If you decide to join us, you just need to spend one or two days to practice Web-Development-Applications Top Questions and remember the key knowledge of real dumps, the test will be easy for you.

### WGU Web Development Applications Sample Questions (Q108-Q113):

#### NEW QUESTION # 108

Which attribute is related to moving the mouse pointer of an element?

- A. onmouseenter
- B. Onmouseup
- C. Onmouseleave
- **D. Onmouseover**

**Answer: D**

Explanation:

The onmouseover attribute in HTML and JavaScript is used to execute a script when the mouse pointer is moved over an element.

\* onmouseover Attribute: This event occurs when the mouse pointer is moved onto an element. It is commonly used to change styles or content of the element when the user interacts with it by hovering.

\* Usage Example:

`<p onmouseover="this.style.color='red'">Hover over this text to change its color to red.</p>` In this example, the text color changes to red when the mouse pointer is moved over the paragraph.

References:

- \* MDN Web Docs on onmouseover
- \* W3C HTML Specification on Events

#### NEW QUESTION # 109

Given the following CSS:

□ What is being configured?

- A. Processing in the browser
- B. Processing on a server
- C. Rendering to the canvas

**Answer: A**

Explanation:

The given CSS configures properties that control the processing of animations directly in the browser.

\* CSS Animations: CSS animations are processed by the browser's rendering engine. The animations defined by CSS are handled client-side and do not require server-side processing.

\* Key Properties:

### NEW QUESTION # 110

A file named application, Appcache contains the following content:

Which attribute should a developer set to application. Appcache so the four files will be cached?

- A. The href attribute of the <Link> element
- B. The manifest attribute of the <html> element
- C. The srcset attribute of the <source> element
- D. The src attribute of the <script> element

**Answer: B**

Explanation:

To specify a cache manifest file for an HTML document, the manifest attribute must be set in the <html> element. This attribute tells the browser to cache the files listed in the manifest for offline use.

\* Cache Manifest:

\* Purpose: Specifies resources that should be cached by the browser.

\* Attribute: manifest is used in the <html> tag to link the cache manifest file.

\* Example:

\* Given the manifest file application.appcache:

CACHE MANIFEST

CACHE:

default.html

stylesheet.css

functions.js

logo.jpg

\* HTML with the manifest attribute:

```
<html manifest="application.appcache">
```

```
</html>
```

\* References:

\* MDN Web Docs - Offline Web applications

\* W3C HTML5 Specification - manifest attribute

### NEW QUESTION # 111

Give the following HTML code:

Which CSS property would make the corners of the div rounded?

- A. Border-width
- B. Border-collapse
- C. Border-radius
- D. Border-style

**Answer: C**

Explanation:

To make the corners of a div rounded, the CSS property border-radius is used. This property allows you to define how rounded the corners should be by specifying a radius.

\* CSS border-radius Property:

\* Syntax:

```
div {  
border-radius: 10px;  
}
```

\* Description: The value can be in pixels (px), percentages (%), or other units. Higher values create more rounded corners.

\* Example:

\* Given HTML:

```
<div>Sample</div>
```

\* Given CSS:

```
div {  
width: 100px;  
height: 50px;  
background-color: red;  
border-radius: 10px;  
}
```

:

MDN Web Docs -border-radius

W3C CSS Backgrounds and Borders Module Level 3

### NEW QUESTION # 112

What represents the value of the `pattern` attribute of an input element in an HTML form?

- A. A SQL statement
- B. A JavaScript function
- C. A style sheet
- **D. A regular expression**

**Answer: D**

Explanation:

> "The value of the `pattern` attribute must be a valid regular expression. This expression defines what input is considered valid."

> Used for input validation directly in HTML without relying on JavaScript.

References:

\* MDN Web Docs: pattern attribute

\* W3C HTML Form Validation Specification
