- B. To get all email conversations with more than 15 minutes of Agent Handle Time for a specific queue in descending order.
- C. To get all email conversations with more than 15 minutes of Agent Handle Time for a specific queue in ascending order.
- D. To get all email conversations with less than 15 minutes of Agent Handle Time for a specific queue in descending order.

Answer: B

Explanation:

The query specifies "mediaType" as email, indicating that it is focused on email conversations. It filters by "queueId", suggesting the conversations are filtered by a specific queue. The "Handle" metric is used, and it has a condition of gt 90000, which translates to more than 15 minutes of handle time (since handle time is typically measured in milliseconds, and 90000 ms equals 90 seconds or 1.5 minutes).

This query filters for email conversations where the handle time is greater than 15 minutes, with the results ordered in ascending order based on the conversation start time.
