問題 #12

Universal Containers assigns system access via permission sets and permission set groups to ensure each user has proper access. One department with varying levels of support staff has five consistent permission sets they require in order to complete their duties. Some higher-level staff have additional permission sets that are only required for them. How should an app builder recommend assigning permission sets to users?

- A. Utilize the manage assignments button to assign each user with the same set of permission set groups and permission sets.
- **B. Utilize the manage assignments button to assign a permission set group and additional individual permission sets to each user.**
- C. Utilize the Data Import Wizard to mass update the desired users with their full list of permission sets and permission set groups.
- D. Utilize the Data Loader to mass update the desired users with their full list of permission sets and permission set groups.

答案： B

解題說明：

Explanation

The app builder should recommend utilizing the manage assignments button to assign a permission set group and additional individual permission sets to each user. This way, the app builder can assign the five consistent permission sets to all users in one permission set group, and then assign additional permission sets to higher-level staff as needed. Option B is incorrect because it will not account for the varying levels of support staff and their different permission sets. Option C is incorrect because the Data Import Wizard cannot

be used to assign permission sets or permission set groups to users. Option D is incorrect because the Data Loader cannot be used to assign permission set groups to users.

問題 #13

Universal Containers provides access to Salesforce for their sales, service and marketing teams. Management wants to ensure that when users log in, their home tab provides access to links and documentation that are specifically relevant to their job function. How can this requirement be met?

- A. Expose specific elements within a home page custom components determined by profile.
- B. Expose specific elements within a home page custom component determined by role.
- C. Create separate home page custom components and layouts; assign to users by role.
- **D. Create separate home page custom components and layouts; assign to users by profile**

答案： D

問題 #14

In order to create an App Launcher component in Lightning what must an admin do?

- A. Navigate to Setup-Customize-User Interface to enable the component for the Lightning App Builder.
- B. Join the pilot Lightning App Builder team.
- C. Purchase a license for the Lightning App Builder.
- **D. Contact Salesforce to have the component activated for the Lightning App Builder.**

答案： D

問題 #15

Universal Containers created a custom object called Component to capture details about products sold. What approach should an app builder take to show Component as a related list on Product?

- A. Create a junction object to relate Component and Product. Add the Component related list to the Product page layout.
- B. Create a master-detail relationship on Product to Component. Add the Component related list to the Product page layout.
- C. Create a roll-up on Product. Add the Component related list to the Product page layout.
- **D. Create a lookup relationship on Component to Product. Add the Component related list to the Product page layout.**

答案： D

解題說明：

To show Component as a related list on Product, a lookup relationship on Component to Product should be created. A lookup relationship creates a loose association between two objects and allows users to relate records from one object to another. A lookup relationship also allows users to add the related list of the child object to the parent object's page layout.

問題 #16

You have a team of developers who need logins to sandbox. What's the best way to give them access?

- A. Have them login as one of the users in production.
- B. Create them as users in sandbox, then deactivate the same number of users in production.
- C. Use Developer Edition to log into sandbox.
- **D. Create them as inactive users in production.**

答案： D
