

1Z0-931-25 PDF, 1Z0-931-25 考試資料

P.S. Testpdf在Google Drive上分享了免費的、最新的1Z0-931-25考試題庫：https://drive.google.com/open?id=1mlhGDtQKfy10_G4OfOZaTime6RCK7ktD

你在煩惱什麼呢？是因為Oracle的1Z0-931-25認證考試而煩惱嗎？確實，1Z0-931-25考試是一門很難通過的考試。但是你也不用過分擔心。只要你利用了適當的方法，輕鬆地通過考試也不是不可能的。那麼你知道什麼是適當的方法嗎？使用Testpdf的1Z0-931-25資料就是一種最好不過的方法。Testpdf一直以來幫助了很多參加IT認定考試的考生，並且得到了大家的一致好評。這個資料可以保證你一次通過考試，請放心使用。

Oracle 1Z0-931-25 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.
主題 2	<ul style="list-style-type: none">Getting Started with Autonomous Database: This section of the exam measures the skills of Database Administrators and covers the architecture and key features of Oracle Autonomous Database. It explains how the database integrates within the Oracle ecosystem and provides an overview of different Autonomous Database offerings and their licensing models, helping administrators understand how to deploy and manage these cloud-based databases efficiently.
主題 3	<ul style="list-style-type: none">Migrating to Autonomous Database: This section of the exam measures the skills of Cloud Migration Specialists and covers strategies for migrating existing databases to Autonomous Database. It includes understanding migration considerations, and available options, and using Oracle Data Pump to transfer data seamlessly while minimizing downtime, ensuring smooth transitions to Oracle Cloud infrastructure.
主題 4	<ul style="list-style-type: none">Autonomous Database Dedicated: This section of the exam measures the skills of IT Architects and explores the workflows and functionality of Autonomous Database Dedicated and Autonomous Database Cloud@Customer. It includes provisioning dedicated resources, setting up OCI policies, monitoring infrastructure, scheduling maintenance tasks such as patching, and managing encryption keys for enhanced security. IT Architects will learn how to integrate dedicated database environments within their cloud strategy.

主題 5	<ul style="list-style-type: none"> Autonomous Database Shared: This section of the exam measures the skills of Cloud Engineers and focuses on creating and managing shared Autonomous Database instances. It includes provisioning, scaling, and starting or stopping instances, as well as database consolidation with Elastic Resource Pools. It also covers user management, cloning, database migration, monitoring, backup and restore processes, and introduces Data Guard for high availability, ensuring cloud engineers can maintain optimal database performance.
主題 6	<ul style="list-style-type: none"> Managing and Maintaining Autonomous Database: This section of the exam measures the skills of Database Administrators and focuses on the ongoing management and maintenance of Autonomous Database instances. It includes using REST APIs and OCI CLI for automation, configuring access control lists and private endpoints, monitoring performance, setting up notifications, utilizing features like auto-indexing and data safe, handling connectivity through wallets and service handles, and configuring disaster recovery using Data Guard to ensure business continuity.

1Z0-931-25考試資料，最新1Z0-931-25題庫

如今在IT業裏面臨著激烈的競爭，你會感到力不從心，這是必然的。你要做的是為你的事業保駕護航，當然，你有很多選擇，我推薦Testpdf Oracle的1Z0-931-25的考試試題及答案，它是幫助你成功獲得IT認證的好幫手，所以你還在等什麼呢，去獲得新的Testpdf Oracle的1Z0-931-25的考試培訓資料吧。

最新的 Oracle Autonomous Database 1Z0-931-25 免費考試真題 (Q116-Q121):

問題 #116

Which three methods can be used to migrate your existing Oracle database to Autonomous Database? (Choose three.)

- A. Using GoldenGate
- B. Using SFTP to copy CSV files into an Autonomous Database
- C. Using Oracle Zero Downtime Migration (ZDM)
- D. Using Data Pump
- E. Using Recovery Manager (RMAN)

答案：A,C,D

解題說明：

Migrating to Autonomous Database requires robust tools:

Correct Answer (B): Oracle Zero Downtime Migration (ZDM) minimizes downtime by synchronizing data and schema changes while the source remains online, ideal for critical systems.

Correct Answer (C): GoldenGate provides real-time replication, enabling near-zero downtime migration by continuously syncing data to Autonomous Database.

Correct Answer (D): Data Pump exports data and schema to dump files, which are then imported into Autonomous Database, suitable for offline migrations.

Incorrect Options:

A: SFTP with CSV files is not a comprehensive migration method; it lacks schema migration and automation for complex databases.

E: RMAN is for backup/restore, not optimized for full migrations to Autonomous Database's managed environment.

These methods cater to different migration needs (online vs. offline).

問題 #117

Which vaults are used for storing customer-managed encryption keys for Autonomous Database on Dedicated Infrastructure?

- A. Oracle Cloud Infrastructure Vault, Oracle Database Vault
- B. Oracle Audit Vault, Oracle Key Vault
- C. Oracle Key Vault, Oracle Cloud Infrastructure Vault
- D. Oracle Database Vault, Oracle Key Vault

答案: C

解題說明:

Autonomous Database on Dedicated Infrastructure supports customer-managed encryption (CME) keys for enhanced security control. The correct vaults are:

Oracle Key Vault, Oracle Cloud Infrastructure Vault (D):

Oracle Key Vault (OKV): A centralized key management solution designed for Oracle environments, OKV securely stores and manages encryption keys. It integrates with Autonomous Database to provide customer-managed TDE (Transparent Data Encryption) keys, offering features like key rotation and auditing. For example, a DBA might upload a master encryption key to OKV, which the database then uses to encrypt data at rest.

