The Microsoft PL-400 certification is one of the hottest career advancement credentials in the modern Microsoft world. The PL-400 certification can help you to demonstrate your expertise and knowledge level. With only one badge of PL-400 certification, successful candidates can advance their careers and increase their earning potential. The Microsoft PL-400 Certification Exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities.

Earning the Microsoft PL-400 Certification demonstrates that a developer has the skills and expertise required to create custom business applications using Power Platform. It is an important certification for developers who want to advance their career in the field of application development. Microsoft Power Platform Developer certification can help developers to gain recognition for their expertise, enhance their job opportunities, and increase their earning potential. Additionally, the certification also enables developers to gain access to exclusive Microsoft resources and tools, which can help them to stay up-to-date with the latest technologies and trends in the industry.

Microsoft Power Platform Developer or PL-400 certification exam is designed for individuals who want to validate their skills in building solutions on the Microsoft Power Platform. PL-400 Exam measures the expertise of candidates in designing, developing, securing, and troubleshooting Power Platform solutions. Microsoft Power Platform Developer certification is ideal for developers, software engineers, and IT professionals who want to demonstrate their proficiency in Power Apps, Power Automate, Power BI, and Power Virtual Agents.

Microsoft PL-400, also known as the Microsoft Power Platform Developer Exam, is designed to validate a candidate's expertise in building and implementing solutions using the Microsoft Power Platform. PL-400 exam measures various skills and knowledge required for developing complex business solutions, including creating custom user interfaces, integrating data, automating processes, and extending the functionality of applications.

**New PL-400 Exam Bootcamp, Latest PL-400 Exam Experience**

It is understandable that different people have different preference in terms of PL-400 study guide. Taking this into consideration, and in order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our PL-400 Preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one of them as you like. No matter you buy any version of our PL-400 exam questions, you will get success on your exam!

## Microsoft Power Platform Developer Sample Questions (Q346-Q351):

### NEW QUESTION # 346

You need to modify Microsoft flow to resolve CustomerCs issue. What should you do?

- A. Add a data operation that specifies the false conditions.
- B. Add a condition containing approval hierarchy.
- **C. Add a timeout setting to the approval flow.**
- D. Add a configure run that is set to Is successful.

**Answer: C**

Explanation:

Explanation

Scenario: CustomerC requested additional information from the parts department through the customer survey and has not received a response one week later.

Imagine having a process where you want to give someone a couple of days to reply to an approval. If that someone doesn't respond in time, you want to assign a new approval to another person or group of people. To achieve this you can set the timeout in the action settings.

Reference:

<https://www.o365duke.com/2018/06/02/timeout-flow-approvals/>

Topic 2, Bellows Sports

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Bellows Sports is the region's newest, largest, and most complete sports complex. The company features baseball and soccer fields and two full-size hockey rinks. The complex provides coaching, recreational leagues, a pro shop, and state-of-the art customer and player amenities.

The company is organized into the following divisions:

Baseball

Hockey

Soccer

Bellows Sports runs tournaments several times per year. Each tournament runs six weeks.

Current environment

Requirements

Bellows Sports tracks players and events in Microsoft Excel workbooks and uses email to communicate with players, partners, and prospective customers. The company uses a proprietary cloud-based accounting system.

The company relies on referrals from athletes for new business. Bellows uses a third-party marketing company to gather feedback and referrals from athletes. The third-party marketing company uploads a Microsoft Excel file containing lists of potential customers and players to the FTP site that Bellows Sports maintains.

Tournaments

Customer information is stored in the Accounts entity. Each tournament record must list the associated sales representative as the

tournament owner. When team members create tournament records they must enter the start date for a tournament. The end date of the tournament must be automatically calculated.

#### Registration form

You must create a form to allow players to register for tournaments. The registration form must meet the following requirements:

- Each division has tournaments that take place in specific locations. Users must be able to select the division for a tournament location.

Information about upcoming tournaments must be pre-located into the registration form when the registration form loads.

The form must include a custom button that sends an email confirmation to the player after the player registers.

The button must not be visible until after the form is saved.

#### Security

The company identifies the following job roles:

- You must grant users the minimum permissions required to perform their job tasks.

#### Data automation

Customer name must be added to Dynamics 365 Finance automatically after it is entered.

You must produce a report that details the number of registrations for a day and send the report as a PDF to the management team.

You must implement mechanisms to handle all code-related errors.

When a customer record is updated, the system must look up the account number for the customer in the accounting system.

Referrals must be imported into the system as soon as they are available.

#### Issues

##### Apps

The captions for the New and Save buttons do not render properly on the form.

Interns can create apps but cannot interact with their own data.

##### Portal

The query for all registered users must return the data categorized by division. Queries must return only the Name and Sport fields.

Queries return all fields. The query is as follows:

- Solution checker issues

You run solution checker and observe Plug-in or workflow activity errors in the following code sets:

##### Code

The following code runs when the registration form loads. You must implement a mechanism to handle errors that occur in the code:

- 

## NEW QUESTION # 347

You are a Power Platform developer.

Users report several access issues.

You need to resolve the user access issues.

What should you use? To answer, drag the appropriate security options to the correct scenarios. Each security option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- 

#### Answer:

Explanation:

- Explanation

#### Box 1: Conditional access

You can limit access to users with block access by location to reduce unauthorized access. By using Conditional Access policies, you can apply the right access controls when needed to help keep your organization secure and stay out of your user's way when not needed. Conditional Access analyses signals such as user, device, and location to automate decisions and enforce organizational access policies for resources.

#### Box 2: DLP policy

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.

#### Box 3: Exfiltration blocking

Email exfiltration controls for connectors

Microsoft Exchange enables admins to disable email autoforwards and autoreplies to remote domains for external recipients.

Exchange does this by using message-type headers, such as Auto Forward received from Outlook and Outlook on web clients.

### NEW QUESTION # 349

You are creating a model-driven app that requires complex business logic when a Dataverse record is updated. The app must provide the following functionality:

\* Update a record using a REST API and able to manually retry in the event of a failure without additional development.

\* Validate the record values and display an error message next to those that are invalid.

You need to configure the app with the required business logic.

Which implementation method should you use? To answer, move the appropriate implementation methods to the correct functionalities. You may use each implementation method once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.
