If you have bad mood while testing, you can choose to practice many times with 1z0-1057-25 reliable practice exam vce online, you will be used in exam feel, have a strong psychological diathesis, and finally get out of examination-phobia.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which data format is supported by SOAP Web services to establish communication between web services consumers and web

services providers?

- A. JSON
- **B. XML**
- C. CSV
- D. XLSX

Answer: B

Explanation:

XML (Extensible Markup Language) is the data format that is supported by SOAP (Simple Object Access Protocol) Web services to establish communication between web services consumers and web services providers. XML is a standard format that allows data to be exchanged across different platforms and applications. SOAP Web services use XML to encode the messages and data that are sent and received between the web services endpoints. NEW QUESTION # 17

Which three are project gate statuses? (Choose three.)

- **A. Open**
- **B. In Review**
- **C. Closed**
- D. Approve
- E. Draft

Answer: A,B,C

Explanation:

Project gate statuses are values that indicate the progress or completion of a project gate. A project gate is a checkpoint that marks the end of a phase or stage in a project lifecycle. Three of the project gate statuses are:

* Open: This status indicates that the project gate is not yet ready for review or approval.

* In Review: This status indicates that the project gate is under review or approval by the gate reviewers or approvers.

* Closed: This status indicates that the project gate has been reviewed or approved and the project can move to the next phase or stage. Approve and Draft are not project gate statuses, but actions that can be performed on a project gate. Approve is an action that allows a gate approver to approve a project gate and change its status to Closed. Draft is an action that allows a gate owner to create or edit a project gate and change its status to Open. NEW QUESTION # 19

You have been hired as a project manager for implementing the Project Financial Management and Project Execution Management offering by an organization. The Chief Information Officer of the deploying organization has requested you to explain the benefits of using the implementation project-based approach over the functional area-based approach.

Which two are the main benefits of using the implementation projects within Functional Setup Manager?
(Choose two.)

- **A. Implementation Project helps in assigning responsibility of managing setup data to a broad group of users.**
- B. Implementation Project gives you the flexibility to set up different functional areas of the offering at different times.
- C. Implementation Project helps you to use the manage setup data entry in bulk option.
- **D. Implementation Project helps you to monitor progress of the setup tasks.**

Answer: A,D

Explanation:

Some of the main benefits of using the implementation projects within Functional Setup Manager are:

* Implementation Project helps in assigning responsibility of managing setup data to a broad group of users. You can assign tasks to different users who are responsible for entering and validating setup data for different functional areas of the offering.

* Implementation Project helps you to monitor progress of the setup tasks. You can track the status and completion percentage of each task and view the dependencies and prerequisites among tasks.

Implementation Project does not give you the flexibility to set up different functional areas of the offering at different times, as this is determined by the configuration package that you select for your implementation. Implementation Project does not help you to use the manage setup data entry in bulk option, as this is a separate feature that allows you to import and export setup data across instances using spreadsheets.
