FCP_FAC_AD-6.5 Reliable Braindumps Ppt, FCP_FAC_AD-6.5 Certification Torrent

Getting tired of humdrum life, you may want to get some successful feeling or try something different instead. We all know that is of important to pass the FCP_FAC_AD-6.5 exam and get the FCP_FAC_AD-6.5 certification for someone who wants to find a good job in internet area, and it is not a simple thing to prepare for exam. So you are in the right place now. The FCP_FAC_AD-6.5 practice materials are a great beginning to prepare your exam. Actually, just think of our Fortinet practice materials as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.

Fortinet FCP—FortiAuthenticator 6.5 Administrator Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which FortiAuthenticator feature allows users to authenticate against different back-end databases when using a single RADIUS policy?

- **A. Realms**
- B. User Groups
- C. LDAP services
- D. RADIUS attributes

Answer: A

Explanation:

Realms in FortiAuthenticator allow mapping of authentication requests to different back-end databases within a single RADIUS policy, enabling user authentication across multiple directories or identity sources.

NEW QUESTION # 49

What is the main purpose of active authentication in network security?

- A. Detecting software vulnerabilities
- B. Monitoring network traffic
- C. Accelerating internet speeds
- **D. Enforcing access controls based on user identity**

Answer: D

NEW QUESTION # 50

When performing a remote LDAP server integration with FortiAuthenticator, how do server type templates assist with the integration?

- **A. They populate the query element fields with defined attribute and class values.**
- B. They define the connection security and domain authentication settings for each LDAP server you integrate with.
- C. They autopopulate the simple and regular bind settings.
- D. They automatically set the LDAP user auto provisioning settings.

Answer: A

Explanation:

Server type templates in FortiAuthenticator assist LDAP integration by prepopulating the query element fields with the correct attribute and class values for the selected LDAP server type, simplifying configuration and ensuring accurate directory queries.

NEW QUESTION # 51

Refer to the exhibits.

Source IP	192.168.10.10
Message	User authentication(mschap) with no token failed: user not found
User	student
Log Type	
Type Id	20320
Name	Authentication Failed User Not Found
Sub Category	Authentication
Category	Event
Description	Authentication failed, user not found

An administrator has configured several wireless APs to use FortiAuthenticator as their RADIUS server. One user is unable to successfully authenticate. The user record exists in the system, but the FortiAuthenticator log shows Authentication failed, user not found.

What is the most likely cause of the problem?

- A. RADIUS authentication is not enabled for the user.
- B. The RADIUS traffic is being sourced from an IP address not listed as NAS.
- C. No client entry exists for the authenticating AP.
- D. The RADIUS secret is incorrect.

Answer: A

Explanation:

The log message indicates that FortiAuthenticator cannot find the user during RADIUS authentication, even though the user exists in the system. This typically happens when RADIUS authentication is not enabled for that user account, preventing FortiAuthenticator from using it for RADIUS login requests.

NEW QUESTION # 52

How does FortiAuthenticator integrate with Active Directory (AD) to detect logon events?

- A. By creating duplicate user accounts in FortiAuthenticator
- B. By syncing user passwords between FortiAuthenticator and AD
- C. By requiring users to log in twice for enhanced security
- D. By analyzing AD logs to track user logon activities

Answer: D

NEW QUESTION # 53
