

Excellent 300-430 Dumps Discount–Find Shortcut to Pass 300-430 Exam

Required exam:	Recommended training:
Core exam:	
350-401 ENCOR	Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR)
Concentration exams (choose one):	
300-410 ENARSI	Implementing Cisco Enterprise Advanced Routing and Services (ENARSI)
300-415 ENSDWI	Implementing Cisco SD-WAN Solutions (ENSDWI)
300-420 ENSLD	Designing Cisco Enterprise Networks (ENSLD)
300-425 ENWLSD	Designing Cisco Enterprise Wireless Networks (ENWLSD)
300-430 ENWLSI	Implementing Cisco Enterprise Wireless Networks (ENWLSI)
300-435 ENAUTG	Implementing Automation for Cisco Enterprise Solutions (ENAUTG)

Are you still worried about the complex 300-430 exam? Do not be afraid. 300-430 exam dumps and answers from our Actual4test site are all created by the IT talents with more than 10 years' certification experience. Moreover, 300-430 Exam Dumps and answers are the most accuracy and the newest inspection goods.

To those time-sensitive exam candidates, our high-efficient 300-430 actual dumps comprised of important news will be best help. Only by practicing our 300-430 learning guide on a regular base, you will see clear progress happened on you. Besides, rather than waiting for the gain of our 300-430 Practice Engine, you can download them immediately after paying for it, so just begin your journey toward success now.

300-430 Test Dumps Pdf, 300-430 Valid Exam Simulator

We aim to provide the best service on 300-430 exam questions for our customers, and we demand of ourselves and our after sale service staffs to the highest ethical standard, though our 300-430 study guide and compiling processes have been of the highest quality. We are deeply committed to meeting the needs of our customers, and we constantly focus on customer's satisfaction. We play an active role in making every customer in which we selling our 300-430 practice dumps a better place to live and work.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q302-Q307):

NEW QUESTION # 302

Refer to the exhibit. A wireless engineer has integrated the wireless network with a RADIUS server. Although the configuration on the RADIUS is correct, users are reporting that they are unable to connect. During troubleshooting, the engineer notices that the authentication requests are being dropped. Which action will resolve the issue?

- A. Allow connectivity from the wireless controller to the IP of the RADIUS server.
- B. Authenticate the client using the same EAP type that has been set up on the RADIUS server.
- C. Provide a valid client username that has been configured on the RADIUS server
- D. Configure the shared-secret keys on the controller and the RADIUS server.

Answer: D

Explanation:

<https://community.cisco.com/t5/network-access-control/cisco-acs-11036-the-message-authenticator-radius-attribute-is/td-p/2054255>

NEW QUESTION # 303

An engineer is managing a wireless network for a shopping center. The network includes a Cisco WLC, a Cisco MSE, and a Cisco Prime Infrastructure. What is required to use Cisco CMX Location Analytics?

- A. Enable Context Aware and CMX Browser Engage.
- B. Install Cisco Prime Infrastructure with floor maps.
- **C. Enable tracking parameters in Cisco MSE.**
- D. Set history parameters in Cisco MSE.

Answer: C

Explanation:

Cisco Connected Mobile Experiences (CMX) Location Analytics requires accurate tracking of devices within the wireless network's coverage area. To utilize CMX Location Analytics effectively, it is essential to enable tracking parameters in Cisco Mobility Services Engine (MSE).

This allows MSE to collect data on device locations and movements within the environment, which can then be analyzed by CMX for insights into customer behavior, asset tracking, or other analytical purposes.

NEW QUESTION # 304

An engineer is planning an image upgrade of the WLC, and hundreds of APs are spread across remote sites with limited WAN bandwidth. The engineer must minimize the WAN utilization for this upgrade. Which approach must be used for the AP image upgrade?

- A. Allow the APs to download their code after WLC reboot.
- B. Use the Smart AP image upgrade feature.
- **C. Predownload the new code to the APs.**
- D. Execute parallel TFTP code upgrade on the APs via SSH.

Answer: C

Explanation:

When planning an image upgrade for a large number of Access Points (APs) across remote sites with limited WAN bandwidth, it's crucial to minimize WAN utilization. The best approach in this scenario is:

* Predownload the new code to the APs (Option A): This method involves sending the new firmware image to all APs before actually rebooting them with the new image. It allows APs to download firmware when network usage is low, thus minimizing impact during peak hours.

NEW QUESTION # 305

What is an important consideration when implementing a dual SSID design for BYOD?

- A. After using the provisioning SSID, an ACL that used to make the client switch SSIDs forces the user to associate and traverse the network by MAC filtering.
- B. If multiple WLCs are used, the WLAN IDs must be exact for the clients to be provisioned and traverse the network correctly.
- C. SSIDs for this setup must be configured with NAC State-RADIUS NAC for the clients to authenticate with Cisco ISE, or with NAC State-ISE NAC for Cisco ISE to associate the client.
- **D. One SSID is for provisioning and the other SSID is for gaining access to the network. The use of an ACL should not be enforced to make the client connect to the REAL SSID after provisioning.**

Answer: D

Explanation:

NEW QUESTION # 306

An engineer needs to provision certificates on a Cisco Catalyst 9800 Series Wireless Controller. The customer uses a third-party CA server. Which protocol must be used between the controller and CA server to request and install certificates?

- A. LDAP
- B. TLS
- C. SSL

- Answer: D**
