## Actual NCP-DB-6.10 Test Answers, NCP-DB-6.10 Valid Exam Prep

All formats of Exam4Free's products are immediately usable after purchase. We also offer up to 365 days of free updates so you can prepare as per the Nutanix NCP-DB-6.10 Latest Exam content. Exam4Free offers a free demo version of the Nutanix Certification Exams so that you can assess the validity of the product before purchasing it.

## Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q52-Q57):

### NEW QUESTION # 52

An administrator needs to take multiple snapshots per day and retain them for one week. How should the administrator define and schedule the SLA?

- A. - Weekly snapshot retention: 1 week  
- Daily Snapshot at: 2
- B. - Daily snapshot retention: 7 days  
- Snapshots per Day: 2
- C. - Weekly snapshot retention: 1 week

- Snapshots per Day: 2
- D. - Daily snapshot retention: 7 days
- Daily snapshot at: 2

**Answer: B**

Explanation:

It matches the requirement of taking multiple snapshots per day and retaining them for one week.

#### **NEW QUESTION # 53**

What must be completed within NDB before patching a Linux OS?

- A. Configure database high availability.
- **B. Configure the repository.**
- C. Update the software profile version.
- D. Update the database.

**Answer: B**

Explanation:

Before patching a Linux OS on a database server VM provisioned using NDB, you must configure the repository for the OS updates. This can be done by creating a Repository Profile in NDB and specifying the URL, username, and password for the repository. The Repository Profile can be applied to one or more database server VMs during the provisioning process or later. By configuring the repository, you ensure that NDB can access and download the latest OS patches from a trusted source.

#### **NEW QUESTION # 54**

Which NDB HA control plane VM is upgraded first during an NDB upgrade?

- A. NDB Server
- B. NDB Agent VMs
- C. Leader HAProxy
- **D. Leader NDB API Server**

**Answer: D**

Explanation:

During an NDB upgrade, the upgrade process follows a specific order to maintain stability and HA. The Leader NDB API Server is upgraded first. This server coordinates API requests and ensures the control plane remains operational. Upgrading the leader first minimizes disruption, as subsequent components (e.g., other API servers, HAProxy) rely on its leadership role. Once the leader is upgraded, the remaining NDB HA control plane VMs (e.g., follower API servers, HAProxy) are updated in sequence.

#### **NEW QUESTION # 55**

How long is the default continuous recovery for the Gold SLA in Era Time Machine?

- A. 60 days
- B. 15 days
- C. 90 days
- **D. 30 days**

**Answer: D**

Explanation:

The default continuous recovery for the Gold SLA in Era Time Machine is 30 days. This means that the system keeps a continuous recovery point for the last 30 days, allowing you to restore your database to any point within this period.

#### **NEW QUESTION # 56**

How does NDB send notifications when alerts are generated?

- **A. Email**
- B. SNMP
- C. Pulse
- D. APIs

**Answer: A**

Explanation:

NDB sends notifications when alerts are generated via email. The email notifications can be configured to send to one or more recipients, and can be customized to include the alert severity, category, description, and resolution steps. The email notifications help to inform the database administrator and other stakeholders about the status and issues of the NDB-managed databases and operations.

NDB does not send notifications via SNMP, APIs, or Pulse. SNMP is a protocol for collecting and organizing information about managed devices on a network. APIs are interfaces for communicating and exchanging data between different applications or systems. Pulse is a feature of the Nutanix cluster that collects and sends diagnostic and usage data to Nutanix for analysis and support.

## NEW QUESTION # 57

.....

Our NCP-DB-6.10 exam braindumps are famous for its advantage of high efficiency and good quality which are carefully compiled by the professionals. Our excellent professionals are furnishing exam candidates with highly effective NCP-DB-6.10 Study Materials, you can even get the desirable outcomes within one week. By concluding quintessential points into NCP-DB-6.10 actual exam, you can pass the exam with the least time while huge progress.
