## 300-610 Exam Questions in PDF Format

So our high efficiency 300-610 torrent question can be your best study partner. Only 20 to 30 hours study can help you acquire proficiency in the exam. And during preparing for 300-610 exam you can demonstrate your skills flexibly with your learning experiences. The rigorous world force us to develop ourselves, thus we can't let the opportunities slip away. Being more suitable for our customers the 300-610 Torrent question compiled by our company can help you improve your competitiveness in job seeking, and 300-610 exam training can help you update with times simultaneously.

The Cisco 300-610 Exam is one of the requirements for obtaining the CCNP Data Center certification. This test is crafted to check the individuals' understanding of designing the infrastructure of data centers, including their knowledge of networking, computing, storage networking, as well as automation. This is a concentration exam, which validates your expertise in working with the Cisco networking devices used by the companies worldwide. If you don't plan to deal with the Cisco 350-601 test to get CCNP Data Center, you will only earn the specialist-level certificate to have proof of your skills.

All in all, each candidate has to pass two exams to get certified. Cisco 350-601 is a core test that validates your knowledge base to prepare it for the specialized skills that you learn while studying for this qualifying exam. It focuses on the specific topics and verifies your expertise in working with data center solutions that imply their implementing, troubleshooting, designing, and configuring. The network engineers and administrators are the ideal applicants for this certification test to demonstrate their skills in taking advantage of scalable automation solutions and securing the infrastructure.

## Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q60-Q65):

### NEW QUESTION # 60

An engineer enables the HSRP feature on a Cisco Nexus 7000 Series Switch. It must be ensured that the switch manages packets that are sent to the local vPC MAC address, remote vPC MAC address, and HSRP virtual MAC address.

Which command accomplishes this goal?

- A. peer-gateway
- B. hsrp preempt
- C. map-server
- D. peer-switch

**Answer: A**

Explanation:

The peer-gateway command allows each vPC peer to intercept and process packets destined to the MAC address of the other peer (remote vPC MAC) as well as the local and HSRP virtual MAC addresses.

This prevents the need for such packets to traverse the vPC peer link, reducing unnecessary traffic and avoiding packet drops caused by vPC loop avoidance mechanisms.

It effectively enables the Nexus switches in a vPC domain to route packets destined for each other's MAC addresses and for the HSRP virtual MAC, ensuring proper forwarding and load sharing in the presence of HSRP and vPC.

### NEW QUESTION # 61

Refer to the exhibit. A company plans to implement high availability between the iSCSI host and the Fibre Channel target. Which solution must the company implement to recover from a failure of a host NIC, MDS IP storage port, or Fibre Channel target port?

- A. Set up IP storage ports to export the two Fibre Channel target ports
- B. Configure FCoE between the host NICs and MDS ports
- C. Map the Fibre Channel target ports to one IP storage port
- D. Implement HSRP on the MDS IP storage ports

**Answer: C**

#### NEW QUESTION # 62

A client in a commercial building installs a Cisco blade server in the multitenant Cisco UCS blade Infrastructure. To cut operating costs the client's data center is shared with other organizations. The client asks an engineer prevent third parties from accessing their equipment and from accessing BIOS-related information when booting a server. Which Two policies must be used to meet these requirements? (Choose two.)

- A. front panel lockout
- B. ASPM support
- C. post error pause
- D. quiet boot
- E. CDN control

**Answer: D,E**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/unified\\_computing/ucs/ucs-manager/GUI-User-Guides/Server-Mgmt/3-2/b\\_Cisco\\_UCS\\_Manager\\_Server\\_Mgmt\\_Guide\\_3\\_2/b\\_Cisco\\_UCS\\_Manager\\_Server\\_Mgmt\\_Guide\\_3\\_2\\_chapter\\_01110.html](https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/ucs-manager/GUI-User-Guides/Server-Mgmt/3-2/b_Cisco_UCS_Manager_Server_Mgmt_Guide_3_2/b_Cisco_UCS_Manager_Server_Mgmt_Guide_3_2_chapter_01110.html)

Quiet boot is what the BIOS displays during booting the server. If enabled, the BIOS displays the logo screen.

I believe that quiet boot and CDN control may have the customer name.

#### NEW QUESTION # 63

Which orchestration tool provides a graphical interface to manage LAN and SAN fabrics?

- A. Cisco Data Center Network Manager
- B. Cisco Nexus Fabric Manager
- C. Cisco Virtual Topology System
- D. Cisco CloudCenter

**Answer: C**

#### NEW QUESTION # 64

Which multicast rendezvous point redundancy mode is valid for Bidirectional PIM?

- A. PIM anycast RP
- B. Phantom RP

- C. MSDP
- D. Embedded RP

**Answer: B**

Explanation:

Check the Phantom RP section in:

[https://www.cisco.com/c/en/us/products/collateral/ios-nx-os-software/ip-multicast/whitepaper\\_c11-508498.html](https://www.cisco.com/c/en/us/products/collateral/ios-nx-os-software/ip-multicast/whitepaper_c11-508498.html)

[https://www.cisco.com/c/dam/en/us/products/collateral/ios-nx-os-software/multicast-enterprise/prod\\_white\\_paper0900aecd80310db2.pdf](https://www.cisco.com/c/dam/en/us/products/collateral/ios-nx-os-software/multicast-enterprise/prod_white_paper0900aecd80310db2.pdf)

Because multicast source information is no longer available in Bidir, the Anycast/MSDP mechanism used to provide redundancy in sparse-mode is not an option for Bidir.