Oracle Cloud Infrastructure Vault (OCI Vault): OCI Vault is a general-purpose secrets management service in OCI, capable of storing encryption keys, passwords, and other sensitive data. It supports storing TDE keys for Autonomous Database, providing a cloud-native option with high availability and scalability. You might store a key in OCI Vault and link it to your database via the OCI console.

The incorrect options are:

Oracle Audit Vault, Oracle Key Vault (A): Oracle Audit Vault is for audit log management and analysis, not key storage. It doesn't support CME for Autonomous Database.

Oracle Cloud Infrastructure Vault, Oracle Database Vault (B): Oracle Database Vault enforces access controls within the database but isn't a key storage vault; it's about privilege management, not key management.

Oracle Database Vault, Oracle Key Vault (C): As above, Database Vault isn't a key storage solution, making this pairing incorrect. Both OKV and OCI Vault offer robust security for CME, giving customers flexibility based on their infrastructure preferences (on-premises OKV vs. cloud-based OCI Vault).

問題 #118

While creating an Autonomous Container Database on dedicated infrastructure through the Oracle Cloud Infrastructure (OCI) console, which patch type is offered to be applied during maintenance?

- A. Prior Release Update (PRU)
- B. Prior Release Update Revision (PRUR)
- C. Release Update (RU)
- D. Quarterly Bundle Patch (QBP)

答案: C

解題說明:

When creating an Autonomous Container Database (ACD) on dedicated infrastructure, Oracle offers specific patch types for maintenance. The correct answer is:

Release Update (RU) (D): During the creation of an ACD via the OCI console, users can choose to apply a Release Update (RU), which includes the latest security patches, bug fixes, and enhancements for the database version. RUs are the standard patching mechanism for Autonomous Databases on dedicated infrastructure, ensuring the system stays current.

The incorrect options are:

Quarterly Bundle Patch (QBP) (A): QBPs are not a recognized patch type for Autonomous Databases; they are more associated with on-premises Oracle deployments, not the cloud-native Autonomous infrastructure.

Prior Release Update Revision (PRUR) (B): PRURs are minor updates to prior releases, but they are not offered as a distinct option during ACD creation; Oracle focuses on RUs for consistency.

Prior Release Update (PRU) (C): PRUs refer to updates from previous major releases, but Autonomous Databases typically apply the latest RU, not prior ones, during provisioning or maintenance.

RUs align with Oracle's strategy for maintaining Autonomous Databases.

問題 #119

Which method does NOT permit you to change the database ADMIN user's password of an Oracle Autonomous Database on Shared Infrastructure?

- A. Admin page of the Cloud Service Console
- B. OCI CLI
- C. OS command line from the database server
- D. SQL Developer

答案: C

解題說明：

Changing the ADMIN user's password in an Autonomous Database on Shared Infrastructure is restricted to specific managed methods due to its serverless nature:

Correct Answer (C): "OS command line from the database server" is not permitted because Autonomous Database is fully managed by Oracle. Users do not have direct access to the underlying operating system or server, eliminating this as a viable option.

Valid Methods:

A: The Admin page in the OCI Console allows password changes via the "Change Administrator Password" option, a user-friendly GUI method.

B: The OCI CLI supports password updates using commands like `oci db autonomous-database update` with the `--admin-password` parameter.

D: SQL Developer can change the password using an `ALTER USER ADMIN IDENTIFIED BY <new_password>` command, provided the user has appropriate credentials.

This restriction ensures security and consistency in a managed environment.

問題 #120

Which predefined role that exists in Autonomous Database includes common privileges that are used by a Data Warehouse developer? (Choose the best answer.)

- A. DWROLE
- B. ADWC
- C. ADBDEV
- D. ADMIN

答案：A

解題說明：

Autonomous Database provides predefined roles tailored to specific use cases. The correct answer is:

DWROLE (B): The DWROLE predefined role is designed for Data Warehouse developers. It includes privileges commonly needed for data warehousing tasks, such as creating tables, views, and materialized views, as well as executing analytical queries. This role is optimized for Autonomous Data Warehouse (ADW) workloads.

The incorrect options are:

ADBDEV (A): There is no predefined ADBDEV role in Autonomous Database; this appears to be a fictional or misinterpreted role.

ADMIN (C): The ADMIN role is a superuser role with full database privileges, far exceeding the needs of a typical Data Warehouse developer and not tailored to that specific use case.

ADWC (D): This is not a predefined role; it might be a typo or confusion with ADW (Autonomous Data Warehouse), but no such role exists.

DWROLE is the best fit for a Data Warehouse developer's needs.

問題 #121

.....

有人問，成功在於哪裏？我告訴你，成功就在Testpdf。選擇Testpdf就是選擇成功。Testpdf Oracle的1Z0-931-25考試培訓資料是幫助所有IT認證的考生通過認證的，它針對Oracle的1Z0-931-25考試認證的，經過眾多考生反映，Testpdf Oracle的1Z0-931-25考試培訓資料在考生中得到了很大的反響，建立了很好的口碑，說明選擇Testpdf Oracle的1Z0-931-25考試培訓資料就是選擇成功。
