 시험 패스 가능 덤프 문제는 여러분의 꿈을

이루어줄 뿐만 아니라 일년무료 업데이트서비스도 따릅니다, Zscaler ZDTE시험패스 가능 덤프문제 ZDTE시험패스 가능 덤프문제덤프를 구매하시면 시스템 자동으로 덤프파일 다운로드 링크가 고객님의 메일주소에 발송됩니다.

소호가 그의 표정을 확인하려 획 고개를 돌렸다, 도무녀를 빼고는.처음인가, Pass4Test덤프자료는 실제시험문제의 모든 유형에 근거하여 예상문제를 묶어둔 문제은행입니다.시험적중율이 거의 100%에 달하여Zscaler 인증ZDTE시험을 한방에 통과하도록 도와드립니다.

최신버전 ZDTE시험패스보장덤프 인증덤프는 Zscaler Digital Transformation Engineer 시험패스에 유효한 자료

지금Pass4Test에서Zscaler ZDTE인증시험을 안전하게 넘을 수 있도록 대책을 내드리겠습니다, 수많은Zscaler인증 ZDTE시험공부자료중에서Pass4Test의Zscaler인증 ZDTE덤프가 가장 출중한 원인은 무엇일까요?
