New CDCS-001 Study Guide | Best CDCS-001 Practice

Newest CDCS-001 Reliable Test Vce & Leading Offer in Qualification Exams & Unparalleled CDCS-001: Certified Data Centre Specialist (CDCS)

ExamBoosts is a website specifically provide the certification exam information sources for GAQM professionals. Through many reflects from people who have purchase ExamBoosts's products, ExamBoosts is proved to be the best website to provide the source of information about CDCS-001 Certification Exam. The product of CDCS-001 is a very reliable training tool for you. The answers of the exam exercises provided by ExamBoosts is very accurate. Our ExamBoosts's senior experts are continuing to enhance the quality of our training materials.

The CDCS-001 exam covers a wide range of topics related to data center management, including power and cooling, networking, storage, virtualization, security, and disaster recovery. CDCS-001 exam consists of 100 multiple-choice questions and must be completed within 120 minutes. The passing score for the exam is 70%, and candidates who pass the exam receive a certificate that is valid for three years.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20
For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:
Explanation
Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.
Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21
Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

New New CDCS-001 Study Guide | High Pass-Rate Best CDCS-001 Practice: Certified Data Centre Specialist (CDCS) 100% Pass

With the rapid market development, there are more and more companies and websites to sell CDCS-001 guide torrent for learners to help them prepare for exam. If you have known before, it is not hard to find that the study materials of our company are very popular with candidates, no matter students or businessman. Welcome your purchase for our CDCS-001 Exam Torrent. As is an old saying goes: Client is god! Service is first! It is our tenet, and our goal we are working at!

The CDCS-001 exam is ideal for IT professionals who are responsible for managing data centres or those who are looking to advance their careers in this field. CDCS-001 exam covers a wide range of topics including data centre design and architecture, power and cooling systems, security, disaster recovery and business continuity planning, and compliance. Passing the CDCS-001 Exam demonstrates that a candidate has the knowledge and skills to effectively manage data centre operations and ensure that they are reliable, efficient and secure.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q64-Q69):

NEW QUESTION # 64
How many approaches are there to remove unwanted heat from an IT environment?

- A. Five
- B. Six
- C. Four
- D. Seven

Answer: A

Explanation:
There are five common approaches to removing unwanted heat from an IT environment:
* Air conditioning: using mechanical cooling to remove heat from the air.
* Air economization: using outside air to cool the IT environment when the temperature is cooler than the desired temperature inside the data center.
* Liquid cooling: using a liquid coolant to absorb and remove heat from IT equipment.
* Evaporative cooling: using water evaporation to cool the air.
* Immersion cooling: submerging IT equipment in a liquid coolant to remove heat.

NEW QUESTION # 65
Which one of the following is an overall consideration for physical security?

- A. Identify the problem
- B. Apply the solution
- C. Apply the technology
- D. Define the problem

Answer: D

Explanation:
Defining the problem is an important overall consideration for physical security. This process involves identifying and analyzing the threats and vulnerabilities that could potentially affect the security of the system, as well as determining what steps need to be taken to mitigate these risks. This process should be done before any other steps are taken to ensure physical security, as it helps to ensure that the security measures are tailored to the specific needs of the system.

NEW QUESTION # 66
Which one of the following is an advantage of Air Cooled Self-Contained System?

- A. Lowest installation cost
- B. All components contain more than one unit
- C. It doesn't requires ductwork and/or dropped ceiling

- D. It has more heat removal capacity per unit

Answer: C

Explanation:
Air cooled self-contained systems are highly efficient and do not require ductwork and/or dropped ceiling for installation. This makes them a great choice for locations where installation costs are a major factor, such as in residential applications, or in places with limited space. Additionally, air cooled self-contained systems have more heat removal capacity per unit compared to water cooled systems, making them more cost- effective in the long run.

NEW QUESTION # 67

Which power distribution component is commonly used when multiple electrical devices are located in close proximity, particularly for audio, video, and computer equipment?

- A. Server plug
- B. Backup server
- C. Outlet strips
- D. Power distribution units (PDU) (Selected)

Answer: D

NEW QUESTION # 68

Which mounted system is used to cool small IT environments?

- A. Chilled Mounted System
- B. Air Mounted System
- C. Floor Mounted System
- D. Ceiling Mounted System

Answer: B

Explanation:
An air mounted system is often used to cool small IT environments. This type of cooling system is typically mounted on the wall or ceiling and works by blowing cool air into the room to lower the temperature. Air mounted systems are compact, easy to install and maintain, and can be a cost-effective solution for small spaces.
