Life is full of ups and downs. We cannot predicate what will happen in the future. To avoid being washed out by the artificial intelligence, we must keep absorbing various new knowledge. Our PL-600 learning questions will inspire your motivation to improve yourself. Tens of thousands of our loyal customers are benefited from our PL-600 Study Materials and lead a better life now after they achieve their PL-600 certification.

Microsoft PL-600 Certification Exam is an excellent way for solution architects to demonstrate their expertise in the Power Platform. PL-600 exam covers a wide range of topics and requires candidates to have a deep understanding of the platform and its components. Passing the exam can help individuals advance their careers and become more valuable to potential employers or clients.

Exam Domains

One should understand that the specialist must work closely with the technical and functional disciplines of the Power Platform. In other words, have the skill to make decisions along with configuring, securing, storing, and integrating them. So, there are three domains covered in the Microsoft PL-600 exam:

- **Implement the solution**

In addition, the latter question category involves key concepts like validating the solution designs and providing essential support for go-live. Under these sub-domains, resolving automation & integration conflicts, troubleshooting data migration, deployment plans related issues, and many other skills can be proved.

- **Architect a solution**

The key focus of the second exam domain is on validating a skilled force of solution architect related to the designing process leading, data model designing, and security model designing. Moreover, concepts like identifying data loss prevention (DLP) policies for a solution and designing the business continuity strategy, security & field security roles, collaboration, solution topology, and data visualization strategy solution are well-covered. This section is the most extensive of all and covers 40-

45% of the exam content.

- **Perform solution envisioning and requirement analyses**

Around 35-40% of exam content comes from this section that is all about solution planning, organization information and metrics spotting, identifying current solutions, requirement capturing, and performing tasks related to fit/gap analysis

PL-600 Exam Braindumps & PL-600 Test Quiz & PL-600 Practice Material

You must be curious about your exercises after submitting to the system of our PL-600 study materials. Now, we have designed an automatic analysis programs to facilitate your study. You will soon get your learning report without delay. Not only can you review what you have done yesterday on the online engine of the PL-600 study materials, but also can find your wrong answers and mark them clearly. So your error can be corrected quickly. Then you are able to learn new knowledge of the PL-600 Study Materials. Day by day, your ability will be elevated greatly. Intelligent learning helper can relieve your heavy burden. Our PL-600 study materials deserve your purchasing. If you are always waiting and do not action, you will never grow up.

Microsoft Power Platform Solution Architect Sample Questions (Q68-Q73):

NEW QUESTION # 68

You are designing a Microsoft Power Platform solution.

You need to identify the non- functional requirements for the organization.

Which three non-functional requirements should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. usability of business process flows
- **B. customer maintenance procedures**
- **C. time-to-load forms**
- **D. solution regulatory compliance**
- E. business rules to identify top customers

Answer: B,C,D

Explanation:

Non-functional requirements capture the elements that users might not directly care about but are important to support the proposed architecture and operational viability of the solution. Non-functional requirements often influence user adoption and perceived satisfaction with the solution.

Examples of common non-functional requirement types include:

Availability

Compliance/regulatory

Data retention/residency

Performance (response time, and so on)

Privacy

Recovery time

Security

Scalability

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

NEW QUESTION # 69

You are designing a solution to continually import data from several data sources into Microsoft Dataverse.

The solution must meet the following requirements:

* Include integrated error handling for records that fail to import successfully into Dataverse.

* Augment data with AI and machine learning models.

You need to select a component for each requirement

Which components should you use? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

☐

NEW QUESTION # 70

You need to recommend an authentication solution for the planned implementation of Dynamics 365. What should you include in the recommendation?

- A. Create a new tenant for Dynamics 365 Customer Service.
- **B. Use synchronized identities.**
- C. Use federated identities
- D. Use the Office 365 tenant for Dynamics 365 Customer Service.

Answer: B

Explanation:

Scenario: Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.

Synchronized identity. Synchronize on-premises directory objects with Microsoft 365 and manage your users on-premises. You can also synchronize passwords so that the users have the same password on-premises and in the cloud, but they will have to sign in again to use Microsoft 365.

<https://docs.microsoft.com/en-us/power-platform/admin/manage-user-account-synchronization>

NEW QUESTION # 71

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

☐

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

NEW QUESTION # 72

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

□
