問題 #98

Your organization has been using Google Workspace for almost a year, and your annual security and risk assessment initiative is approaching in preparation for the risk assessment you want to quickly review all the security-related settings for Gmail, Drive and Calendar and identify the ones that may be posing risk What should you do?

- A. Review all settings for each organizational unit (OU) separately because it is the only way to see the security settings for Workspace apps
- **B. Review the Security health page in the Admin console**
- C. Review all the alerts in the Alert center
- D. Review the Gmail Drive, and Calendar reports in the Reporting section in the Admin console.

答案： B

解題說明：

Access Admin Console: Log in to the Google Admin console using your administrator account.

Navigate to Security Health Page: In the Admin console, go to the Security section and select Security health. This page provides a comprehensive overview of your organization's security settings.

Review Security Settings: The Security health page lists various security settings for Gmail, Drive, and Calendar. It highlights settings that might pose a risk and provides recommendations for improvement.

Identify and Mitigate Risks: Carefully review the highlighted settings. Follow the recommendations to enhance your organization's security posture. This ensures that any potential risks are identified and mitigated promptly.

問題 #99

Your company uses a whitelisting approach to manage third-party apps and add-ons. The Senior VP of Sales & Marketing has urgently requested access to a new Marketplace app that has not previously been vetted. The company's Information Security policy empowers you, as a Google Workspace admin, to grant provisional access immediately if all of the following conditions are met:

- * Access to the app is restricted to specific individuals by request only.
 - * The app does not have the ability to read or manage emails.
 - * Immediate notice is given to the Infosec team, followed by the submission of a security risk analysis report within 14 days.
- Which actions should you take first to ensure that you are compliant with Infosec policy?

- A. Search the Google Workspace support forum for feedback about the app to include in the risk analysis report.
- B. Confirm that the Senior VP's OU has the following Gmail setting disabled before whitelisting the app: "Let users delegate access to their mailbox."
- C. Move the Senior VP to a sub-OU before enabling Marketplace Settings > "Allow Users to Install Any App from Google Workspace Marketplace."
- **D. Add the Marketplace app, then review the authorized scopes in Security > Manage API client access.**

答案： D

解題說明：

Step by Step Comprehensive Detailed Explanation: To comply with the company's Information Security policy while granting provisional access to a new Marketplace app, follow these steps:

- * Add the Marketplace App: Start by adding the requested app to your Google Workspace Marketplace.
- * Review Authorized Scopes:
- * Go to the Admin console.
- * Navigate to Security > API controls > Manage third-party app access.
- * Add the app and review the scopes it requests. Ensure it doesn't request permission to read or manage emails.
- * Compliance Steps:
- * Restrict Access: Configure the app to be accessible only to the specific individuals as per the request.
- * Immediate Notification: Inform the Infosec team immediately about the provisional access granted.
- * Security Risk Analysis Report: Prepare and submit a security risk analysis report within 14 days, detailing the app's functionality and security implications.
- * Verification: Ensure that the Gmail setting "Let users delegate access to their mailbox" is disabled if the app's authorized scopes are compliant with the policy.

問題 #100

Your company recently acquired an organization that was not leveraging Google Workspace. Your company is currently using Google Cloud Directory Sync (GCDS) to sync from an LDAP directory into Google Workspace. You want to deploy a second instance of GCDS and apply the same strategy with the newly acquired organization, which also has its users in an LDAP directory. How should you change your GCDS instance to ensure that the setup is successful? (Choose two.)

- A. Add an LDAP sync rule to your current GCDS instance in order to synchronize new users.
- B. Provide your current GCDS instance with admin credentials to the recently acquired organization's LDAP directory.
- **C. Set up an additional instance of GCDS running on another server, and handle the acquired organization's synchronization.**
- D. Set up exclusion rules to ensure that users synced from the acquired organization's LDAP are not, suspended.
- **E. Upgrade to the multiple LDAP version of GCDS.**

答案： C,E

解題說明：

* Additional GCDS Instance:

* Running a separate instance of GCDS on another server allows you to manage synchronization for the acquired organization independently.

* This avoids conflicts and simplifies management for different LDAP directories.

* Multiple LDAP Version:

* Upgrading to the multiple LDAP version of GCDS supports synchronizing data from multiple LDAP directories.

* This is useful for handling different organizations with distinct LDAP setups.

* Steps for Setting Up:

* Install a second instance of GCDS on a separate server.

* Configure the new instance with the acquired organization's LDAP details.

* If using the multiple LDAP version, upgrade your existing GCDS setup and configure rules for both LDAP directories.

* Test the synchronization to ensure proper setup and no conflicts.

問題 #101

Your organizational policies require that all documents containing personally identifiable information (PII) are labeled as "Sensitive". You want to scan all files in your corporate Drive and apply the label to all files containing PII. What should you do?

- A. Enable data classification for your corporate Drive. Create a label named "Sensitive" that is automatically applied to all new and previously created files in your domain.
- **B. Create a data protection rule for Drive that automatically applies the label named "Sensitive" to Drive files with PII.**
- C. Create a data protection rule for Drive that automatically applies a label named "Sensitive" to new Drive files with PII, and requires users to add a label to previously created files with PII.
- D. Enable data classification for your corporate Drive. Create a label named "Sensitive" that is automatically applied to all new files in your domain.

答案： B

問題 #102

You work for a midsize organization. Your compliance and audit team sees that users are frequently resetting their passwords. You must provide accurate information and ensure that the compliance team is informed every time a user changes their password. What should you do?

- A. Disable user account recovery so users must contact you before a reset.
- B. Enable user account recovery and forward any alert to the compliance team through the alert center.
- **C. Check the User's password changed alert in the alert center and include the compliance team in the email notifications.**
- D. Create a new alert by using user log events and check that event Login type is Google password and include the compliance team in the email notifications.

答案： C

解題說明：

Step by Step Comprehensive Detailed Explanation:

Access the Admin Console: Sign in to your Google Admin console.

Navigate to the Alert Center: Click on "Security" and then "Alert Center." Create New Alert: In the Alert Center, click on "Manage alerts" and then "Add alert rule." Configure Alert Rule: Select "User's password changed" as the event type.

Include Compliance Team: In the alert configuration, add the compliance team's email addresses to the notification recipients.

Save the Alert: Save the configuration to ensure the compliance team is informed every time a user changes their password.
