

# 100% Pass-Rate Latest NCP-CI-AWS Dumps Files - Best Accurate Source of NCP-CI-AWS Exam

BONUS!!! Download part of Braindumpsqa NCP-CI-AWS dumps for free: [https://drive.google.com/open?id=1ebjYIkaipT2qhrY3tGw4\\_8BOnfzMNnQp](https://drive.google.com/open?id=1ebjYIkaipT2qhrY3tGw4_8BOnfzMNnQp)

The Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) certification exam is a valuable credential that is designed to validate the candidates' skills and knowledge level. The NCP-CI-AWS certification exam is one of the high in demand industrial recognized credentials to prove your skills and knowledge level. With the Nutanix NCP-CI-AWS Certification Exam everyone can upgrade their skills and become competitive and updated in the market.

## Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li></ul>

## NCP-CI-AWS exam study material & NCP-CI-AWS exam training pdf & NCP-CI-AWS latest practice questions

Just install the Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) PDF dumps file on your desktop computer, laptop, tab, or even on your smartphone and start Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-

AWS) exam preparation anytime and anywhere. Whereas the other two Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) exam questions formats are concerned both are the easy-to-use and compatible Mock NCP-CI-AWS Exam that will give you a real-time environment for quick Nutanix Exams preparation. Now choose the right Nutanix NCP-CI-AWS exam questions format and start this career advancement journey.

## Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q102-Q107):

### NEW QUESTION # 102

An administrator is deploying a new cluster on AWS and would like to ensure the data is encrypted. Due to cost constraints, the deployment will leverage the native local key manager (LKM).

What is the minimal number of nodes needed to support the Nutanix native LKM?

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

To support Nutanix's native Local Key Manager (LKM) for data encryption in a cost-effective manner, a minimum of three nodes is required. This ensures that there is enough redundancy and reliability for the encryption services to function properly, complying with best practices for distributed key management.

### NEW QUESTION # 103

Which statement is true regarding additional EBS volumes attached to a cluster for storage capacity?

- A. Cluster Protect is not supported when EBS volumes are attached to nodes in a cluster.
- B. EBS storage attached to nodes in a cluster can only be decreased.
- **C. EBS storage attached to nodes in a cluster can only be increased.**
- D. Hibernation is not supported when EBS volumes are attached to nodes in a cluster.

**Answer: C**

Explanation:

NC2 on AWS allows for the dynamic addition of Amazon EBS volumes to bare-metal nodes to expand the cluster's storage capacity beyond the local NVMe drives. According to Nutanix architectural guidelines, once these EBS volumes are attached and integrated into the storage pool, the capacity can only be increased.

Reducing the storage capacity by removing or shrinking attached EBS volumes is not a supported operation because it would risk data loss and disrupt the Distributed Storage Fabric (DSF) which expects consistent disk availability. Therefore, administrators should carefully size their initial EBS requirements, knowing that they can scale up to meet demand but cannot scale back the capacity of individual existing volumes without a complex data migration or cluster redeployment.

### NEW QUESTION # 104

Regarding a cloud cluster, which two upgrades can be performed using LCM? (Choose two.)

- A. NBA
- **B. BIOS**
- C. NCC
- **D. AHV**

**Answer: B,D**

Explanation:

\* AHV (Answer A):

\* AHV (Acropolis Hypervisor) can be upgraded using Lifecycle Manager (LCM). LCM simplifies the upgrade process and ensures that all components are updated in a coordinated manner.

\* BIOS (Answer C):

\* BIOS upgrades can also be performed using LCM. This helps in maintaining hardware compatibility and performance by ensuring that the latest firmware is installed.

### NEW QUESTION # 105

Administrator has recently deployed an NC2 cluster on AWS in the North Virginia region in availability zone us-east-id. The consuming IPS from a 10.78.2.0/24 range.

The AWS VPC has two available CIDR ranges:

10.78.0.0/16

10.19.101.0/24

The following subnet have been configured in the NC2 AWS VPC:

Which two subnet will show up in the Network configuration of the Prism Element Settings page? (Choose two.)

- A. L2stretch
- B. DR02
- C. VDI
- D. DR01

**Answer: A,D**

Explanation:

\* For the NC2 cluster deployed in the North Virginia region (us-east-id), consuming IPs from the 10.78.2.0/24 range, the subnets configured within the same CIDR range of 10.78.0.0/16 will be recognized.

\* The subnetDR01 (10.78.2.0/24)is directly within the range of the deployed cluster.

\* The subnetL2stretch (10.19.101.0/24)is also configured in the NC2 AWS VPC, although not in the immediate range of the cluster, it may show up due to broader network configurations for stretched L2 operations.

\* SubnetsVDI (10.78.130.0/22)andDR02 (10.79.120.0/24), although part of the same VPC, are not directly within the immediate CIDR range or may not be recognized in this specific configuration scenario.

Refer to the Nutanix documentation on NC2 AWS VPC subnet configurations and Prism Element settings for detailed guidelines on network visibility and configuration.

### NEW QUESTION # 106

What are the supported NC2 on AWS instance types?

- A. i4i.4xlarge, i3.8xlarge, i7ie.2xlarge
- B. i3.metal, t2.micro, g4dn.xlarge, M5d.medium
- C. i3.metal, i3en.metal, i4i.metal
- D. i7ie.24xlarge, i4i.32xlarge, i3.12xlarge

**Answer: C**

### NEW QUESTION # 107

.....

Several advantages we now offer for your reference. On the one hand, our NCP-CI-AWS learning questions engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies, thus you can 100% trust our NCP-CI-AWS Exam Engine. On the other hand, the professional NCP-CI-AWS study materials determine the high pass rate. According to the research statistics, we can confidently tell that 99% candidates after using our products have passed the NCP-CI-AWS exam.
