Tech4ExamにIT業界のエリートのグループがあって、彼達は自分の経験と専門知識を使ってEXIN CDFOM認証試験に参加する方に対して問題集を研究続けています。君が後悔しないようにもっと少ないお金を使って大きな良い成果を取得するためにTech4Examを選択してください。Tech4Examはまた一年間に無料なサービスを更新いたします。

## EXIN CDFOM 認定試験の出題範囲：

| トピック   | 出題範囲   |
|--------|--|
| トピック 1 | <ul style="list-style-type: none"> <li>Data Centre Operations: Focuses on daily operational activities and procedures supporting continuous facility functioning.</li> </ul>   |
| トピック 2 | <ul style="list-style-type: none"> <li>Environmental Sustainability: Focuses on minimizing environmental impact through power efficiency, waste management, and renewable energy integration.</li> </ul>   |
| トピック 3 | <ul style="list-style-type: none"> <li>The Data Centre Organization: Addresses organizational structure, roles and responsibilities, shift management, performance management, training, career development, and succession planning.</li> </ul>     |
| トピック 4 | <ul style="list-style-type: none"> <li>Managing Physical Security: Deals with facility protection through security policies, staff management, incident handling, and security audits.</li> </ul>  |
| トピック 5 | <ul style="list-style-type: none"> <li>Facilities Management: Covers infrastructure maintenance including maintenance programs, outsourcing, contracts, scheduling, spare parts, and contamination control.</li> </ul>                               |
| トピック 6 | <ul style="list-style-type: none"> <li>Governance, Risk and Compliance: Covers management framework including compliance, risk management, document control, financial management, and vendor oversight.</li> </ul>                                  |
| トピック 7 | <ul style="list-style-type: none"> <li>Organizational Resilience: Addresses business continuity, facility redundancy, Business Impact Analysis, and disaster recovery preparedness.</li> </ul>   |
| トピック 8 | <ul style="list-style-type: none"> <li>Managing Safety &amp; Statutory Requirements: Focuses on workplace safety compliance, including safety policies, training, Permit to Work systems, PPE, emergency preparedness, and safety audits.</li> </ul> |

- Service Level Management: Covers creating and managing service agreements, including SLAs with measurable metrics, service reporting, customer satisfaction measurement, and continuous improvement processes.

**EXIN CDFOM認定試験の準備をすれば勉強方法を教える**

EXINのCDFOMスタディガイドは無料のトライアルサービスを提供するため、スタディの内容、トピック、購入前にソフトウェアを最大限に活用する方法についての情報を得ることができます。どのようなCDFOMテスト準備が適切であるかを選択し、不必要な無駄を避けるために適切な選択をするのに良い方法です。また、Tech4ExamのCDFOM練習用トレントまたはトレイルプロセスの購入で問題が発生した場合は、すぐにご連絡いただければ、専門家によるCDFOMのCertified Data Center Facilities Operations Manager学習教材のオンラインサポートを提供します。

**EXIN Certified Data Center Facilities Operations Manager 認定 CDFOM 試験問題 (Q43-Q48):****質問 # 43**

To set up a framework for an effective environmental management system, which standard should be followed?

- A. ISO 14001
- B. LEED
- C. EU-COC
- D. ISO 5001

正解: A

**解説:**

For environmental management systems (EMS), the internationally recognized and adopted standard is:

ISO 14001 - Environmental Management Systems

ISO 14001 provides a framework for:

- \* Environmental policy
- \* Environmental impact assessment
- \* Sustainability objectives
- \* Compliance obligations
- \* Environmental performance monitoring
- \* Continuous improvement

Why the other options are incorrect:

- \* A - EU-COC: Energy efficiency best practices for data centers, not a full EMS.
- \* B - ISO 50001: Energy management standard, focusing on energy efficiency only.
- \* C - LEED: Building sustainability certification, not a management system.

Thus, Dis correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- \* ISO 14001 is the recognized standard for environmental management systems.
- \* Supports sustainability, compliance, and environmental performance improvement.

**質問 # 44**

What is the outcome of a risk evaluation process?

- A. The decision whether risk treatment needs to take place
- B. The list of all identified risks
- C. The required budget treating the data center risk
- D. The report advising the board of management to accept all identified risks

正解: A

解説:

In the EPI framework for risk management, after the risk identification and risk analysis steps, the risk evaluation step determines whether the assessed risks are acceptable or require treatment based on the organization's risk appetite, criteria, and the potential impact. The evaluation leads to a decision on whether risk treatment needs to take place.

