You do not require an active internet connection after installation of the CompTIA Data+ Certification Exam (DA0-001) practice exam software. Repetitive attempts of CompTIA Data+ Certification Exam (DA0-001) exam dumps boosts confidence and provide familiarity with the DA0-001 actual exam format.

CompTIA Data+ Certification Exam Sample Questions (Q318-Q323):

NEW QUESTION # 318

Joseph is interpreting a left skewed distribution of test scores. Joe scored at the mean, Alfonso scored at the median, and Gaby scored at the end of the tail.

Who had the highest score?

- A. Joseph
- B. Joe
- C. Alfonso
- D. Gaby

Answer: C

Explanation:

Alfonso had the highest score. A left skewed distribution is a distribution where the tail is longer on the left side than on the right side, meaning that most of the values are clustered on the right side and there are some outliers on the left side. In a left skewed distribution, the mean is less than the median, which is less than the mode. Therefore, Joseph, who scored at the mean, had the lowest score, Gaby, who scored at the end of the tail, had the second lowest score, and Alfonso, who scored at the median, had the highest score.

NEW QUESTION # 319

A data analyst wants to create "Income Categories" that would be calculated based on the existing variable "Income". The "Income Categories" would be as follows:

Income category 1: less than \$1.

Income category 2: more than \$1 and less than \$20,000.

Income category 3: more than \$20,001 and less than \$40,000.

Income category 4: more than \$40,001.

Which of the following data manipulation techniques should the data analyst use to create "Income Categories"?

- A. Data blending
- B. Data merge
- **C. Derived variables**
- D. Data append

Answer: C

Explanation:

The correct answer is B: Derived variables. Derived variables are variables that you create by calculating or categorizing variables that already exist in your data set.

Data merge is incorrect. Data merging is the process of combining two or more data sets into a single data set. Data blending is incorrect.

Data blending involves pulling data from different sources and creating a single, unique, dataset for visualization and analysis.

Data append is incorrect. A data append is a process that involves adding new data elements to an existing database.

NEW QUESTION # 320

A research analyst wants to determine whether the data being analyzed is connected to other datapoints.

Which of the following is the BEST type of analysis to conduct?

- A. Performance analysis
- B. Trend analysis
- **C. Link analysis**
- D. Exploratory analysis

Answer: C

NEW QUESTION # 321

A data analyst needs to present the results of an online marketing campaign to the marketing manager. The manager wants to see the most important KPIs and measure the return on marketing investment. Which of the following should the data analyst use to BEST communicate this information to the manager?

- A. A real-time monitor that allows the manager to view performance the day the campaign was launched
- B. A self-service dashboard that allows the manager to look at the company's annual budget performance
- C. A spreadsheet of the raw data from all marketing campaigns and channels
- **D. A summary with statistics, conclusions, and recommendations from the data analyst**

Answer: D

Explanation:

The option that the data analyst should use to best communicate the information to the manager is a summary with statistics, conclusions, and recommendations from the data analyst. A summary is a concise and clear way of presenting the main findings and insights from the data analysis report. A summary should include relevant statistics that support the conclusions and recommendations from the data analyst. A summary should also highlight the most important KPIs and measure the return on marketing investment in relation to the objectives of the online marketing campaign. The other options are not as effective as using a summary to communicate the information to the manager, as they either provide too much or too little information or do not address the manager's needs or expectations. A real-time monitor may provide too much information that can be overwhelming or distracting for the manager who wants to see only the most important KPIs and measure the return on marketing investment. A self-service dashboard may provide too little information that can be insufficient or unclear for the manager who wants to see some guidance and interpretation from the data analyst. A spreadsheet of raw data may provide irrelevant or inaccurate information that can be confusing or misleading for the manager who wants to see some analysis and insights from the data analyst.
