P.S. Free 2026 ServiceNow CAD dumps are available on Google Drive shared by ActualVCE: <https://drive.google.com/open?id=1cVreR62GOsCXZQ8Qr5Q2YoiEKDbGx8Qr>

Our CAD exam preparation materials have a higher pass rate than products in the same industry. If you want to pass CAD certification, then it is necessary to choose a product with a high pass rate. Our CAD study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. The 99% pass rate is the proud result of our CAD Study Materials. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain CAD certification.

Passing the CAD exam is a significant achievement for developers who work with the ServiceNow platform. Certified Application Developer-ServiceNow certification demonstrates that the developer has the skills and knowledge required to design and develop custom applications on the platform. It also validates that the developer has a deep understanding of the platform's capabilities and can use it to solve complex business problems.

ServiceNow Certified Application Developer (CAD) exam is one of the most sought-after certifications in the IT industry. ServiceNow is a cloud-based platform that provides IT service management (ITSM), IT operations management (ITOM), and IT business management (ITBM) solutions. The CAD certification validates an individual's expertise in developing applications on the ServiceNow platform, which is used by organizations worldwide. Certified Application Developer-ServiceNow certification exam tests an individual's knowledge and skills in developing, configuring, and implementing ServiceNow applications using various tools and techniques.

ServiceNow CAD (Certified Application Developer-ServiceNow) certification exam is a globally recognized certification that offers a comprehensive understanding of ServiceNow's platform. Certified Application Developer-ServiceNow certification validates the skills and knowledge required to develop and deploy applications on the ServiceNow platform. The CAD certification exam is designed to test the candidate's ability to design, develop, and implement ServiceNow applications using best practices and industry standards.

We are here to provide you the high quality CAD Braindumps Pdf for the preparation of the actual test and ensure you get maximum results with less effort.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q279-Q284):

NEW QUESTION # 279

Which one of the following is NOT a purpose of application scoping?

- A. Provide controls for how scripts from another scope can alter tables in a scoped application
- B. Provide a namespace (prefix and scope name) to prevent cross application name collisions
- C. Provide a way of tracking the user who developed an application
- D. **Provide a relationship between application artifacts**

Answer: D

Explanation:

The purpose of application scoping is NOT to provide a way of tracking the user who developed an application. Application scoping does not store or display information about the user who created or modified an application or its artifacts. The purpose of application scoping is to provide a relationship between application artifacts, provide a namespace to prevent cross-application name collisions, and provide controls for how scripts from another scope can alter tables in a scoped application. Reference: [Product Documentation | ServiceNow], [Advantages of Scoped Applications in ServiceNow]

NEW QUESTION # 280

The source control operation used to store local changes on an instance for later application is called a(n) <blank>.

- A. Tag
- B. Branch
- C. **Stash**
- D. Update set

Answer: C

Explanation:

Explanation/Reference: https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t_StashLocalChanges.html

NEW QUESTION # 281

What is the ServiceNow store?

- A. **Marketplace for free and paid certified ServiceNow applications and integrations**
- B. Downloadable content ServiceNow script archive
- C. The source for ServiceNow Community created developer content
- D. Alternate name for the ServiceNow Developer Share site

Answer: A

Explanation:

The ServiceNow Store is a marketplace for free and paid certified ServiceNow applications and integrations.

The ServiceNow Store provides customers with access to Now Certified enterprise workflow apps from partners that complement and extend ServiceNow products and solutions. Customers can browse, try, buy, and deploy apps and integrations that suit their needs and enhance their ServiceNow experience. The ServiceNow Store is not the source for ServiceNow Community created developer content, as that is available on the Developer Portal or the Share site. The ServiceNow Store is not a downloadable content ServiceNow script archive, as that is available on the Script Library or the Script Repository. The ServiceNow Store is not

an alternate name for the ServiceNow Developer Share site, as that is a separate site where developers can share applications, code snippets, UI pages, etc. Reference: ServiceNow Store

NEW QUESTION # 282

Once an application is ready to share, which of the following methods of publishing are supported by ServiceNow?

Choose 3 answers

- A. Publish to a local USB device
- B. Publish to a spreadsheet
- C. Publish to an application repository
- D. Publish to a local drive
- E. Publish to an Update Set
- F. Publish to the ServiceNow Store

Answer: C,E,F

Explanation:

ServiceNow supports publishing an application to an application repository, an Update Set, or the ServiceNow Store. These methods allow the application to be installed on other instances or shared with other users.

Publish an application to the application repository

4 Ways to Publish a ServiceNow Application

Publish applications to the ServiceNow Store

NEW QUESTION # 283

Which of the following methods are useful in Access Control scripts?

- A. gs.hasRole() and current.isNew()
- B. gs.hasRole() and current.isNewRecord()
- C. g_user.hasRole() and current.isNew()
- D. g_user.hasRole() and current.isNewRecord()

Answer: B

Explanation:

Access Control scripts are server-side scripts that run when an Access Control rule is evaluated. They can use the gs and current objects to access the GlideSystem and GlideRecord methods, respectively. Some of the useful methods in Access Control scripts are:

gs.hasRole() - This method checks if the current user has a specified role. It returns true if the user has the role, and false otherwise. For example, gs.hasRole('admin') will return true if the user is an administrator, and false otherwise.

current.isNewRecord() - This method checks if the current record is a new record that has not been inserted into the database yet. It returns true if the record is new, and false otherwise. For example, current.isNewRecord() will return true if the record is being created, and false if the record is being updated or deleted.

The methods g_user.hasRole() and current.isNew() are not part of the server-side scripting API. They are part of the client-side scripting API, which is used in Client Scripts and UI Policies. They cannot be used in Access Control scripts.
