

# Latest NCP-EUC Study Materials | Reliable NCP-EUC Study Plan

What's more, part of that TrainingDumps NCP-EUC dumps now are free: <https://drive.google.com/open?id=1pT0QmKZjihAz5PJ6ySKRQFcxbtRM2LlB>

You can use NCP-EUC guide materials through a variety of electronic devices. At home, you can use the computer and outside you can also use the phone. Now that more people are using mobile phones to learn our NCP-EUC study materials, you can also choose the one you like. One advantage is that if you use our NCP-EUC Practice Questions for the first time in a network environment, then the next time you use our study materials, there will be no network requirements. You can open the NCP-EUC real exam anytime and anywhere.

Nutanix NCP-EUC certification is a valuable certification that can help IT professionals enhance their careers. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification validates the skills and knowledge of individuals in deploying and managing Nutanix EUC solutions, which are in high demand in the IT industry. With this certification, IT professionals can demonstrate their expertise in Nutanix EUC solutions and increase their credibility with potential employers. Additionally, the certification can help IT professionals advance their careers by opening up new job opportunities and increasing their earning potential.

To be eligible for the NCP-EUC Certification Exam, candidates must have at least six months of experience in deploying and managing end-user computing solutions using Nutanix technology. They must also have a solid understanding of VMware vSphere, Microsoft Windows Server, and desktop operating systems like Windows 10.

## Reliable Nutanix NCP-EUC Study Plan & NCP-EUC Reliable Braindumps Pdf

TrainingDumps's Nutanix NCP-EUC exam training materials is the best training materials. If you are an IT staff, it will be your indispensable training materials. Do not take your future betting on tomorrow. TrainingDumps's Nutanix NCP-EUC exam training materials are absolutely trustworthy. We are dedicated to provide the materials to the world of the candidates who want to participate in IT exam. To get the Nutanix NCP-EUC Exam Certification is the goal of many IT people & Network professionals. The pass rate of TrainingDumps is incredibly high. We are committed to your success.

Nutanix NCP-EUC (Nutanix Certified Professional - End-User Computing) Certification Exam is a comprehensive exam designed to test the skills and knowledge of professionals working in the field of end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is intended for professionals who are responsible for designing, implementing, and managing end-user computing solutions using Nutanix technology.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

Recently, the vice president Of IT infrastructure was migrated from a physical computer to a virtual desktop. The administrator wants to ensure that this user has the best possible experience and wants to be notified if any CPU resource constraints.

The cluster's average CPU utilization is 20%.

What step would help the administrator to know when there are resource problems on the virtual desktop?

- A. Create a new alert policy to alert if the CPU on the virtual desktop is over and configure a Playbook to power off the virtual desktop.
- **B. Create a new alert policy to alert if the CPU on the virtual desktop is over and configure a Playbook to Slack the information to the administrator,**
- C. Create a new alert policy to alert if the CPU on the virtual desktop's cluster is over 90%.
- D. Create a new alert policy to alert if the CPU on the virtual desktop's host is over 90%.

**Answer: B**

Explanation:

Alert policies are rules that define the conditions for generating alerts on Nutanix clusters<sup>1</sup>. You can create custom alert policies based on your specific needs and preferences<sup>2</sup>. Playbooks are automated workflows that perform actions based on triggers such as alerts<sup>3</sup>. You can create playbooks using predefined alerts or alerts matching criteria<sup>3</sup>.

To ensure that the vice president of IT infrastructure has the best possible experience and to be notified if any CPU resource constraints on the virtual desktop, one possible solution is to create a new alert policy to alert if the CPU on the virtual desktop is over a certain threshold (for example, 80%) and configure a playbook to send a notification (for example, via email or Slack) to the administrator<sup>2,3</sup>. This way, the administrator can monitor the performance of the virtual desktop and take appropriate actions if needed.

#### NEW QUESTION # 57

Refer the exhibit.

Which statement is true?

- A. Five instances are running Tuesday and Thursday from 09:00 am till 05:00 pm.
- **B. Five instances are running Tuesday and Thursday from 00:00am till 24:00 pm**
- C. Five instances are running on every Weekday fro, 00:00am till 24:00 pm
- D. Five instances are running on every Weekday from 09:00am till 05:00 pm

**Answer: B**

Explanation:

The schedule has two rows: one for Weekdays and one for Tuesday and Thursday.

Each row has a column for Instances, which indicates how many instances should be running during that time range.

Each row also has a column for Time Range, which indicates the start and end time for running the instances.

The time range is expressed in 24-hour format, where 00:00 means midnight and 24:00 means midnight of the next day.

According to the exhibit, the schedule Dev has the following settings:

\* On Weekdays (Monday to Friday), five instances are running from 09:00 am till 05:00 pm.

\* On Tuesday and Thursday, five instances are running from 00:00 am till 24:00 pm.

#### NEW QUESTION # 58

An administrator is upgrading a 3-node Nutanix Files Server during a routine maintenance window. The administrator observes that users experience connectivity problems with their profile containers becoming disconnected from their virtual desktops when a File Server VM (FSVM) reboots. What could be implemented to address this?

- A. Add additional File Server VMs (FSVM).
- B. Configure Access-based enumeration on the share.
- **C. Configure Continuous Availability on the share.**
- D. Use a Standard Share within Nutanix Files.

**Answer: C**

Explanation:

To support non-disruptive operations for sensitive workloads such as VDI user profiles (e.g., FSLogix or Citrix Profile Management), Nutanix Files supports Continuous Availability (CA) for SMB shares.

Standard SMB shares may experience a brief pause or disconnect during an FSVM failover or upgrade (rolling reboot), which causes VDI profile containers to detach, leading to application crashes or session hangs. Continuous Availability enables persistent file handles, allowing the client session to transparently failover to another FSVM node without disconnecting the application or user session. This is the specific feature designed to address connectivity issues during maintenance windows for VDI workloads.

### NEW QUESTION # 59

A previous administrator provisioned all of the virtual desktops in a virtual desktop Nutanix cluster using the following specifications:

- \* 6 vCPU
- \* 8 GB Memory
- \* 300 GB HDD

How can the current administrator best prepare next fiscal year's budget using Prism Central?

- **A. Execute Capacity Runway scenario.**
- B. Review most recent in Tasks.
- C. Execute a Calm blueprint to add additional desktops.
- D. Review the most recent in Audits.

**Answer: A**

Explanation:

In Nutanix Prism Central, the Capacity Runway scenario provides details on the available capacity for the next 12 months based on the current usage pattern. This feature can help the administrator to plan and prepare the budget for the next fiscal year. The administrator can use this information to decide whether more resources need to be added to the Nutanix cluster or if the existing resources are sufficient.

<https://www.nutanix.com/products/prism/prism-central>

Prism Central planning tools can help you estimate the capacity runway of your cluster by considering the storage, CPU, and memory capacity. However, you need to have at least 21 days of data from a cluster to calculate the baseline runway estimates<sup>4</sup>.

### NEW QUESTION # 60

What should the administrator do to optimize the virtual desktop environment?

- A. remove memory reservation.
- B. Add more resources to the cluster,
- C. Set Host policy to Balanced.
- **D. Verify if VAAI plugin is running.**

**Answer: D**

Explanation:

one of the possible ways to optimize the virtual desktop environment is to verify if VAAI plugin is running. VAAI (vStorage APIs for Array Integration) is a technology that enables VMware ESXi hosts to offload storage operations to Nutanix storage controllers. This can improve performance and efficiency of cloning, migrating, and snapshotting virtual machines<sup>234</sup>.
