To study and pass the NAHQ CPHQ Certification Exam on the first attempt, our NAHQ CPHQ practice test software is your best option.

## What Is CPHQ All About?

CPHQ, or Certified Professional in Healthcare Quality, is a certification designed by the National Association for Healthcare Quality (NAHQ) for healthcare professionals who have demonstrated expertise in the vital CPHQ body of knowledge. These consist of the strategic roles needed in leadership, information management, performance measurement, and operational healthcare tasks. With your mastery of the key aspects, you can easily shape your career as a leader in the field and proficiently handle healthcare facilities and systems.

The CPHQ exam that one should pass to become accredited has a total of 140 questions in multiple-choice format. However, only 125 of them are to be used when measuring your score. This is a computerized test that can be taken throughout the year at one of the accredited PSI testing centers.

The CPHQ Certification is highly respected in the healthcare industry and is recognized as a mark of excellence in healthcare quality management. Earning the CPHQ credential demonstrates a commitment to professional development and a dedication to improving the quality of healthcare services. For healthcare quality professionals seeking to advance their careers and make a real difference in the healthcare industry, the NAHQ CPHQ Certification Exam is an excellent opportunity to validate their knowledge and skills and take their career to the next level.

Our objective is to provide you with the best learning material to clear the Certified Professional in Healthcare Quality Examination (CPHQ) exam.

### NAHQ Certified Professional in Healthcare Quality Examination Sample Questions (Q176-Q181):

#### NEW QUESTION # 176

Which of the following is an example of a social determinant of health used to monitor a quality improvement initiative?

- A. diabetes status
- **B. neighborhood**
- C. age
- D. race

**Answer: B**

Explanation:

A social determinant of health refers to the conditions in which people are born, grow, live, work, and age, which can influence health outcomes. "Neighborhood" is an example of a social determinant of health, as it encompasses various factors like access to healthcare, safety, environmental conditions, and availability of healthy foods, which can all affect health outcomes and are often monitored in quality improvement initiatives.

\* Diabetes status (A): This is a health condition, not a social determinant.

\* Race (B): While race can impact health disparities, it is considered a demographic factor rather than a direct social determinant of health.

\* Age (C): This is a demographic factor that affects healthcare needs, but it is not categorized as a social determinant of health.

#### NEW QUESTION # 177

Which of the following is an essential step in the strategic planning process?

- A. defining organizational structure
- **B. establishing organizational goals**
- C. determining productivity indicators
- D. establishing and controlling a budget

**Answer: B**

Explanation:

Strategic planning is a process through which business leaders map out their vision for their organization's growth and how they're going to get there<sup>12345</sup>. During the strategic planning process, stakeholders review and define the organization's mission and goals, conduct competitive assessments, and identify company goals and objectives<sup>12</sup>. The product of the planning cycle is a strategic plan, which is shared throughout the company<sup>12</sup>. Therefore, establishing organizational goals is an essential step in the strategic planning process.

**NEW QUESTION # 178**

Continuous variable measures and rate-based measures are the further categories of:

- A. Outcome measures
- B. Structure measures
- C. All of these
- **D. Process measures**

**Answer: D**

**NEW QUESTION # 179**

Which of the following represents an unintended consequence of payer-driven quality initiatives?

- **A. Increased use of healthcare services**
- B. Improved population health
- C. Increased use of performance data by stakeholders
- D. Improved patient care

**Answer: A**

Explanation:

Detailed Explanation:

Increased use of healthcare services can result from payer-driven quality initiatives as providers may increase testing or services to meet quality metrics.

Option A: Increased use of healthcare services

This unintended consequence may occur as providers aim to meet certain quality standards.

References:

Quality initiative literature highlights how payer-driven metrics can lead to increased service utilization, sometimes beyond clinical necessity.

**NEW QUESTION # 180**

Data for an organization's annual Influenza vaccine administration yields the following results:

Month	Count of Vaccine Given
January	71
February	55
March	30
April	18
May	16
June	10
July	5
August	144
September	200
October	195
November	114
December	90

What is the median for the organization's annual vaccine count?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

The median is the value that's exactly in the middle of a dataset when it is ordered<sup>1</sup>. It's a measure of central tendency that separates the lowest 50% from the highest 50% of values<sup>2</sup>. The steps for finding the median differ depending on whether you have an odd or an even number of data points<sup>1,2,3</sup>.

Based on the data provided in the image, we can calculate the median by arranging the vaccine counts in ascending order and finding
