## ISO-IEC-27001-Foundation Hottest Certification, Reliable ISO-IEC-27001-Foundation Braindumps Questions

Candidates can also check the explanations for the answers to have more understanding of the APMG-International ISO-IEC-27001-Foundation questions that are asked on the ISO-IEC-27001-Foundation practice test by Itcertking You can customize the APMG-International ISO-IEC-27001-Foundation exam questions and time for the ISO-IEC-27001-Foundation practice exam on the software. Assessing their APMG-International ISO-IEC-27001-Foundation Exam Preparation and speed on the practice exam software helps candidates in making required improvements and succeeding at the APMG-International ISO-IEC-27001-Foundation exam. The software by Itcertking gives the candidates the results and progress reports to help them monitor their performance for the APMG-International ISO-IEC-27001-Foundation exam.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q35-Q40):

#### NEW QUESTION # 35

Which information is required to be included in the Statement of Applicability?

- A. The risk assessment approach of the organization
- B. The scope and boundaries of the ISMS
- C. The justification for including each information security control
- D. The criteria against which risk will be evaluated

**Answer: C**

Explanation:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

#### NEW QUESTION # 36

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. A statement of correspondence between other ISO standards and the ISMS
- B. Records of management decisions related to continual improvement
- C. Third party information security awareness materials
- D. The budget assigned to operate the ISMS and its related allocations

**Answer: B**

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement

opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third-party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review decisions related to continual improvement, confirming answer: A.

### NEW QUESTION # 37

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

\* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

\* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 2 is true
- **B. Only 1 is true**
- C. Both 1 and 2 are true
- D. Neither 1 or 2 is true

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC

27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them.

However, ISO/IEC 27002 does not provide a process for risk management that is covered by ISO/IEC

27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).

Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

### NEW QUESTION # 38

Which statement about the conduct of audits is true?

- A. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- **B. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- C. Third party audits are conducted by a customer of the organization
- D. During Stage 1 of a certification audit, evidence is collected by observing activities

**Answer: B**

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

### NEW QUESTION # 39

In which clause would the requirements for internal audit be found?

- A. Operation
- B. Improvement
- C. Planning

- **D. Performance Evaluation**

**Answer: D**

Explanation:

The requirements for internal audit are explicitly placed in Clause 9.2 (Performance Evaluation) of ISO/IEC 27001:2022. The standard requires:

\* "The organization shall conduct internal audits at planned intervals to provide information on whether the information security management system... conforms to the organization's own requirements... and to the requirements of this document." (9.2.1)

\* "The organization shall plan, establish, implement and maintain an audit programme(s)..." (9.2.2) This clause clearly falls under Performance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer is C.

## NEW QUESTION # 40

.....

It is known to us that to pass the ISO-IEC-27001-Foundation exam is very important for many people, especially who are looking for a good job and wants to have a ISO-IEC-27001-Foundation certification. Because if you can get a certification, it will be help you a lot, for instance, it will help you get a more job and a better title in your company than before, and the ISO-IEC-27001-Foundation Certification will help you get a higher salary. We believe that our company has the ability to help you successfully pass your exam and get a ISO-IEC-27001-Foundation certification by our ISO-IEC-27001-Foundation exam torrent.
