問題 #124

Your client uses product categories and global sourcing rules for supply planning. However, their newest product doesn't follow these rules. For a specific item in the category, it needs to be sourced from a different supplier globally. How should they set this up for the easiest maintenance, going forward?

- A. Create a new global sourcing rule for the item; remove the category level assignments and create new item level assignments for all items in the category pointing each to the correct global sourcing rule.
- B. Create a new global sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.
- C. Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; leave the category as is for the remainder of the products.
- D. Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; alter the category to be category-organization for the remainder of the products.
- E. Create a new local sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.

答案: B

問題 #125

You have created several infotiles based on the client requirements. You now want to group them together for display. How do you accomplish this?

- A. First build them into a tile set in Manage Table, Graphs, and Analysis Sets. Then open the tile set on the plan by going to Open (choose area) > Choose tile set.
- B. First build them into a planning group in Manage Planning Groups. Then open the planning group on the plan by going to Open (choose area) > Choose planning group.
- C. First build them into a planning measure in Manage Planning Measures. Then open the planning measure on the plan by going to Open (choose area) > Choose planning measure.
- D. First build them into an info set in Manage Infosets. Then open the info set on the plan by going to Open (choose area) > Choose info set.
- E. No need to group them. Open them directly on the plan going to Open (choose area) > Choose Infotile.

問題 #126

You plan to fulfill customer demand from internal organizations or from a contract manufacturer. Which are the four types of planned orders that can be generated?

- A. Transfer orders for finished goods being transferred from contract manufacturer organizations to internal organizations.
- B. Return orders for items being manufactured in the contract manufacturer organization.
- C. Transfer orders for internally owned components being transferred from contract manufacturer to internal organizations.
- D. Transfer orders for internally owned components being transferred from internal organizations to contract manufacturer organizations.
- E. Buy orders for components purchased at internal organizations and contract manufacturer organizations.
- F. Make orders for items being manufactured in the contract manufacturer organization.

答案: A,D,E,F

解題說明:

For fulfilling customer demand through both internal and contract manufacturing, planned orders can include buy orders for components, make orders at contract manufacturers, and transfer orders to move components or finished goods between internal and contract manufacturing locations. Return orders are not applicable as they are typically used for returns rather than regular supply chain activities MY ORACLE SUPPORT
