

DP-300 Latest Exam Pdf & DP-300 Latest Exam Test

P.S. Free & New DP-300 dumps are available on Google Drive shared by Actual4dump: https://drive.google.com/open?id=1KZ8Blu9PW3Nf4AjOlm_m6J585gUp_Czw

After passing the Microsoft DP-300 certification exam, you can take advantage of a number of extra benefits. With the correct concentration, commitment, and DP-300 exam preparation, you could ace this Administering Relational Databases on Microsoft Azure DP-300 test with ease. Actual4dump is a trusted and leading platform that is committed to preparing the Microsoft DP-300 exam candidates in a short time period.

No one wants to own insipid life. Do you want to at the negligible position and share less wages forever? And do you want to wait to be laid off or waiting for the retirement? This life is too boring. Do not you want to make your life more interesting? It does not matter. Today, I tell you a shortcut to success. It is to pass the Microsoft DP-300 exam. With this certification, you can live the life of the high-level white-collar. You can become a power IT professionals, and get the respect from others. Actual4dump will provide you with excellent Microsoft DP-300 Exam Training materials, and allows you to achieve this dream effortlessly. Are you still hesitant? Do not hesitate, Add the Actual4dump's Microsoft DP-300 exam training materials to your shopping cart quickly.

Useful DP-300 - Administering Relational Databases on Microsoft Azure Latest Exam Pdf

If you buy the DP-300 study materials online, you may concern the safety of your money. If you do have the concern, you can just choose us. We use the international recognition third party for the payment. It will ensure the safety of your money. We are pass guaranteed if you buy DP-300 Exam Dumps of us, we also money back guarantee if you fail to pass the exam. If you find that your rights haven't got enough guaranteed, you can ask for refund, and the third party will protect your interests.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q366-Q371):

NEW QUESTION # 366

You have an Azure SQL database.

You run the following PowerShell script.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 367

Case Study 2 - Contoso, Ltd

Overview

General Overview

Contoso, Ltd. is a financial data company that has 100 employees. The company delivers financial data to customers.

Physical Locations

Contoso has a datacenter in Los Angeles and an Azure subscription. All Azure resources are in the US West 2 Azure region.

Contoso has a 10-Gb ExpressRoute connection to Azure.

The company has customers worldwide.

Existing Environment

Active Directory

Contoso has a hybrid Azure Active Directory (Azure AD) deployment that syncs to on-premises Active Directory.

Database Environment

Contoso has SQL Server 2017 on Azure virtual machines shown in the following table.

SQL1 and SQL2 are in an Always On availability group and are actively queried. SQL3 runs jobs, provides historical data, and handles the delivery of data to customers.

The on-premises datacenter contains a PostgreSQL server that has a 50-TB database.

Current Business Model

Contoso uses Microsoft SQL Server Integration Services (SSIS) to create flat files for customers.

The customers receive the files by using FTP.

Requirements

Planned Changes

Contoso plans to move to a model in which they deliver data to customer databases that run as platform as a service (PaaS) offerings. When a customer establishes a service agreement with Contoso, a separate resource group that contains an Azure SQL database will be provisioned for the customer. The database will have a complete copy of the financial data. The data to which each customer will have access will depend on the service agreement tier. The customers can change tiers by changing their service agreement.

The estimated size of each PaaS database is 1 TB.

Contoso plans to implement the following changes:

Move the PostgreSQL database to Azure Database for PostgreSQL during the next six months.

Upgrade SQL1, SQL2, and SQL3 to SQL Server 2019 during the next few months.

Start onboarding customers to the new PaaS solution within six months.

Business Goals

Contoso identifies the following business requirements:

Use built-in Azure features whenever possible.

Minimize development effort whenever possible.

Minimize the compute costs of the PaaS solutions.

Provide all the customers with their own copy of the database by using the PaaS solution.

Provide the customers with different table and row access based on the customer's service agreement.

In the event of an Azure regional outage, ensure that the customers can access the PaaS solution with minimal downtime. The solution must provide automatic failover.

Ensure that users of the PaaS solution can create their own database objects but be prevented from modifying any of the existing database objects supplied by Contoso.

Technical Requirements

Contoso identifies the following technical requirements:

Users of the PaaS solution must be able to sign in by using their own corporate Azure AD credentials or have Azure AD credentials supplied to them by Contoso. The solution must avoid using the internal Azure AD of Contoso to minimize guest users.

All customers must have their own resource group, Azure SQL server, and Azure SQL database. The deployment of resources for each customer must be done in a consistent fashion.

Users must be able to review the queries issued against the PaaS databases and identify any new objects created.

Downtime during the PostgreSQL database migration must be minimized.