- \* It is not simply compiling all risks (so option C is incorrect).
- \* It is not exclusively about budgeting (so option D is incorrect) though budgeting follows treatment decisions.
- \* It is not necessarily advising to accept all risks (so option B is incorrect) but rather it supports decision-making on treatment.
- \* Therefore, option A is correct: the outcome is the decision whether to treat the risk.

EPI DCFOM-Aligned Reference Concepts

- \* Risk evaluation assesses identified and analysed risks against risk criteria to decide on acceptability or need for treatment.
- \* The outcome is a documented decision-making step in the risk management process.

#### 質問 # 45

Heavy equipment needs to be moved to another side of the computer room so that the three (3) workers can continue their drilling and cutting off the wall for a new cable tray. Four (4) staff members are required to move the equipment so there is one extra staff member required to assist. The safety manager who is overseeing the works is asked to help moving the equipment.

Is the safety manager allowed to step in and assist with the move?

- **A. No**
- B. Only when the total weight per person does not exceed the maximum allowed by local regulations
- C. Yes
- D. Only if this does not create a security vulnerability

正解: A

解説:

In EPI's safety and statutory requirements framework, the Safety Manager's role is strictly supervisory during ongoing work activities. They are responsible for monitoring, verifying compliance, ensuring safe practices, and intervening only to correct unsafe conditions - not to physically participate in the hazardous task.

Key safety principles include:

- \* Independence of the Safety Function The Safety Manager must remain impartial and fully observant.

If they participate directly in labor activities (such as lifting equipment), they can no longer maintain oversight of:

- \* ongoing safety compliance
- \* worker actions
- \* environmental hazards
- \* risk escalation
- \* Conflict of Responsibilities By physically engaging in the task, the Safety Manager becomes distracted and loses supervisory visibility, which introduces risk to the entire operation.
- \* Competency and Authorization Requirements Personnel assigned to physically move heavy equipment must:
  - \* be authorized workers
  - \* be trained in manual handling
  - \* have been briefed for the specific PTW-controlled activity

The Safety Manager is not part of the operational lifting team unless specifically assigned beforehand, which is not the case here.

- \* EPI's Supervisory Separation Principle The safety oversight role must remain dedicated and unbroken during all hazardous or controlled work activities.

Therefore, the Safety Manager must not step in to replace or supplement labor resources.

Correct answer: A - No.

EPI DCFOM-Aligned Reference Concepts (Paraphrased, Not Verbatim)

- \* Safety oversight must remain independent and uninterrupted.
- \* Safety Manager responsibilities do not include participating in physical hazardous activities.
- \* Supervisory personnel cannot assume operational roles during high-risk work.

#### 質問 # 46

When is the right moment to label assets?

- A. The moment support and maintenance contracts apply
- B. The moment of commissioning the equipment for production
- **C. The moment of unpacking the equipment**

- D. The moment of testing the equipment

正解: C

解説:

EPI guidelines on asset management state that assets should be tagged and entered into the asset management database as early as possible, specifically:

At the moment of unpacking.

Reasons:

- \* Prevents loss or misplacement
- \* Ensures traceability during staging, testing, and installation
- \* Supports lifecycle tracking from the earliest stage
- \* Ensures accurate configuration and inventory management

Why other options are incorrect:

- \* A: Contract activation is unrelated to labeling.
- \* C: Testing occurs after unpacking; labeling must precede it.
- \* D: Commissioning is too late; the asset must already be tracked.

Thus, B is correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- \* Asset labeling begins as soon as equipment is unpacked.
- \* Early tagging ensures full lifecycle traceability and compliance.

#### 質問 # 47

The needs analysis has been completed and the data center organization is tasked with the capability assessment. Which of the below is a mandatory activity as part of the capability assessment?

- A. Review the security needs
- B. Determine the availability requirements
- C. Create inventory of skills, knowledge and capacity
- D. Identify applicable safety requirements

正解: C

解説:

A capability assessment evaluates whether the data center organization is capable of delivering the defined services.

The mandatory activity is to:

Create an inventory of skills, knowledge, and capacity of the workforce and resources.

This includes:

- \* Current staff technical skills
- \* Certifications
- \* Experience
- \* Availability (capacity)
- \* Backup and contingency roles
- \* Alignment with service demands and SLAs

Why other options are incorrect:

- \* A: Security needs are part of service requirements, not capability assessment.
- \* C: Availability requirements are determined during needs analysis, not capability assessment.
- \* D: Safety requirements belong to statutory and compliance analysis, not capability assessment.

Thus, B is the correct answer.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- \* Capability assessment requires determining skills, competencies, and available capacity.
- \* Ensures the organization can meet defined services and SLAs.

#### 質問 # 48