Monitoring Requirements

Contoso identifies the following monitoring requirements:

Notify administrators when a PaaS database has a higher than average CPU usage.

Use a single dashboard to review security and audit data for all the PaaS databases.

Use a single dashboard to monitor query performance and bottlenecks across all the PaaS databases.

Monitor the PaaS databases to identify poorly performing queries and resolve query performance issues automatically whenever possible.

PaaS Prototype

During prototyping of the PaaS solution in Azure, you record the compute utilization of a customer's Azure SQL database as shown in the following exhibit.

Role Assignments

For each customer's Azure SQL Database server, you plan to assign the roles shown in the following exhibit.

What should you implement to meet the disaster recovery requirements for the PaaS solution?

- A. Always On availability groups
- B. Availability Zones
- C. failover groups
- D. geo-replication

Answer: C

Explanation:

Scenario: In the event of an Azure regional outage, ensure that the customers can access the PaaS solution with minimal downtime.

The solution must provide automatic failover.

The auto-failover groups feature allows you to manage the replication and failover of a group of databases on a server or all databases in a managed instance to another region. It is a declarative abstraction on top of the existing active geo-replication feature, designed to simplify deployment and management of geo-replicated databases at scale. You can initiate failover manually or you can delegate it to the Azure service based on a user-defined policy.

The latter option allows you to automatically recover multiple related databases in a secondary region after a catastrophic failure or other unplanned event that results in full or partial loss of the SQL Database or SQL Managed Instance availability in the primary region.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/auto-failover-group-overview>

NEW QUESTION # 368

You are performing exploratory analysis of bus fare data in an Azure Data Lake Storage Gen2 account by using an Azure Synapse Analytics serverless SQL pool.

You execute the Transact-SQL query shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

Answer:

Explanation:

Explanation:

Box 1: CSV files that have file named beginning with "tripdata_2020"

Box 2: a header

FIRSTROW = 'first_row'

Specifies the number of the first row to load. The default is 1 and indicates the first row in the specified data file. The row numbers are determined by counting the row terminators. FIRSTROW is 1-based.

Reference:

<https://docs.microsoft.com/en-us/azure/synapse-analytics/sql/develop-openrowset>

NEW QUESTION # 369

A data engineer creates a table to store employee information for a new application. All employee names are in the US English alphabet. All addresses are locations in the United States. The data engineer uses the following statement to create the table.

You need to recommend changes to the data types to reduce storage and improve performance.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Change Salary to the money data type.
- B. Change LastHireDate to the datetime2(7) data type.
- C. **Change LastHireDate to the date data type.**
- D. Change PhoneNumber to the bigint data type.
- E. Change PhoneNumber to the float data type.

Answer: A,C

NEW QUESTION # 370

You have an Azure subscription that contains 20 Azure SQL databases.

You create a Transact-SQL statement to perform index maintenance on a database.

You need to schedule the statement to run once daily against each database by using Transact-SQL commands.

What should you use to schedule the statement?

- A. an elastic job
- B. a SQL Server Agent job
- C. **Azure Automation**
- D. an Azure function

Answer: C

NEW QUESTION # 371

.....

Our DP-300 exam questions are so popular among the candidates not only because that the quality of the DP-300 study dumps is the best in the market. But also because that our after-sales service can be the most attractive project in our DP-300 Preparation questions. We have free online service which means that if you have any trouble, we can provide help for you remotely in the shortest time. And we will give you the best advices on the DP-300 practice engine.

DP-300 Latest Exam Test: <https://www.actual4dump.com/Microsoft/DP-300-actualtests-dumps.html>

So, you can easily start your journey towards a successful professional life in this highly competitive IT industry by passing the DP-300 exam with the help of Actual4dump, Microsoft DP-300 Latest Exam Pdf Sincere and Thoughtful Service Our goal is to increase customer's satisfaction and always put customers in the first place, Microsoft DP-300 Latest Exam Pdf We have detailed preparation material with great ways to achieve the desired results in the exams.

This team works on infrastructure for a few iterations delivering incremental DP-300 results each iteration) and thus may be called an infrastructure team, a temporary role until they return to normal feature team responsibility.

Microsoft DP-300 Exam Questions - Pass Your Exam In One Go

To set selection methods for the selection tools, So, you can easily start your journey towards a successful professional life in this highly competitive IT industry by passing the DP-300 Exam with the help of Actual4dump.

Sincere and Thoughtful Service Our goal is to increase customer's satisfaction DP-300 Reliable Test Objectives and always put customers in the first place, We have detailed preparation material with great ways to achieve the desired results in the exams.

The ratio of passing candidates who used our DP-300 Exam Questions is 97%, There is no doubt that DP-300 exam is an international recognition certification test, which is equivalent to a passport to enter new brighter future.
